## Doctors Urge Mothers To Nurse Their Babies

SAN FRANCISCO, June 28.—Animals care for their young today the same as they did centuries ago. Observe the genus Homo machine astray. Dr. M. L. Turner of Des Moines, Iowa, told the specialists in disease of infants and children at the annual session of the American Medical Association here today. These words preceded an impassioned plea for breast feeding as the best method for the good of the race, and Dr. Turner urged physicians to adopt the information gathered from observation of animals to induce mothers to nurse their babies.

Dr. Walter F. Winholt and Professor E. O. Jordan, of the University of Chicago, told how babies catch cold. Their facts were based on a study of 500 with and 500 without colds, and it was shown that the occurrence of colds in infants is usually accompanied by a high proportion of colds in the other members of the family. This fact causes the doctors to believe that colds are caused by a widely disseminated infectious substance and of low infectivity, and that the incubation period, or the time required for this infecting substance to cause a cold, is very short.

The effects of colds in babies are more serious than in grown persons; particularly because they tend to derange the digestion and other functions of the body, the physicians said.

## Have Kidneys Examined By Your Doctor

Take Salts to Wash Kidneys if Back Pains You or Bladder Bothers

Flush your kidneys by drinking a quart of water each day, also take salts occasionally, says a noted authority, who tells us that too much rich food forms acids which almost paralyze the kidneys in their efforts to expel it from the blood. They become sluggish and weaken; then you may suffer with a dull misery in the kidney region, sharp pains in the back or side, headache, dizziness, your stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To help neutralize these irritating acids, to help cleanse the kidneys and flush out the body's urinous waste, get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate sluggish kidneys; also to neutralize the acids in the system so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive; can not injure and makes a delightful effervescent lithia-water drink. By all means have your physician examine your kidneys at least twice a year.
