CITY AND COUNTY OFFICIAL PAPER.

Bible Thought for Today

SURE GUIDANCE.—In all thy ways acknowledge him, and he shall direct thy paths.—Proverbs 3:6.

ARGUMENT FOR SMALLER COLLEGES.

It would be a fine thing if President Harding's expressed preference for small colleges were considered seriously by high school graduates.

The tendency in recent years has been toward large colleges, at the expense of the small ones. As a result, many of the larger institutions have been crowded far beyond their capacity for rendering good service. As educational "plants," they cannot do justice to themselves. Moreover, their atmosphere is lost and their traditions are swamped. Student bodies become mobs, on which the individual is merged and lost.

It should be evident to any intelligent person that a moderate-sized institution, with no more students than it is equipped to handle, can often render better educational service than more famous universities. Moreover, life in a smaller college is likely to be far better for the student. There he has a chance to develop himself. Instead of contenting himself perforce with being an unrecognized part of a huge system, he can find play for all his faculties participating largely in student activities, living a full life, achieving distinction for whatever superior powers he may have, and really shaping himself for his future life.

It is far better to be a "big frog in a small puddle" than a small frog in a big puddle. It creates self-reliance and a self-respecting pride that will help the young man or woman later in many a hard place.

And nearly all of this reasoning applies just as well to small cities as it does to small colleges. Many an ambitious young fellow has gone to a big city and been swallowed up and lost, ending his life in bitterness and disappointment, when by staying at home, among his friends and neighbors, he might have grown to success and happiness by participating in the growth of the community.

Big cities, in general, breed small men, with a false sense of their importance gained from mere contact with numbers. Smaller cities, in spite of all the slurs at "Main street," breed men of a bigger average.

Air Armament.

It was remarked frequently by intelligent observers, during and after the Washington arms conference, that the limitation of battleships was of little importance except as a means of cutting down useless expense, because the fighting craft of the future would be airships.

The soundness of that view is shown by recent developments. France, in her effort to keep her military establishment the strongest in Europe, has specialized on airplanes and has more than 200 squadrons maintained in fighting trim. Great activity in aircraft is reported from Japan. There is a demand in England that Great Britain strengthen her air defense. The United States is just embarking upon a new building program that emphasizes big bombing planes and fight scouting planes, the latter for naval auxiliaries and the former for shore defense. What is happening in Germany nobody knows exactly, but the Germans are certainly not asleep.

All this is necessary under present conditions. As long as any power goes ahead building fighting aircraft, the other powers must do the same. So far the air competition is on a comparatively small and inexpensive scale, but the tendency is to increase the scope and cost of construction rapidly, as was the case with naval armament.

It was unfortunate that the Washington conference, while doing such excellent work in other directions, was unable to do much about limitation of air warfare. Many will agree now with Sir Phillip Gibbs, the English war critic, that it would be well if there were a world-wide propaganda against the competition in aerial armament and an international agreement to forbid the worst abuses of air fighting.

Mexican Outrages.

Mexican newspapers blandly assert that a Bruce Bielaski, the American citizen who was recently kidnaped by Mexican bandits, "kidnaped himself," a charge which in the light of Mr. Bielaski's record and reputation sounds pretty ridiculous. From Mexico City come also reports greatly discounting stories of other alleged kidnapings of Americans.

This Mexican attitude, official and unofficial, may be discounted itself. The Mexicans have an obvious interest in making the best of any such unpleasant situation, especially at a time when they are hopeful of recognition by the American government.

At the same time these Mexican protests suggest that perhaps the events they have been minimizing have been unduly magnified on this side of the border. Certainly Mr. Bielaski seems to have escaped without much difficulty, peril or loss, and there is little convincing evidence of some of the other offenses reported.

Mexican newspapers speak of an infamous intrigue by powerful North American interests" for the purpose of breaking down the financial arrangements recently agreed upon by representatives of the two countries and starting a movement again for American intervention in Mexico. The Mexican press has none too high a standard of reliability in such matters, but in the circumstances it is natural to wonder whether they are altogether wrong.

Tourist Photography.

