TWO BOYS HOLD COON BARBEQUE

THE PARK, Feb. 23.—Laurel Lay called up his friend, "Little Jack" Hunter, inviting him to a grand barbecue. The kids had a swell feast, consisting of two coons for meat, supplied with everything else needed for a sumptuous meal.

Laurel and his little brother are quite handy on trapping, having caught coons, muskrats, muskrats, bobcats, and coyotes.

Clarence Vanorder went to the Springs Monday of this week to deliver a dressed hog to George South. Kenneth Vanorder reports that he has two horses on the sick list.

Ed Gillespie was somewhat indisposed, being quite sick with stomach trouble during the night Sunday, but Monday morning was feeling much better.

L. J. Foster was in Union on business Monday this week.

John Shores, who is taking care of the Rock ranch at High Valley, reports that the snow is nearly all gone. He also states that everything is in a splendid shape up in High Valley.

Henry Shores is cutting cord wood at Badger Flat. The snow there is about two feet deep.

J. L. Rush of High Valley, is logging in Ladd Canyon.

Francis Godsey is going around by Baker to visit her sister and brother-in-law, Mr. and Mrs. Art McMurdoch on Lower Powder.

Roy Jones went to Union on business Monday of this week.

Mrs. Ed Gillespie reports that her little family is well and over their spell of sickness with the exception of her husband, who is not seriously ill, but feeling well enough to work.

Mrs. L. J. Foster reports that she has tomato plants coming up in fine shape. She also states that her and Mr. Foster are in excellent health now.

Urania Hunter reports that she likes her new place quite well on the lower ranch of Ed Miller, where she is helping Mrs. Richardson, who is cook for the several men working at the lumbering sheds.

Al Emmons, a well known camper of this vicinity, is at the Miller's lower ranch.

Fred Perkins, an old time camper, who went to Portland a couple of years ago, is back into God's country again. He is employed at Miller's sheep ranch.

Joe Backer, who tended camp for Mr. Howell of Eagle Valley, having his sheep on Catherine and Buck creeks, is now employed at Miller's sheep plant.

Ida Hunter reports that Mr. and Mrs. Cedric Gale are now ready to announce to their friends, the visit of the stark sometime ago, leaving them a 73 pound baby girl, which they at once named Julia Louise. Mother and baby are in excellent condition and spirit.

J. W. Lay, the mail man, was on the sick list the latter part of the week.

Due to a violent drifting of snow in the road, the mail missed making its regular trip on the same day for the first time this winter.

Clayton Lay was handling the "tribbles" on the mail route in the place of his father, who was sick.

Mrs. Ida M. Hunter received a letter from her sister, Mrs. Gertrude Murphy of Fresno, Calif., stating that they had quite a bit of cold there, even having ice.

This is the time when there is not much doing around here—only feed the chores, and wait for Mr. Weather man, and see what he will decide. But all is well and in good shape.

TIRES DO VAST AMOUNT OF WORK

"Few people seem to realize what a vast amount of work is actually performed by tires," declares the Oregon Hardware and Implement company, the local Diamond distributor. "If they did, no doubt they would consider a little more consideration for them in the way of care."

"If a 32x1 inch tire on a rear wheel of a car carries a load of 1500 pounds while it is driven 10,000 miles over an average grade of 4.7 per cent, the work it has to do is about 2,250 horsepower hours. This amount of work will lift the Washington monument twelve feet."

"If one takes the total power of this automobile and estimates that approximately 10 per cent of that power is transmitted to the rear wheel to be expended in pushing the machine against the wind, up hill, over bumps and ruts and around corners, he cannot fail to be impressed by the average tire's tremendous resistance to wear."

"Rubber compounds in the tread and carcass of a Diamond cord tire must be both their own lubricant and their own adhesive. The flexing of a tire on the road means that certain parts of the tire are moving separately from others. This helps friction and the proper compounding of the rubber reduces that friction to a minimum. The compounds also mold the units of the tire together as an integral and at the same time be strongly resistant to the deteriorating effect of the friction and the wear of the road."

"The rubber chemist has discovered the science of mixing rubber to produce the best results for the motorist, but the latter can raise the service possibilities of his tire by following the common rules in tire care."

"We saw a funny Palm Beach picture of three women the other day. They had on clothes."

"The bilious and dyspeptic are constant sufferers and appeal to our sympathies. Many such, however, have been completely restored to health by the use of Chamberlain's Tablets. These tablets strengthen the stomach, invigorate the liver and improve the digestion. They also cause a gentle movement of the bowels. When you have any trouble with your stomach, give them a trial."

The regular doctors are plainly not enthusiastic about the Cough cure system, but we wish to point out one feature of it at least in which it beats them—if it fails to do any good it costs us nothing.

The muscles of the human jaw exert a force of 534 pounds. The amazing thing is how some choice steaks resist that force.

Chamberlain's Cough Remedy Aids Nature.

Medicines that aid nature are always most effective. Chamberlain's Cough Remedy acts on this plan. It allays the cough, relieves the lungs, aids expectoration, opens the secretions and aids nature in restoring the system to a healthy condition. Thousands have testified to its good qualities. Try it when you have a cough or cold. Adv.
