Have Kidneys Examined By Your Doctor
Take Salts to Wash Kidneys if Back Pains You or Bladder Bothers
Flush your kidneys by drinking a quart of water each day, also take salts occasionally, says a noted authority, who tells us that too much rich food forms acids which almost paralyze the kidneys in their efforts to expel it from the blood. They become sluggish and weaken; then you may suffer with a dull misery in the kidney region, sharp pains in the back or side, headache, dizziness, your stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.
To help neutralize these irritating acids, to help cleanse the kidneys and flush off the body's urinous waste, get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then get fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithium and has been used for years to help flush and stimulate sluggish kidneys; also to neutralize the acid in the system so they no longer irritate; thus often relieving bladder weakness.
Jad Salt is inexpensive; can not injure, and makes a delightful effervescent beverage. If all means have your physician examine your kidneys at least twice a year.
