LOST—Pair of large tortoise shell glasses. Leave at Observer. Reward. 7-14-tf.

THEATRES

DANCES THE HULA HULA

Betty Compton, Star of "The White Flower," Leaves Art Twice.

Betty Compton learned to dance the hula hula and then had to learn all over again! En route to the Hawaiian Islands to film her latest Paramount picture, "The White Flower," which comes to the Star Theatre Thursday and Friday, the star took daily lessons in the art of hula hula dancing as instructed in the United States, and when the ship docked at Honolulu she learned that the dance she had so painstakingly mastered wasn't danced by the natives at all! So Miss Compton, who plays a half-caste girl in the story which Julia Crawford Ivers wrote and directed, was forced to forget all that she had learned on shipboard and start all over to master the real Hawaiian hula hula. That she succeeded is proven by the enthusiastic reception given her dance by the highly critical Hawaiian populace. The supporting cast includes Edmund Lowe, Arline Prevy, Leon Barry, Sylvia Ashton, Edward Martindel and Arthur Hoyt.

SHERRY'S LAST DAY "DOLLAR DEVILS"

"Thrills and Thrills," "Dollar Devils." Those who believe in fate play even in a film which will appreciate the unique bout which is staged in the Victor Schertzinger production "Dollar Devils." Unlike most fight scenes, in which the villain receives his just deserts and is eventually hammered to a fare-thee-well by the hero, this particular villain receives a more than fair opportunity to prove his ability as a fighter. Even a referee is not lacking. Joseph Dowling, who plays the role of old Zannon Carthy performs the referee's duties in this thrilling encounter, and calmly smokes his corner pipe while the participants clump and pound each other.

Cullen Landis, who portrays the long suffering hero, displays a rare sense of fair play, despite the fact that the villain has sneered at him, ridiculed him, and even stolen his girl.

Hatlam Cooley, who enacts the role of the villain in the person of one Bruce Merlin, a notorious crook, is about to skip town with Landis' money and girl. That is enough to make anybody sore, and Landis is no exception. Merlin is accordingly kidnapped and taken to a lonely house, where he is forced to fight. Everything is done in regulation fashion, Zannon assumes the role of referee, and after the villain is permitted to strike the first blow, the fight is on. The battle wages fast and furious, with the advantage first on one side and then on the other. Right, however, eventually prevails, the villain is vanquished and the referee counts him out.

Also Showing A "Fighting Blood" Story. Example of zero in enthusiasm: A wheat farmer's fierce pride in the Leviathan.

RED PEPPERS END RHEUMATIC PAINS

When you are suffering with rheumatism so you can hardly get around just try Red Pepper Rub and you will have the quickest relief known. Nothing has such concentrated penetrating heat as red pepper. Instant relief. Just as soon as you apply Red Pepper Rub you feel the tingling heat. In three minutes it warms the sore spot through and through. Frees the blood circulation, breaks up the congestion—and the old rheumatism torture is gone. Rowles Red Pepper Rub, made from red peppers, costs little at any drug store. Get a jar at once. Use it for lumbago, neuritis, backache, stiff neck, sore muscles, colds in chest. Almost instant relief awaits you. Be sure to get the genuine, with the name Rowles on each package.

ATTACKS FROM HIGH ALTITUDE

Great Britain Plans To Launch Air Attacks from Extreme Height.

(By the Associated Press) LONDON, July 18.—Keels are now being laid in Great Britain for huge rigid airships which will hover above the clouds with a number of small fighting machines on board ready to attack at will. The airships will be launched from the London Daily Chronicle. The task of these new machines in war, he says, will be to carry aloft to immense heights and to transport, if necessary, thousands of miles, squadrons of swift, deadly, steel-hull "air-borne" planes. These will be launched from high above the clouds and will rush at 200 miles an hour and more earthward to harry other aircraft and raid the commerce of the seas.

"The airships will have the power, lacking in a small machine," the writer says, "of long-distance flights at a great altitude, while on the other hand, the small planes they carry will be able to outfly and out-fight any machine laden for a long journey. In the case of specially-organized attacks by these formidable air-borne fighters on 'planes carried at sea by mother-ships, the tactics of the craft will be to dive pell-mell on their surface-launched opponents, and strike them deadily blows before they can gain the vantage point of altitude.

