

WON OVER ALL THE HANDICAPS

The belated dedication of a monument to Dr. Elisha Kent Kane, once a famous Arctic explorer, is a reminder of an achievement quite as remarkable as anything that Kane did to add to the sum of knowledge of the polar regions. This was his mastery of physical handicaps which would have daunted ninety-nine men in a hundred. He was physically so frail that he was unable to complete his studies at college; he completed his medical education at home, became a surgeon in the navy, and while physician of the American legation at Peking began his career as an explorer which marked him for fame. It is less known than it ought to be that his polar researches, important though they were, constituted only a small part of his work. He succeeded in descending into the crater of the Taal volcano, though several able-bodied adventurers had failed; he fought Bedouins in Egypt; he crossed the island of Luron on foot, and he made an early study of Alpine glaciers in Switzerland. All this and more he accomplished before he died at the age of thirty-seven, sustained always by unflinching pluck and by determination such as few men possess.

MORALITY AT A DISCOUNT

Evidently Guide Had Learned Wisdom From Association With the Modern Business Man.

Attorney General Daugherty said at a dinner in New York:

"There's a certain class of high-class men—a very small class,—think goodness—whose honesty results in a fish story."

Two men with their guides were fishing for salmon in Lake Simcoe. The first man's bag of salmon was the smaller of the two, so he swiped a fish from the second man.

"But the second man caught him in the act. He had the nerve, though, to deny his guilt, and he refused positively to give back the stolen salmon."

"A pretty bitter altercation followed, of course, and it looked as if there would be a fist fight; but just as they were peeling off their coats the second man's guide—it was the second man who had been robbed, you know—the second man's guide drew him aside and whispered:

"Ah, let him have it, boss, let him have it. I got two of his."

Disgraced Genius. Even the art students are denied a little fun nowadays. Aspirants for fame were recently informed that for their year's competition for the Prix de Rome they could submit either "A Nude Boy" or a "Prometheus."

These themes seemed rather hackneyed to the ambitious mind of youths, and the students protested, pleading for some less banal test of their powers. The protest was ignored, and one of the students, in the exuberance of his disgust, proceeded to ridicule the decision of the authorities by himself posing as "a nude boy" in one of the windows of the Ecole des Beaux-Arts.

The Philistine residents in the Beaux-Arts quarter were much scandalized, and complained to the authorities of the school, with the result that as a punishment for the student's levity it has been decided to hold no competition for the Prix de Rome this year.—London Times.

Cause for Haste.

"We had a big argument last night, Esquire, about the real cause of the coal strike," began the village hore, upon discovering Esquire Ransbottom, the well-known jurist of Petunia, sitting in comfort in his back-titled chair in the shade. "Now, what is your opinion about—"

"Sorry, Esquire, but I haven't time to settle that for you now," interrupted the hore. "I just happened to remember that my niece told me to be sure to do something right away. I forgot whether it was one or the other. To make certain of being right I am going now and have both operations performed. See you later!"—Kansas City Star.

The Whipped Cream Age.

Old Charlie Hanson says:

As I rode out of Buffalo I observed three men playing poker in the club car—three tough political types.

When I arrived in New York I was thirsty and went into my favorite fountain at Grand Central. While I waited for the electric shaker to make my egg phosphate I heard in a gruff voice:

"Three chocolate sodas, please."

And in a gruffer voice came the remark:

"And give me plenty of whipped cream on mine."

I turned; I found the customers were my tough companions from the train.—Pittsburgh Leader.

Wireless Signals and the Aurora.

It is due to the observations of a scientist of Montreal that we now know to a practical certainty that wireless telegraphy may be affected by the aurora borealis.

This scientist describes three occasions, when the aurora was present, or in the brilliant weather associated with aurora, when his apparatus received dispatches over abnormal ranges. Singularly, the apparatus apparently affected by the aurora could receive but not transmit signals while the influence lasted.

Beautiful Tribute to Mother.

A mother was given to man to re-entice him to the loss of immortality for it is in her love that we find our life.—Louise Norton.

Still He Waves!

Marcel still rules the waves. The inventor of the famous curl is shown here on his seventieth birthday, celebrating the fiftieth anniversary of his invention.

