**Cold Wave Hits France.**

PARIS, June 20.—Extreme cold weather for the season is reported in various parts of France. The thermometer fell below the freezing point at Charolais, department of Saone-et-Loire, and the crops are ruined. Chambers, department of Savoie, reports a heavy snowfall. In some sections sheep recently shorn are dying from exposure.

**British Weather Cool.**

LONDON, June 20.—Although it is past the middle of June the country has been in the grip of a long spell of cool weather and many a British bonneted gatherer around the fire at night as if it were the Christmas season. Even in the south of England frosts are reported in the early morning hours, working havoc with asparagus and fruit crops. To make matters worse, there appears to be no immediate change.

Getting sophisticated is just a slow process of eliminating the things you can enjoy.
