

POWDER TO HAVE A BABY CLINIC

(Special to the Observer)
NORTH POWDER, Nov. 16.—The remains of Mary Harrison, a young daughter of Mr. and Mrs. Ira Harrison was shipped to North Powder from La Grande and laid to rest in the cemetery on Saturday afternoon. She was followed to her last resting place by a large number of her young friends, schoolmates and relatives. Mr. and Mrs. Harrison and family have the deepest sympathy of the community to their sudden and sad bereavement.

Miss Margaret Smith made a flying trip to Portland last week and spent two days visiting with friends. She returned to her school duties on Monday.

Election day passed off very quietly in North Powder. A large vote was polled and everyone seemed anxious to do their part in voting. Pierce ran away ahead of Oleott. The city election was largely attended and a large vote cast. People seemed to be interested in local affairs as well as in state issues.

Mr. Jenkins, the new M. E. minister is proving to be a live wire. He is arranging to have a baby clinic at the M. E. church on November 15. He is planning to have a meeting some evening in the week and have progressive farmers give talks. Everyone will be invited and you can come and get acquainted with your neighbor. This is a move in the right direction. Let us use our churches every night in the week instead of just on Sunday.

The football game scheduled to take place with Haines on Friday afternoon was postponed until Monday afternoon on account of the hard rain that we had on Friday, making the ground too muddy to play on. The boys will go to Haines to win and we are sure that they will. Up to the present time they have tied two games, won one and lost one. We feel sure that they will win this one. North Powder is proud of her football team. Mr. Elliott makes a fine coach and the boys are doing fine for so many beginners.

The game with Imbler was a tie. The weather was so cold that very few attended and those that did came very near freezing. Hot coffee and lunch was served for the opposing team by the high school girls after the game and was much appreciated by them.

John Luney is building a new bungalow in the east part of town. It is four rooms and a single is being used on the outside instead of siding. Mr. Luney will have a very nice snug little cottage when it is completed.

Mr. and Mrs. Chris E. Johnson made a trip to La Grande on Saturday.

Mr. and Mrs. Charles J. Law made a trip to Union on Saturday.

One of the grade girls had a fall Friday while playing in the basement on the concrete floor which may prove serious. She hit her arm and shoulder in such a way that she has broken it or has sustained a very severe bruise. On account of the swelling it was hard to determine which it was.

Mrs. May Moss of Portland and Mrs. Johnnie Martens of Union were in North Powder recently calling on old friends. They drove up from Union in their coupe.

Simes Cox of Tojoanet was in North Powder on Friday looking for a place to feed his cattle for the winter. He has several cows which he wishes to feed and is looking for a dairy barn to feed in as he will milk several of them.

Homer Bidwell has bought the pasture from Mrs. Violet Parker and turned in his cattle on her place to feed for sometime.

We had one of the finest rains last week that this vicinity has had for some months. It began raining on Thursday night and kept it up until Friday noon. Some snow fell with it but not enough for sleet. The weather has turned off warm and everything looks almost like spring instead of winter.

It looks as if high priced hay will not materialize as many were planning. Feeding sock cattle has not begun yet. At the price cattle is quoted it is almost ruinous for cattlemen to try to feed hay at the price it is held at now. Unless there is a decided change in the weather in a short time thousands of tons will not be sold.

A new home is being erected by Elmer Jacobson across the street south of Charles Hutchinson's home. It is a six room bungalow and will be a nice residence after it is completed. Mr. Jacobson is in the lumber business.

CINEMA OF NATURE.
OREGON AGRICULTURAL COLLEGE, CORVALLIS, Nov. 16.—A motion picture of natural history depicting the life and habits of the Oregon gray squirrel was recently purchased from H. M. Wright, assistant professor of zoology by the Kinco Company of America, distributors of the famous "Ditar" natural history pictures. A substantial sum was paid for the picture, part of which goes to Don K. Moreen, recently of the department of industrial arts, who completed all the photography work, reports Professor Wright.

