THEATRES

"FORGET-ME-NOT"

"TO-DAY AND TO-MORROW"
"It is more important to empty the orphanages of the country than the jails."

This is the belief of Bessie Love, the young screen actress whose role in "Forget-Me-Not" at the Sherry Theatre this week, is that of Anna, an orphan girl. Having spent two weeks in an orphanage, and a well-conducted one, in Los Angeles, before taking up the work of appearing as an orphan, Miss Love speaks with the authority of experience.

"I don't mean that children are treated unkindly in institutions. There undoubtedly are instances of harshness, but during the two weeks when I was an orphan, to all outward appearances, I found unflinching consideration."
"But one thing that struck me was that there was, and could be, no lavishing of affection upon the children by an individual. And that, to me, seems depriving a child of one of the most important bulwarks of morality. The memory of mothers keeps more people straight than any other force in life. Mechanical kindness cannot compensate for it. And on that account, I believe that the task of the social worker should begin with the orphanage rather than with the reformatory and the jail. Let's get the children into homes where there's love to spare, and there'll be less occasion for the regeneration of adults."

BRINGING UP FATHER ON HIS VACATION

The latest adventures of Jiggs Mahoney, of "Bringing Up Father" fame, will have a chance of thorough vent at the Arcade Theatre tonight. The play, based on the internationally-renowned cartoon of the same title by George McManus, bears the whimsical caption of "Father On His Vacation." From the name alone one may deduce the fun, privation, mental and physical disturbances, turmoil, strife and domestic infelicity in store for the devoted Jiggs. How he intends to extricate himself from all this mess and unfettered existence may be ludicrously imagined. Suffice it to say that it should provide one of the best entertainments of the season and withal the most diverting and original.

GRITTY GIRL IS ALICE
BRADY IN "ANNA ASCENDS"
Star As Heroine Falls Band of Gem Smugglers With Trilling Results.

When the Russian nobility were killed or forced to flee their country in the revolution their rich jewels were the first property looked for by the assassins. Many of the treasures were smuggled into other countries, and it is a plot to sneak a shipment of the jewels into the United States that brings an exciting adventure to Alice Brady in her role of a Syrian girl in "Anna Ascends," her new Paramount picture which will be the feature at the Arcade theatre Saturday only. In addition to adventure, Miss Brady finds thrilling romance thru her meeting with Howard Fisk, a newspaper reporter, who is following up a tip on the jewel plot. Anna,

who is an ambitious immigrant girl, quickly learns to love Howard, as he does her, and they work together to foil the smugglers. Robert Ellis plays the part of Fisk and the roles of the smugglers are portrayed by such capable players as David Powell, Nina Naldi, Charles Gerard and Edward Durand. Others in the strong cast are Florence Dixon, Grace Griswold and Frederick Burton. Miss Dixon believes she is the most photographed girl in the United States.

The picture, which is an adaptation of Harry Chapman Ford's play of the same name, is a particularly suitable screen vehicle for Miss Brady as she also had the star role on the stage. In it she made a hit. The adaptation was done by Margaret Turnbull and the picture was directed by Victor Fleming. Gilbert

Warrenton, who photographed "Hui-moresque," was the cameraman.

Where thickness of a Hair Equals a Mile

THE hair of a human head averages from two to three thousandths of an inch, and if motor service shop work is based on accuracy so coarse as a "hair's breadth," only poor results can be obtained.
Automobiles may be designed alike, and look the same, yet one, because of precise fits, has more power, speed and less vibration. When pistons and cylinder bores are held to limits of one thousandth plus or minus, it means that often a piston .001 undersize goes into a bore which is .001 oversize; and, in case of a three-inch piston, instead of having a wall clearance of .003 .001 for each inch of piston diameter) it has .005 and becomes an "oil-pumper"—an error of less than an average hair's breadth, yet, the results could have been no worse had it been a "mile."
Avoid errors as broad as a hair and for closely fitted pistons and perfectly ground cylinders have your repairmen bring your cylinder block to us for regrounding and piston assembling.
