against dark plain material which serves as a foil.

Angkor Favorite Material London—Among the bordered goods which fashionable women prefer for wraps, sport clothes and afternoon frocks today is angkor. This is of fine wool, often creamy in shade with woven pattern of huge proportions in both borders and bands.

Hat, Bag and Scarf Match London—The very latest fad today is to have hat, bag and scarf match. The hat for example may be of leaf green taffeta embroidered in silver. The wrist bag will be of the same material while the scarf may be green and silver changeable silk.

Camisole Knicker New York—A new thought in lingerie today is the camisole knicker. It is made of georgette and lace or of lawn and lace—the latter more fashionable just now. The knickers are cut very full and have side panels made up of knife plaiting.

Green Hats in Favor New York—Green hats are in high favor for these bright spring days. They may be seen in straw of various sorts. They are effective likewise in silks and ermines. And they are perhaps at their best in sports models of leather, which match green kid shoes.

Little Cape for Coat Frock. New York—The coat frock today is very sensitively accompanied by a little cape, matching it in color and material. The little cape hangs just below the hips and is a nonchalant garment, tied with a cord at the neck and allowed to slip off one shoulder.

Rows of Tiny Tucking. New York—Many rows of tiny tucking form a trimming reminiscent of other days and fast coming into renewed vogue today. The tucking is not seen merely on frocks of organdy or voile. It occurs also on costumes of foulard, marquis and the other pliable silks.

DEAF AND DUMB ARE NOW BEING TUTORED

(By Association Press) SPOKANE, Wash., April 21.—Transported to a land of absorption, how would one learn their language? Just such a task, magnified many times, is being undertaken day after day in Spokane by a group of 14 children. These children, all but two of them deaf and dumb from birth, are undertaking to understand ordinary conversation through lip reading and to actually speak words which they have never heard. In their classes at the Horace Mann school, under the direction of Miss Vera Wilson and Miss Edna Davis, eight boys and six girls are given daily instruction along the same lines as that given children in other public schools of the city. Not only the elemental subjects are taught, but music, folk dancing and other studies which heretofore have been regarded out of reach of persons who cannot hear.

COLLEGE BUYS ROYAL CATTLE

CALGARY, Alta., Apr. 21.—Purchased Shorthorn cattle from the Prince of Wales' ranch near High River, Alta., have been purchased by the University of Idaho. The cattle will be shipped to Moscow, Idaho, where they will be used for breeding purposes at the state agricultural college.

Cattle experts from the university who made the deal with W. L. Carlyle, manager of the prince's ranch, stated that the animals were the finest lot of Shorthorns they had ever seen. The purchase by an American university of the prince's stock is regarded by cattlemen here as a tribute to western Canadian cattle breeding.

Prince Edward established a ranch three years ago on a visit to Canada. He began stocking it two years ago when he sent out a shipment of Shorthorn cattle, Shropshire sheep, thoroughbred race horses and Dartmoor ponies. Since then he has sent out other consignments to augment his herds. The animals have been exhibited at fairs throughout western Canada and have carried away many first prizes. Shorthorns from the ranch offered at an open sale in Calgary early in the winter brought top prices.

The prince's stock has been drawn from the best breeding establishments of Great Britain. His ranch is said to be one of the show places of western Canada, and is close to the famous Bar-U ranch owned by George Lae, considered one of the greatest breeders of Percheron horses in North America.

The Infinite Variety of Diseases

Brothers in the same family, even twins are seldom afflicted with the same pains or bodily weaknesses, and the reason for this is simple.

The backbone is the foundation of health or its disorders the cause of disease. There are 24 movable joints in the backbone and between joints on each side are nerve openings. When there is the slightest degree of displacement of any of these joints, or several of them, there is nervous weakness and disease. Spinal adjustments restore nerve freedom and ease. Health naturally follows. Have your spine examined by

Fashion Notes

White Kid Sport Coat Paris—Among the things which one bride included in her trousseau today was a sports coat of white kid. This was hip length, extremely chic in cut and had the virtue of being easily cleaned.

New Kind of Braid. Paris—An extraordinary new material today is the decoration much in the manner of soutache braid with cochin-china patterns on it. The braid-like material is cut out and looks a good deal like hysteryptiles. It is in brilliant colors and is placed