One motorcar company is trying an advertising plan which ought to make good. It is asking owners of its cars to take snapshots during their summer trips, which will show their cars or those of fellow-tourists (of the same make) in unusual situations or amid particularly lovely surroundings. There are liberal prizes for the best pictures.

Kodaking as it is now is already a national pastime. But this particular scheme may be possible start something more than originally planned. With a lot of tourists hoping to capture a prize as a result of a little careful picture-taking, there is going to be a good deal of close observing of other people's cars as well as a good deal of comparison of gray matter. The picturemaking fiend who goes forth knowing little about any car except his own will come home well acquainted with many others and ready to try one of these others or more thoroughly convinced than ever that his own is the best on the market for his purposes.

Scientific Works for Russia.

Feeding hungry minds is very nearly as important work as feeding starving bodies. That is why an American committee headed by Dr. Vernon Kellogg is actively engaged in getting scientific literature into Russia.

It is reported that Russian botanists, zoologists, chemists, physicists, geologists engineers and others are appealing to the outside world to send them scientific developments since 1914. Books periodicals, authors' reprints, government bulletins, the publications of scientific institutions and museums, proof and possibly even newspaper clippings on any subject in the scientific field, would be tremendously welcome to those Russian scientists.

The American Relief Administration has arranged to transport contributions of scientific literature. The good results may be far-reaching, for renewed intellectual contact with the outside world in one line is likely to spread to others, and a better understanding of their own situation and of the attitude of civilization may help to re-establish sanity in Russia.

Clean Soda Fountains.

One of the civic summer activities of an especially live Women's City club is a canvass of all the soda fountains, confectionery stores and ice cream parlors in town, in the interest of cleanliness. It is a work for which there is room in many communities.

No center in any town receives more patronage during the hot weather than those which dispense cooling drinks and ice cream. These places may be oases of health and comfort or they may be active sources of disease.

It is to be said to the credit of the average proprietor that he has kept in line with the modern trend toward sanitation and cleanliness, and the wares he dispenses are made from pure materials and placed before the public in tasteful and sanitary manner. Indeed many of these shining "soda grills" would put the best efforts of a crack housekeeper to shame. But where a contrary condition exists, it cannot be detected too quickly or condemned too thoroughly, and the mothers whose offspring are the best patrons of the soda fountain are by nature its guardians.

Fireless Akron.

Akron, O., the "rubber city," has established and is now out to break a new "fireless" record for cities of its size. When whole cities unite for fire prevention we are getting somewhere.

There is perhaps no human evil so ceaselessly due to preventable causes as fires. There are cases of spontaneous combustion, to be sure, but these generally occur because somebody leaves inflammable materials in an unsuitable location. Then there is lightning, to which even the "fireless" enthusiast must bow as a superior and practically uncontrollable force. But for all the other ordinary, innumerable fires which destroy property and lives lay low the works of God and man. Who shall say which is which?

Prevention of fire, winter and summer, is a matter of taking pains enough. When, instead of paying the fire sufferer as an innocent victim, we learn to frown darkly upon him as a careless person and a disgrace to his fellowmen, it may help.

In our stubble coal piles we may see an illustration of that American lack of reserve so frequently referred to by people from other nations.

The average consumer may not have money to burn but he would like to see a little coal in the cellar just the same.

Well anyway the word of the Soviet government is as good as its bond.

A fresh room attendant is not particular as to giving you your own hat. His inconsistency comes when he gives you the one you gave him.

Miss Chatterbox—"I hear you've been hunting on the stock market. Were you a bull or a bear?"

Mr. Smithereens—"Neither. I was the goat."

An honest confession may be good for the soul but it sometimes bores the folks.

While driving a few days ago a local auto ran over my rear running gear. Ouch.

MAYBE

Maybe we did spring from monkeys—
It's a theory many call—
But many a family increased
Came home with a funny tale.

AT THE WEDDING.

"Where is the groom?"
"There he is."
"I don't see him."
"Well, you can see the top of his nose. He's behind the bride's bouquet."

A local bird says he would rather handle a spring lamb than a Ford with his wife. His wife is the kind that prevents wife-beaters and there are lots of that kind.

THE WAY IT GOES.