ROADS MADE NATURALLY

(By the Associated Press)
EDMONTON, Alta., Nov. 2.—The research department of the University of Alberta has made excellent progress in developing a good road.

surfacing material from natural tar sands from the Fort McMurray district. A process has been developed whereby the asphalt can be extracted from the sand.
It is planned to carry investigations on during the winter, the university having secured twenty-two tons of the sands which will be reduced. With the four or five tons of asphalt obtained stretches of rural roads will be surfaced. If this surfacing stands the test, it is expected the development of the deposits will assume large proportions. Two tons of the sand have been

brought to Edmonton by the Dominion government and all those who desire an opportunity to experiment with them can obtain samples from the land office here.
The McMurray field comprises 750 square miles of tar sand deposits ranging to 180 feet in depth along the Athabasca river and its tributaries, according to a government engineer who recently concluded a special investigation.

One Thing Certain.
In law nothing is certain but expense.—Samuel Butler.

SHEEP COME EAST-OREGON

EUGENE, Nov. 2.—With the advent of autumn, sheep owners who have been grazing their flocks on the Cascade national forest preserve are now driving the animals

to their ranches in eastern Oregon, according to forest officials here.
Officials who have spent practically all of the summer in the national forest looking after the grazing of the herds on the public domain, state that the last flock crossed the McKenzie bridge a few days ago and that all the animals are now well on their way to their home ranches east of the mountains.

The Exposition Means Immediate State Development

YOU ARE ASKED to vote November 7 on a constitutional amendment authorizing the city of Portland to levy within the city a tax of one million dollars a year for three years to finance the proposed 1927 Exposition.

There is evidence that plans and purposes of the 1927 Exposition are not fully understood and this message is being published to give a more complete understanding and to gain state-wide approval of the Exposition plans.

¶ It should first of all be made plain that the proposed three million dollar tax to be levied in Portland is contingent upon the raising of a fund of one million dollars by private subscription—the men who are pioneering the building of the Exposition showing their own faith in a material way.

¶ The one purpose of the Exposition is the development of Oregon and Oregon resources.

¶ Oregon, twice the size of the state of New York and one of the richest sections of the world in natural resources, has less than a million population instead of the four or five millions which the state can easily support and which in turn would contribute to the support of the state.

¶ Oregon has fewer people than the city of Los Angeles.

¶ Oregon has only eight people to the square mile. California has 22 and Washington 20.

¶ Oregon is burdened with taxes and the one sure relief to the individual taxpayer is more people to develop more wealth to share the tax burden.

¶ Vast areas of Oregon soil, as fertile as the world contains, are untouched by the plow because the people of the world do not know of their fertility and opportunity.

¶ But these are facts we all know.

¶ We are all agreed as to the need of development in Oregon; now let us see what the 1927 Exposition can mean in bringing about that development:

¶ It is proposed that the 1927 Exposition shall be the central feature of a ten-year development plan for the state.

¶ The first essential of this plan is that the people of the East who can better their own conditions by coming to Oregon be made to know what Oregon can offer.

¶ It is planned, if the Exposition measure is approved at the polls, to begin, not later than 1924, a campaign of advertising which shall cover all the rich states to the east of us. This advertising is to appeal to farmers, stockmen, orchardists, manufacturers and tourists, telling each of these classes of the opportunities which Oregon offers them and inviting them to come and see for themselves. All this advertising will lead up to the 1927 Exposition, but it will be intended to attract not alone sight-seers but settlers and investors even before the Exposition.

¶ It is planned also to continue this development programme after the Exposition is ended and until 1934.

¶ It is proposed that the Exposition shall strongly feature the products and resources of Oregon, so that visitors will become interested in the state as a place for them to live and prosper.

¶ Each section of the state will be given an opportunity to benefit both by the preliminary advertising and by the Exposition itself.

¶ Railways will be asked to sell excursion tickets to the Exposition, which shall give the holders without extra cost a trip to other sections of the state which they may desire to visit.

¶ Each county in the state will be invited to participate in a carefully worked-out plan to direct attention to and create interest in all sections of the state.

¶ Those who sponsor the Exposition believe that these plans will insure a speedy and definite development of Oregon's vast resources by bringing together the entire energies of the state and by focusing attention upon the state.

¶ The welfare of every man, woman and child in Oregon is directly connected with state development. Adequate state development means increased prosperity, a better social condition, better markets, more comforts and conveniences, with reduced taxation.

¶ In the present condition of the United States and of the world at large, Oregon's state development will not come speedily unless well thought-out and aggressive plans are put into execution.

¶ The 1927 Exposition—as the concentration point of a ten-year development plan—is a definite, tangible movement for state-wide progress, and on this basis you can confidently give your approval to the Exposition measures to be voted on at the polls November 7.

Why the Exposition Has Been Set Forward From 1925 to 1927

The change of date from 1925 to 1927 has been made because it has been found impossible to build an adequate Exposition and to co-ordinate all its features in a general plan for Oregon development in the little more than two years between now and 1925.
