THESE THREE VITAL FACTS DETERMINE YOUR POWER AND ECONOMY

It's probably wear or inaccurate fit in the piston rings, pistons and pins which is responsible for the loss of power and waste of gas in your car. Power and economy really depend upon three vital units.

All that many motorists need to restore their maximum power and economy is MeQuay-Norris Piston Rings. There is one to fit every pocketbook, but car owners who think more of permanent economy and satisfaction than of initial cost find that the combination of Leak Proof Rings, sea power and stainless rings to prevent oil troubles is their best investment. All MeQuay-Norris Piston Rings are made of Electric Metal.

If the cylinders of your motor need reconditioning, you want a set of MeQuay-Norris Wainright Pistons and Pins, as well as MeQuay-Norris Rings. They are handled by the same repairmen, service stocks and jobbers.

Your motor can be made practically as good as new for a fraction of the cost of a new one if its three vital units are replaced with MeQuay-Norris Products. Write us for booklet "To Have and to Hold Power," which explains the whole subject of motor wear and its correction.