"Facing the Music."
 The proverbial phrase "to face the music" is probably derived from the stage, where it was used by actors in the greenroom when preparing to go on the boards.

For Little Miss

The bloomer dress is highly popular for the little girl. One is made with a bib buttoning to the sleeve and the sleeve buttoning to the waistband for warmth. The bloomers, too, are detachable. The other dress has a girlish old-fashioned yoke. Its long sleeves recommend it for cold weather.

HAVE DARK HAIR AND LOOK YOUNG

Nobody Can Tell When You Darken Gray, Faded Hair With Sage Tea

Grandmother kept her hair beautifully darkened, glossy and attractive with a brew of Sage Tea and Sulphur. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Wychell's Sage and Sulphur Compound," you will get a large bottle of this old-time recipe, improved by the addition of other ingredients, all ready to use, at very little cost. This simple mixture can be depended upon to restore natural color and beauty to the hair.

Well-known druggists say everybody uses Wychell's Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and beautiful.

Denatured Alcohol is the Best to PREVENT FROZEN RADIATORS

We have percentage tables to insure you the correct proportion for any temperature. Don't waste alcohol, but be assured of a non-freezing solution, scientifically proportioned.

THE L & L DRUG CO. EXCLUSIVELY

PEACE TORPEDO DOES NO HARM

TACOMA, Wash., Nov. 16.—Tacoma's system of protecting the piles at its large waterfront here from the deadly torpedo is attracting attention from all over the world, according to Leslie Jensen, an engineer for the port commission.

"A lecture was given in London recently by the chief engineer of the Blue Funnel line on this type of construction," Mr. Jensen said, "and the Cunard Steamship company and the Seaboard Airline Railway company are investigating our experiences with the possibility that they will adopt the plan."

Mr. Jensen explains that the type of pile used here baffles the torpedo, the tiny, worm-like animal that quickly destroys wood when placed in salt water. The method is to coat all piling with reinforced concrete, "shot" into the wood with a special cement gun.

It is the opinion of Mr. Jensen that if green piles with the bark only recently removed, are treated, they will withstand the torpedoes perfectly. The port engineers have recently perfected their methods of treating the great stacks of timber so that practically every pile comes out of the process in perfect shape and ready to use.

Mr. Jensen predicts that in the future all piling for docks, trestles, warehouses and other structures in salt water will be given the torpedo-proof treatment because of the saving it will effect.

CHINESE STUDENT, OREGON AGRICULTURAL COLLEGE, CORVALLIS, Nov. 16.

Kim Moy Yap, a Chinese student from Portland, is taking a pre-medical course that she may go to the aid of her people in Peking, a city of more than 30,000 persons having only three professional doctors. Ngim On Yap, the O. A. C. student's

father, a wealthy progressive Chinese, appreciated the need of more doctors in his city and when two American teachers offered to take his daughter with them to America that she might study medicine, he consented.

Tower of Babel.
 The tower of Babel is the tower spoken of in Genesis as being built by mankind after they came down from the ark to the plain from the mountain of the east. It was like the later temple tower of Babylon, except that it was being constructed so high that its top might reach Heaven. The builders were miraculously prevented by the confounding of their language. Thus the origin of our many tongues.

The word "pandemonium" was coined by the poet Milton.

No English sovereign has ever died in the month of May.

Mosquitoes and other pests are gone, and we have with us now the chap who forgets to close the door behind him.

For Sale

A modern 160-acre farm, five miles north of Island City, near the town school, 80 acres of best land in the Valley in cultivation, 40 acres irrigated, 80 acres of fine timber pasture, 8-room modern house, with electric lights, hot and cold water, bath and toilet, large barn and other farm buildings, all in good condition. Delectable lighting system which furnishes lights for the house and all the other buildings. Water system of flowing spring water piped into all buildings, and a private sewer system. Telephone and R. F. D. Price, \$12,000, \$4,000 Federal loan against it. Will take a good modern home in La Grande as part payment.
