TAKE TO HOT LAKE
ENTERPRISE, Aug. 5.—Marion Ward was taken to Hot Lake recently to have his leg re-set. It seems that the leg knit with only a point of the bone in place and it was necessary to have the leg re-broken.

Marion broke his leg while playing with other boys at the depot some time ago. Some of the fellows were jumping from a box car onto some straw and he duplicated their feat. However, in some manner he alighted wrong and the leg was broken close to the hip.

It had been thought that the broken bone was mending nicely and it was expected that the little fellow would soon be able to rejoin his playmates. On examination, last week, it was found that the break had not properly mended and after an X-ray examination it was deemed best to take him out for treatment.

EX-MAYOR BACK IN HOME TOWN

The dry weather which is still prevailing is drying up the pastures and unless we have rain soon it looks as if some of the farmers may have to feed their dairy cows.

Mrs. Ed McKee, Mrs. Loney, Mrs. George Craighead and others made up a party that visited Union to pick cherries for home use the fore part of the week.

in farm near North Powder. What kind of rats is not specified and the promoter proposes for each person to give him a pair of rats and he will take care of them and will give the donor one-half of the profits. The only trouble we can think of is how to get the rats.

Mr. and Mrs. R. M. Shourds are back to North Powder again for an extended visit.

It is reported that North Powder will have a new doctor in October. Jake Simons, who is engaged in the truck garden business, reports that he has a fine garden and that he cannot supply the demand for fruits and vegetables.

The combines are already starting in to harvest the fall grain. It will be some weeks yet before the spring grain is ready for the harvester. The yield has been cut short by the dry weather and in some localities the grasshopper is eating the spring grain.

Mrs. Laughlin and family are taking their vacation this month. Some of the stockmen are turning their cattle on their alfalfa fields and letting them eat up the pasture rather than to take the trouble to cut the second crop. The cattle will soon be ready for the market and should bring top prices after being fed on such fine pastures.

Farmers are complaining of the scarcity of help and several are working with short handed crews. They seem to be plenty of men but some how farm laborers are lacking.

Mr. and Mrs. Dick Williams have returned from their vacation and have not seen any place they like as well as "home."

the hills that crops are threatened with destruction. In particular they are worrying farmers on Elk Mountain and on the Chesnimus. About 300,000 acres of the hills and heavy crop of grain are in danger for this year, which has been raised on his Chesnimus hills, and the hoppers are his only pest. If the insects seem likely to get the best of the crop, it will be harvested and put into the silos.

There is reason to hope that the days of the hoppers are numbered, as reports of those which destroyed them 200 years ago are much in evidence and are apparently gaining. This pest is a worm which hatches from an egg laid by a fly under the wings of the hopper. The worm works its way through the large insect's shell and lives on its host, which shortly dies.

SCATTERING HEAVY LOSSES

(Associated Press)
LONDON, July 19. (By Mail)—The shipowners of the world have lost 12,000,000 tons of goods as a result of the recent storm in marine freight. This is the estimate of "Shipping" in its annual survey of the shipping market.

A cargo steamer of 7,500 tons brought 60,000 pounds of March of this year, according to "Fairplay" when the freight market went to pieces, and today the same vessel would not bring more than 62,000 pounds. She cost 258,750 pounds in March, 1920, but only 53,000 pounds at the height of the boom in 1922.
