NEW MAXWELL IS ON DISPLAY

Maxwell Club Coupe On Display in Show Room of C. W. Bunting & Son.

The latest product of the Maxwell Motor corporation is now on display in the show room of the C. W. Bunting & Son, local Maxwell dealers. It is the new Maxwell club coupe, a two-passenger enclosed car of prepossessing beauty, which displays a number of very obvious features unusual in a car of this type.

The club coupe made its initial bow to patrons of the New York closed car show in September, where visitors pronounced it the most advanced model of the light, two-passenger enclosed car yet developed.

Quarter windows which drop full length in substitution of the solid fabric-covered rear quarter sections generally incorporated in the design of the two-passenger coupe, form a notable feature registered in this latest Maxwell product. These windows, together with the rear light which is of large, standard coupe type give unobstructed vision in all directions, adding greatly to the pleasure and safety of driving. The seating space is positioned as in the good Maxwell roadster with the added advantage to riding qualities of greater weight and an almost even distribution of weight to the four wheels. Unusual comfort and remarkable roadability are claimed for the car.

Correct ventilation, a matter of real importance in the enclosed car of small passenger compartment space is another feature of noteworthy interest. The extra quarter windows, alone, are not responsible for improved ventilation, it is explained; the use of the standard Maxwell closed car windshield is the factor which is emphasized by the company. It is a windshield of the double ventilating type but is of original design and is used on no other make of car. The complete control of ventilation is made possible by its use. An added feature is found in the fact that this windshield is firmly set all around in a rubber, making it water tight and rattle proof.

The exterior beauty of the car is equalled by the luxury of interior appointments. Seat and back-rest are upholstered in genuine leather. The upper section is covered with attractive broadcloth in contrast with the prevailing glossy trim of cars of the type. Hardware of the new satin finish, is substantial and attractive. Yale door locks, heavy, rear window curtain, rear vision mirror, windshield wiper, windshield visor, floor carpet and ventilating type of heater for the very complete equipment of the club coupe.

A very large deck compartment in the rear is equipped with Yale lock, and while another deck compartment for qualified to practice law.

TWELVE THOUSAND MILES BY AUTO is a trip long enough to scare out many men, but Helen and Jean Douglas, Atlanta, Ga., society girls, didn't back down. They are just entering the last ten of an auto tour of the nation, traveling alone, making their own repairs and camping out as they go. They've had some real adventures, Helen's the upper case.

parade is located inside, immediately back of the rear seat. All in all, the new Maxwell club coupe is ideal for any man or woman in need of a small closed car in any type of service.

SETTLING THE WIT. "Will you settle a bet for me?" asked Jinks. "Sure," replied Binks. "What's the bet?" "I made a bet with Winks and lost \$50," replied Jinks. "Well, him for a check for the amount, will you?"

In the whole of England there are but a dozen women who are qualified to practice law.

TWO REPUBLICS STILL FRIENDS

(By Associated Press)

STOCKHOLM, Nov. 1. (By Mail)

An illustration of the law of historical affinity is seen in the growing "approachment" between Sweden and Estonia and Latvia, the newly created republics on the Baltic coast. These two republics were largely settled by vikings about one thousand years ago, and in the time of Gustavus Adolphus swore allegiance to the Swedish crown. They were under Swedish rule for one hundred and fifty years until 1710, when they were conquered by Russia. But the Letts and Estonians still speak of the "good old Swedish times." This tradition of kinship with Sweden now expresses itself in constant attempts to get closely together culturally, politically, and financially.

Thus the University of Dorpat in Estonia, founded by Sweden in 1622, has just added the sixth Swedish professor to its faculty, and various courses in the Swedish language are being given. Meanwhile groups of teachers and pupils, farmers and others are coming over to visit Sweden.

The Swedish people were among the first to encourage these republics in their hard fight for national existence, and they have sent over relief expeditions to work among the inhabitants left destitute by the many years of war and the suffering through many centuries of almost servitude under the rule of the local nobility of German descent, the "Baltic Germans," and under the Russian czarist regime.

Trade relations between Sweden and the new Baltic states have developed rapidly since the war, and a number of steamship lines are now maintaining regular service between Riga, Reval, and Swedish ports.

That the granting of suffrage to women has deprived them of the right to any special legislative protection, is the ground taken by the Court of Appeals of the District of Columbia in its decision against the minimum wage law for women.

Mad splash guards are the very latest. Movements are on foot to prevent the ruin of pedestrians' clothes and this is one of the mad splash guards which may save frock and suit in wet weather.

Mrs. Helen E. Crockett, the first woman to hold public office in Henry county, Ohio, won the county clerkship by a margin of three votes.

ARTHUR H. MEYERS MANAGER

AGED ENGINEER TO RETIRE NOW

WALLA WALLA, Wash., Dec. 2.

Orlando Godfrey, 71-year-old veteran locomotive engineer of the North Pacific railroad company retired to private life on a pension from his company Nov. 30, when he drove his engine off the Walla Walla-Pasco, Wash., run into the local roundhouse.

With his retirement Godfrey carried with him memories in his 51 years of experience in the cab of a locomotive, of the time when rifles and ammunition were carried in the cab of every engine for protection from the redskins of the old west.

Godfrey began his railroad service as a brakeman on a local run on the Erie line in New York in 1866, when he was only 15 years old. He was made an engineer in 1871, having come west as a wiper and after three years before. Since then he has served continuously with various western railroads. He came to Walla Walla in 1898 to accept service with his present employers and has remained here ever since.

NELSON'S FLAGSHIP TRAVELS BY LAND

LONDON, Nov. 4. (By Mail)

An effort is being made in England to raise \$500,000 for the preservation of the Victory, Nelson's flagship in the battle of Trafalgar.

The famous vessel is at present at Portsmouth, in a very bad state of repair. So far has she deteriorated that, if it is decided to bring her to London, she will have to come overland; she could not undergo the journey by water.

Miss Carolyn Virginia Plattner, an energetic American girl, has sailed for Rio de Janeiro, where she will establish a billiard academy for women.

Through efforts of the clubwomen of Jacksonville, Florida, 4,000 half pint bottles of milk a day are served to the school children of that city.
