

ZEPPELINS MAY SOON OPERATE ACROSS OCEAN

(By Associated Press)
LONDON, June 20.—Details of the first Atlantic airship service between Spain and Argentina have just been made public by the London Daily Chronicle, which says that it may soon be possible to bridge the 5,000 miles between the two continents in three and a half days. The service will operate between Seville and Buenos Aires, and Zeppelin aircraft will be used.

There will be terminal airframes, mooring masts, repair sheds, and hydrogen factories at Seville and at Buenos Aires. In addition, emergency landing grounds will be laid out at the Canary Islands and at Cordoba, in the Argentine.

On the American side of the Atlantic the hangars will be made on a revolving principle, because of the variability of the wind. Four airships are being built to inaugurate the scheme, and it is anticipated that service will begin next summer. It also is probable that arrangements will be made to link up Seville direct with London by an airplane service.

The airships, fitted with nine engines, each developing 400 horsepower, will carry 40 passengers and 11 tons of mails and merchandise. There will be two simultaneous flights a week in each direction, and the time taken to cross the Atlantic will be three days and 16 hours. Passengers will have all the comforts of an Atlantic liner, without the disadvantage of sea sickness.

The ships will have a speed of 82 miles an hour. Zeppelin pilots who have not less than 1,000 successful flights to their credit will be engaged to operate the craft. Each airship will carry six pilots and a commander.

Powerful wireless sets will be fitted into each ship, thus it will be possible to keep in touch with 45 weather stations on the coasts of Spain, Africa, America, the Canary Islands, Cape Verde and Fernando Noronha, as well as with ships at sea.

DEPICT TEMPLE FALL

(By Associated Press)
LOS ANGELES, Calif., June 20.—A pyrotechnic spectacle depicting the fall of the ancient empire of the Aztecs will be one of the features of the program of pageantry to be presented in connection with the Monroe Doctrine Centennial and Motion Picture Exposition to open here July 2nd.

TREASURE IN PETROGRAD

(By Associated Press)
LONDON, June 19.—A field marshal's baton has been discovered buried in the masonry of one of the columns of the Petrograd Vvedensky Cathedral, near the steps leading to the altar. It is made of solid gold and adorned with 110 large diamonds and emeralds. Its value is said to be \$2,000,000.

For Sale

Five-room plastered home, electric lights, city water, garage, lawn, trees, large lot 50x120. Price \$1,785.00; terms, \$200.00 down and balance at \$25.00 per month.

Five-room modern home, close to school and shops. This property has a garage, lawn, screened-in porch, both front and rear, completely plumbed and wired. Price, \$1,300.00. Terms on balance.

Five-room home, large lot, located on the east end of Adams avenue, just outside of city limits. This place is new and the price and terms are right.

Four-room home, modern, paved street, lot 60x110, garage, part basement. Price, \$1,000.00; terms.

If you are expecting to build this spring, come in and let me show you some of the choice building lots I have listed.

Not a Kiss of Friendship

These two giraffes kissed by accident, rather than by intention. Mrs. Howard Felch climbed their corral at the Bronx Zoo, N. Y., to offer a dainty morsel and both reached for it at the same time.

Correct this sentence: "Honest. A trainer says an ape tires of any- Ma," said the small boy, "I'm goin' thing when it becomes accustomed to Sunday school: I just happened to it. There may be something in that have them fish worms in my pocket." Darwin theory.

POSTAL CLERKS MAY ASK WAGE INCREASE

EL PASO, June 20.—Dust stirred by Don Juan Onate on his way to settle Santa Fe more than three centuries ago will be on the heels of delegates here to attend the National Federation of Postoffice Clerks' convention September 3 to 7. Every state in the union will be represented.

Congress may be asked to increase the pay of postoffice clerks, if the high cost of living does not go down in the meantime, according to officials of the federation who are here making arrangements for the convention. Other legislation which will come up for endorsement includes:

Credit for one hour for each 45 minutes worked at night.
Double time for Sundays and holidays.

An annual vacation of 30 days.
Although the federation now has seven vice presidents, it is claimed the rapid growth of the organization demands the addition of from four to eight more, and this question will be voted on. Under the present rules the large cities, such as New York and Chicago, are entitled to a maximum of five delegates and as many votes, while a postoffice with half dozen men may have one delegate and one vote. The larger cities are asking for a different basis of representation.

Recommends Chamberlain's Tablets

"Chamberlain's Tablets have been used by my husband and myself off and on for the past five years. When my husband goes away from home he always takes a bottle of them along with him. Whenever I have

that heavy feeling after eating, or feel dull and played out, I take one or two of Chamberlain's Tablets and they fix me up fine," writes Mrs. Newton Vreeland, Minoa, N. Y. Take these tablets when troubled with constipation or indigestion and they will do you good.—Adv.

The Republican party's showing in the next election will tell us whether the whole is equal to the sum of its parts.

Non-Detonating Gasoline Works a Full Stroke

Gasolines explode in two ways. One kind explodes with a crash. It *detonates*.

The piston receives but a single smashing impulse for each stroke. The power of the explosion is over before the piston is half way down the full length of its stroke.

Due to the tendency to explode prematurely, *detonating* gasoline limits compression in your cylinders.

It causes much of the "knocking" you notice on hills. And the repeated crashing blows increase vibration, thus increasing wear and tear.

The Sustained Explosion

The explosion from Union Gasoline is of the *other kind*. It is sharp but sustained—non-detonating. It gives impulse to the piston for the *full length* of the stroke.

Power and efficiency are increased as a result of increased compression, because, as all authorities know, non-detonation permits added compression.

New Speed

This added smoother power means a new "lift" on hills. You take grades with a rush. Your motor doesn't "knock."

There's more snap in your pickup and new speed on the level.

Vibration is reduced, which saves wear and tear. Fuel mileage is increased due to better efficiency all around.

So there are ample reasons for selecting Union *Non-Detonating* Gasoline.

Union is the product of progressive refining methods. Its quality is governed by exhaustive tests. The research of able engineers and chemists, equipped with every accepted facility for studying refining methods, is constantly devoted to its improvement.