Just Tuesday says the fact that two pals appreciate beauty is shown by the way the crowd at a circus measures the graceful form and handsome features of the trapeze queen.

MORE REUSABLE.

"A farmer asks why I have a lot of paper coming to me."

"Tell him to keep it, as it may be that I would rather hear a paying fellow say that."

When the answer is not that we do what we plan to do but that what we do is the result of our plans.

According to an eastern educator, drinking has increased among college girls. As a result, cheer leaders now have a much harder time to arouse the college spirit.

The postage stamp sticks to its job and arrives.

There is sometimes a little change left in the baby after it has swallowed a dime.

Bolshevik Russia is a land that is never fascinated by men who stand on the small of the night in the same hall.

WITHYCOMBE WAS HOST SATURDAY

Many Farmers and Their Families Spent the Day Picnicing at Experiment Station Near Union.

Saturday was "open house" for all farmers and others who cared to visit the Eastern Oregon Experiment station near Union, and Mr. and Mrs. Withycombe took considerable pleasure in making every visitor feel perfectly at home.

The occasion was one planned by the granges of the county but, besides members of the granges, other farm organizations were present, as well as a number of citizens who are engaged in other undertakings besides farming.

Dinner at noon in the state grove a la Picnic was the big feature of the day, and it was a great and glorious dinner. The best of the rich Grande Ronde valley production was served and served well.

After dinner M. L. Carter, master of ceremonies and chairman of the day, called on different speakers and musicians who made up the program.

Robert Withycombe, manager of the station gave some interesting statistics on the work being done in an experimental manner.

He had the results of feeding tests all charted and explained them in a way that all could and did understand.

Sheds Do Little Good.

One point of exceptional interest was the shedding of stock being fattened in this valley. Everyone has repeatedly heard that the wind in the Grande Ronde makes a poor place to feed live stock and to determine this question Mr. Withycombe has conducted accurate tests on cattle fed in the open and cattle fed under sheds. The results were about the same, proving there is little or no benefit to shedding stock in this valley.

Another test opened wide the eyes of those unfamiliar with live stock production for it showed a loss of late on fat cattle even when feed was produced at the least possible expense; it showed just a shade profit on lambs and a small profit on hogs.

Dairying the Best.

By all odds the dairyounit at the station is the most profitable and to see the charts and hear the explanation one is forced to the belief that dairying must come in this valley if we are to secure the best returns from work on the farm.

C. D. Mustoman made a few remarks on the grange and the work of the farmer. County Agent Avery spoke of the work the agent's office is doing in the valley. John Wells told of the waste in state work and urged economy, stating that if he is elected county commissioner this fall he pledges the strictest economy in his administration.

Miss Mary Nichols talked on the county library work. With vocal selections by Mrs. Phy and her two daughters and a piano selection by Mrs. Chadwick the program was brought to a close.

BIG ATTENDANCE SEEMS ASSURED

Knights of Pythias and Pythian Sisters of Wallowa county had an enjoyable picnic six miles in the South Fork from Lostine yesterday. The afternoon was spent quietly and pleasantly, after a big picnic dinner. A committee from Khaled Temple, D. O. K. K., was present from La Grande to explain the details of the big Dokey convention to be held in La Grande September 1st and 2nd. There are several hundred members of the order in Wallowa county and that about 90 per cent of them will be present was indicated yesterday. The committee which made the trip from La Grande included Royal Vizier Charles Mowe, Wm. Miller, treasurer of the local committee on arrangements, and A. W. Nelson, secretary.

Travel Handicaps.

Furthermore, there is hardly anything that handicaps a vampire more than to travel with her three little children.—Galveston News.

ELGIN LOSES TO LA GRANDE

(Continued from Page One.)

made six runs in the two innings. Six hits, an error and two wild pitches were responsible for the runs.

Every member of the Pirate crew batted in the fourth six of them scored. Rosenbaum hit a homer in this inning with two men on. Some discussion was experienced in this inning when Workman, who singled, was called safe on a close play. Elgin insisted the was out but the decision held. However, La Grande took the field again when but two outs had been registered.

