

J. A. JONES LAID TO REST

(Special to the Observer)

INDIANAPOLIS, July 25.—Jared A. Jones, who passed away recently at Hot Lake at the end of an illness of length, was born on a farm near Fredericksburg, Virginia, March 4, 1839. At the time of his death he was 84 years, 4 months, and 16 days of age. The only near relation he leaves are the following nephews and nieces: S. L. J. A., and G. W. Benson of Union, Virginia; E. Davis of Oakland, California; and E. M. Jones of Lubbock, Texas. Besides these there are several grand-nephews and nieces living in California, Texas and Missouri.

Mr. Jones was a member of a family of seven children, all of whom are now deceased, Jared A. being the last one of the seven to be called. His parents died when he was only a boy and he went to Ohio and lived with his grandparents at home in Missouri, where the young man received most of his education. Afterwards he farmed long enough to become the owner of a wagon and a yoke of oxen. Then he in company with Mr. Benson made the long and tedious journey to Oregon, landing in the Grande Ronde valley in the fall of 1862. At this time there were only a very few people in the vicinity of what is now Union.

After deciding to locate in this vicinity Mr. Jones first engaged in the business of freighting from Emattilla Landing to the Grande Ronde valley and other points, having had the distinction of bringing in the first load of groceries which was shipped into the valley. Next he bought 160 acres of land, later selling this property and starting up in the butcher business at Pocatoumas in Baker county.

Returning to this vicinity he again purchased land, this time becoming the owner in partnership with Alvin Johnson of 320 acres near Catherine Creek. After buying out his partner and adding to his holdings he farmed this land for several years, again selling out in 1884. He made his home with a sister after leaving the farm and after her death his last years were happily and quietly spent at the home of his nephew, J. A. Benson, at Union. Becoming ill a few days ago he was taken to Hot Lake and at 10 o'clock Friday evening he passed on, after a long and eventful life.

Mr. Jones was a man who stood ready at all times to help the needy, was quick to answer calls for charity, and these qualities in addition to a kind and genial disposition endeared him to all his friends and associates.

Funeral services were held at the Benson home Sunday afternoon, Rev. Quinn of the M. E. church officiating. His body was laid to rest in the Union cemetery, near the scenes of the greater part of his life. Thus Union and Union county loses another of their pioneers, the grand people who came into this valley and wrested the land for its wild state and made it possible for later generations to find comfortable and happy homes. Only a mere handful of these honored pioneers are left and these are passing away all too rapidly.

LEGION SEND NOTE OF THANKS TO OREGON

INDIANAPOLIS, July 25.—A message of thanks by President Obregon of Mexico for his recent presidential decree permitting the American Legion in Mexico to import duty free markers for the graves of soldier dead, has been sent by Alvin Owsley, national commander of the veterans' organization. "Members of the legion deeply appreciate this courteous act of the President of a neighboring country and take it as a symbol of the good feeling that exists between our two nations," the message stated. "May your efforts in behalf of your beloved Mexico be crowned with success. You have won the undying gratitude of our American Legion members in Mexico and of the hundreds of thousands of war veterans over the world by your thoughtful consideration of our fallen comrades."

Seek Standard Names For Plants and Flowers

(By the Associated Press)
CHICAGO, July 25.—The chaotic state of affairs in the nomenclature of names of flowers, plants and other perennials, has made necessary the standardization of their names, and a report on the subject has been adopted by the American Association of Nurserymen.

The compilation of names of those perennials, the result of more than five years of actual work on the part of the sub-committee of The American Joint Committee of Horticulturists, is heralded as a great stride forward in the horticultural world. As an example, the committee pointed out that there are more than 2,000 names for roses. Many names are used for the same rose, and this has resulted in complication. With the completion of the new nomenclature, it is hoped that use of the standard names will become general.

Standardized perennial names, both common and scientific, will benefit the public and the grower, according to the committee, and will tend to eliminate unfair practices. Heretofore growing, buying and selling have been largely guess work, the committee said, and based on personal equation rather than fair, square, open and accepted business standards. It is expected that the Government will accept this nomenclature as an official standard.

A Splendid Medicine for the Stomach and Liver.

"Chamberlain's Tablets for the stomach and liver are splendid. I never tire of telling my friends and neighbors of their qualities," writes Mrs. William Vollmer, Eastwood, N. Y. When bilious, constipated or troubled with indigestion, give them a trial. They will do you good—Adv.

TO INVESTIGATE CANADA'S WEALTH

NEW YORK, July 25.—Mining engineers from this and other countries will make their summer pilgrimages next month to the heart of Canada's richest mines. The 125th meeting of the American Institute of Mining and Metallurgical Engineers, it is announced here, will be held August 29 to 31 in Ontario and Quebec.

With the cooperation of the Ministers of Mines of these two Provinces and of the members of the Canadian and American Institutes of Mining and Metallurgical Engineers, the vast mineral wealth of Canada will be placed on exhibition.

Petroleum and gas will be among the principal general subjects of the technical sessions, which are to be held in Montreal. The geology of Santa Clara oil fields, Ecuador, will be discussed by Joseph H. Sinclair of New York and Prof. Charles P. Berkey of Columbia University. Other papers will be presented by A. P. Moxley of New York and Oliver T. Bradley of Muskogee, Okla.