"Height in air-warfare is the key to victory, and these airship carriers of fighters will have the advantage of being in a position to choose their own moment for a swoop upon enemy craft climbing from the earth."

The Chronicle's contributor says that France, and the United States all show a growing recognition of the importance of mobile "aerial harbors" for swarms of fighting-planes. The United States already has laid the keel of an airship which will launch single-seater fighters and pick them up again while the mother-craft is flying at full speed. The first American "flying-aerodrome," he adds, will be ready to take the air this summer. It will carry as a normal load twelve fighters of the latest type.

Great Britain has completed the first seagoing vessel in the world designed for the transport of aircraft, she has a displacement of 10,920 tons and carries seven 6-inch guns, four 4-inch, and a number of smaller guns, also torpedo armament. The new ves-

sel is fitted with two hangars, enabling her to carry twenty airplanes, which will be raised to the taking off decks by means of electric elevators. Another advance in aerial efficiency is the construction, for the British air ministry, of huge seaplanes with a speed of 125 miles an hour. One of the latest types has a wing span of 112 feet and carries nearly two tons of gasoline. It is fitted with twin Coudor engines of 1,500 horsepower each, driving twin propellers.

University of Texas May Become Rich Through Oil

(By Associated Press) AUSTIN, Tex., July 18.—Students and officials of the University of Texas who for several years have dreamed of extensive improvements for the school may have their dream fulfilled by the magic of oil. A \$6,000,000 improvement program has been outlined for some time. The board of regents had taken steps to obtain loans for the improvements, but it was not until a few weeks ago that hope developed for other sources of revenue.

It is admitted by university officials that should a producing oil field be opened on the school's lands in West Texas it probably would be one of the richest schools in the nation. Reports of a gusher in Reagan county were made recently, but it remains for the field to be proven.

University officials are reluctant to express themselves regarding the probable income of the school from the field. On returning from an inspection of the Santa Rita well which has caused much discussion, Dr. J. A. Udden, head of the university geology department, declared that prospects are favorable for a producer, although he would not hazard a guess as to the value of the field. All permits on the university block have been taken up as a result of the Santa Rita prospects.

The state university holds title to 72 sections of land in the Reagan county district. The income from the land under state law, is used for permanent improvements. The state legislature probably would make provision for other uses in case a large income is derived.

A Splendid Medicine for the Stomach and Liver.

"Chamberlain's Tablets for the stomach and liver are splendid. I never tire of telling my friends and neighbors of their qualities," writes Mrs. William Vollmer, Eastwood, N. Y. When bilious, constipated or troubled with indigestion, give them a trial. They will do you good.—Adv.

Never Ask a Fiddie What He Wants for Lunch!—Serve

Kindergarten Sandwiches

They make every lunch a "surprise." With some fancy-shaped cutters in the kitchen and this recipe your boy will cut his way to rosy cheeks and stalwart health, and find delight in every bite.

Cut white Bread and dark graham Bread in thin slices. Shape with cutters having two pieces each of white and of graham Bread of the same shape. Lightly spread or glaze shaped cutters, remove crumbs from unbuttered graham and white pieces. Place graham Bread centers in white Bread rims and white Bread centers in graham Bread rims. Place decorated pieces with white rim on the corresponding piece of graham Bread and the decorated pieces with graham rim on corresponding pieces of white Bread. For a variety use cutters that are square, oblong, triangular, elliptical, fluted or cutlet shapes. For the centers use tiny rounds, or animal, flower, or other fancy shaped cutters. A circle of thick and one of white Bread may be cut diagonally three times and one-half the sections of each color to put together alternately on a plain circle of bread. Add a juicy orange or rosy apple, and you have a hearty, well-balanced lunch.

Of course, to get perfect sandwiches, you must start with perfect Bread—the wholesome rich flavored loaf that assures vigor as well as enjoyment. That's

Superfine Milk Bread

—Best for sandwiches, best at all times. Ask your grocer.

Power

The three most vital units in the economical and satisfactory operation of motors are the Piston Rings, Pistons and Piston Pins, all of which we carry in stock, and with our cylinder grinding equipment we are able to give you a very complete piston assembling service.
