

To All Users Of  
**ELECTRICITY**

We Are Facing the Most Serious Water Shortage  
In the History of the Company.

WE CANNOT COUNT ON ANY REAL RELIEF BEFORE MARCH 15,

We feel that we could not have been reasonably expected to foresee this condition and provide against it. We are going to tell you more about that later on,--give you the inside facts and tell you our plans for the future.

We are doing everything that money can do to keep the wheels moving,  
But We Can't Buy Water.

YOU Can help Us and Yourself by Economizing in the Use of Electricity.

**Save Electricity**

You May Think What You Individually Save Amounts To Little,  
BUT CONSIDER THIS--

We have about 5,500 consumers in Baker, Union and Grant counties. If each consumer could save *One Kilowatt-Hour Each Day* the total saving would amount to more than TWICE the DAILY OUTPUT of our Cove and Morgan Lake Plants at the present reduced capacity.

Each of you cannot save a kilowatt-hour a day but every little will help. A lamp or two less--a half hour's less use of your equipment--Any Saving of  
Any Kind Will Count

**Save Kilowatt - Hours**
