Los Angeles Church Is Awaiting Mosaic Panels

LOS ANGELES, Jan. 18.—The new First Methodist Episcopal church here is awaiting the arrival from New York of three mosaic panels said by artists and critics to establish a precedent for handling and color. The panels, the work of Louis C. Tiffany of New York, are eight by sixteen feet and represent, pictorially, the scenes "The Descent from the Cross" and "The Resurrection."

These are panels, it is said, differ from anything yet produced in mosaic in that they are executed entirely of translucent glass, which possesses a simplicity and radiance unknown in mosaic. The placing of mosaic panels in a Methodist Episcopal church is said to be an innovation.

A medicinal preparation that has real curative value almost sells itself, as like an endless chain system, the remedy is recommended by those who have benefited, to those who are in need of it. A prominent druggist says, "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale." According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it relieves almost every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.