In the fifth inning Workman was hit in the ribs by Halgarth, who was attempting to make a base, two ribs being broken. He was forced to leave the game and Otis Veal, base umpire, went in left field. Hickey going to second base. Garrity hit a home this inning, touching home plate before the fielder reached the ball.

With the score 13 to 5 for the Pirates Elgin rallied and brought in six runs in the sixth and seventh innings, the Pirates scoring one more. In the last two innings, McGinnis pitched real ball, letting the Aggies down with one measly single.

Garrity came out of a batting slump and got a single, a walk, a three bagger and a home run in five times at the plate. He played a stellar game in the field also, as did most of the Pirates. Smith of Elgin, to bat five times, registered three three baggers. And Rosenbaum got two walks one three bagger and a homer in five times at the plate.

Blumenstein pitched a fair game for Elgin, especially during the latter part of the game. McInnis started off well but was hit hard in four innings but he finished the game like a big leaguer.

While La Grande was trouncing the Aggies, the Baker Colts surprised the world in general by shutting out Cove 5 to 0. Brazille started the game for Cove, Baker scoring all five from him in the first three innings. Red Alexander (Gordon, Hallgarth, Shelton. Sacrifice hits: Crews, Hickey. Struck out: By Gilfeath 5; by Blumenstein 11. Time of game, 2 hours 20 minutes. Umpires: W. L. Dynes, of Elgin, and Otis Veal, of La Grande.

Next Sunday the Gilfeath goes to Union, Elgin to Baker and Rosenbaum plays Cove.

Score By Innings.

									R	H	E
La G.	2	1	2	6	2	0	1	0	0	14	15	4
Elgin	0	2	4	0	1	2	0	0	0	12	15	6

Summary.

Errors: Workman (2), Crews, Rosenbaum, Hickey, Gordon (2), Chandler, Hallgarth, Smith. Two base hits: Crews (2), Shelton. Double base hits: Crews (2), Shelton. Three base hits: Rosenbaum, Garrity. Home runs: Mayer, Rosenbaum (2). Garrity. Knight. Stolen bases: Knight (2), Thompson (2), Mayer, Blumenstein, Hallgarth, Smith (2). Bases on balls: Workman, Rosenbaum, Veal, Hickey. Struck by pitcher: By Blumenstein, Hickey. Struck out: By Blumenstein 11, by McInnis 2. Passed balls: Knight, Thompson. Wild pitches: Blumenstein 2, McInnis. Left on bases: La Grande 7, Elgin 7. Time of game: 2 hours 20 minutes. Umpires: W. L. Dynes, of Elgin, and Otis Veal, of La Grande.

One Dollar Saved Represents Ten Dollars Earned.

The average man does not save 10 per cent of his earnings. He must spend nine dollars in living expenses for every dollar saved. That being the case he can not be too careful about unnecessary expenses. Very often a few cents properly invested, like buying seeds for his garden, will save several dollars outlay later on. It is the same in having Chamberlain's Cough and Diarrhoea Remedy. Does it but a few cents and a bottle of it in the house often saves a doctor's bill of several dollars. Adv.

THE QUALITY STORE

Men! Here Are

SEVERAL DOZEN NEW

SHIRTS

We're Going to Sell at

$1.50 and $2.00

And they're all fine new shirts too—they have just been unpacked and put in our stock. There are striped and checked patterns, plain and corded materials of many different designs and colorings.

These shirts will answer the demands of every man who desires dressy soft shirts for every day wear—popular priced and there is every size from 14 to 16.

In two different lots, priced at $1.50 and $1.75. See window.

PALM BEACH

SUITS

$20.00

Palm beach suits represent the utmost in clothes economy for any man. They are inexpensive, they are cool they wear several seasons and are always stylish. They can be sent to the laundry and washed like a gingham apron.

We're showing palm beach suits in both the natural and gray colors. All are priced the same, $20.00.

"JANTZEN" SWIMMING SUITS

$6.00 to $7.50

For Men

Men who swim know "Jantzen." They're the all-wool kind with the patented stitch that never allows the suit to stretch or shrink. In all bright color combinations.

She used to be plain

NOW it is possible for even the plainest woman to be really attractive, even though her hair is straight, lifeless and full of dandruff.