"The average man of the street if asked what minerals of commercial value were found anywhere near New York," Secretary F. P. Sharpless of the national general assembly, probably would answer "coal and possibly some iron." "It is scarcely realized by the average citizen that within 24 hours' ride from New York, just a short distance north of the Lacks, lie the deposits from which nearly all the nickel of the world comes from them, on a little further to the northeast, the richest silver mines that the world has ever known are still producing; and then again a little further to the north we come to what promises to be one of the most interesting gold developments of the present century."

"The Hollinger mine is probably the most important gold producer in the world. Near it are the highly profitable Dome and McIntyre mines. Then passing on to the east down into Quebec, there are the asbestos mines which are today furnishing the bulk of the asbestos being imported into this country."

"The Porcupine Gold District and the country lying to the east of it are attracting considerable attention at present and the American engineers whose duty it is to advise in respect to them will take this opportunity to familiarize themselves a little further with the districts that are daily referred to in the public press."

Church of England Has Deficit.

(By the Associated Press)
LONDON, July 25.—The Central Board of Finance of the Church of England has decided to hold a series of conferences in the autumn to deal with the deficit of 52,000 pounds shown in the financial report of the church for the present year. The report of the legal committee suggested that the assembly of the church should consider various publications in connection with its work as a means of raising additional funds.

Economize or Face Deficit.

(By the Associated Press)
MANILA, July 25.—A general retrenchment policy must be adopted in order to avoid a deficit in the Philippine government finances this year, according to a recent statement by Governor General Wood. He declared that a number of projects which the last legislature authorized must be held in abeyance until the government is in better financial condition.

By suspending a number of the projects authorized by the legislature, such as expenditures in connection

with the extension of the Manila Railroad and the building of hospitals, the governor general explained that the government will be well within its revenue receipts at the close of the year.

OWSLEY DISCUSSES INTERESTS OF ALL

INDIANAPOLIS, July 25.—American citizens are interested in the development of a national education program for building a higher type of citizen, above the prejudice of hypochondria and bigotry, Alvin Owsley, national commander of the American Legion declared on his return recently to legion headquarters in Indianapolis. Commander Owsley has visited forty-five states, and has made from forty to fifty addresses a day to audiences, ranging from 100 to 20,000 persons.

American Legion policies, he said, are being received with favor by the general public. He declared that the people are more interested in the welfare of disabled veterans than they ever were before and that the stand of the legion for an immigration holiday and in opposition to radicals had struck the chord of popular approval.

Citizens of America are in favor of the legion's stand for a universal draft act, under which capital and labor and all the resources of America would be conscripted in the next war, according to Commander Owsley. The legion's defense of the occupation of the Ruhr and its war profiteers also are popular, he said.

Legion members are taking their place in public affairs, Commander Owsley pointed out. He said that three governors, four lieutenant-governors, four United States senators and more than thirty members of the lower house in congress are legionnaires.

One Dollar Saved Represents Ten Dollars Earned.

The average man does not save to exceed ten per cent of his earnings. He must spend nine dollars in living expenses for every dollar saved. That being the case he can not be too careful about unnecessary expenses. Very often a few cents properly invested, like buying seeds for his garden, will save several dollars outlay later on. It is the same in buying Chamberlain's Colic and Diarrhoea Remedy. It costs but a few cents, and a bottle of it in the house often saves a doctor's bill of several dollars.—Adv.

There's Satisfaction after a good meal!

Business men who are really careful of what and where they eat naturally prefer our restaurant. Courteous service, which is a prompt and exacting as may be found anywhere. Another feature of our service is the sanitary condition of our kitchen and dining room. And our prices are mutually fair.

The Telephone Directory

Good telephone service depends vitally upon care in calling telephone numbers. A wrong number called causes loss of time to you, to the party called and to the operator.

It is not the loss of time to you alone or to the operator that concerns us most, but it is the annoyance to the party called. Your mistake cannot be explained to him, and the Telephone Company is held responsible for your error.

Consulting the current issue of the telephone directory, instead of trusting to memory, giving your number clearly, and quickly correcting the operator if she misunderstands your call, will greatly increase the efficiency of the service.

Period for Applying For Compensation Is Practically Finished

Disabled World War veterans who have failed to make application for government compensation should do so at the earliest possible moment, L. C. Joseph, Pacific Northwest manager of the United States Veterans' Bureau urges. Laws governing activities of the bureau give the war veteran five years from the discharge to file application for compensation. In a large number of instances, this period expires during the late summer and fall months of this year, he stated.

Ex-service men suffering from ailments of 10 per cent or more, due to war service, are entitled to compensation ranging from \$5 to \$50, depending upon the degree of the disability, Mr. Joseph announced. Additional allowances are made for dependents. Even though the war disability is slight at the present time, the veteran should protect himself by making proper claim and proving satisfactory connection. With these steps taken, the claimant is entitled to the benefits offered after the five year period in case the injury or disability becomes aggravated to a compensable degree.

"Every war veteran of this district which includes Washington, Oregon and Idaho, who believes that his illness or present disability is traceable to his service during the World War, should get in touch with the nearest Veterans' Bureau office," urged Mr. Joseph. "A letter written to this Bureau will receive an immediate response instructing the ex-service man how to proceed in the prosecution of his claim."

The district office of the bureau is located in Seattle and there are branch offices in Portland, Spokane and Boise. These offices handle, aside from the compensation feature, hospitalization of disabled veterans, medical treatment and their vocational rehabilitation.

HELD HIGH

In the estimation of the athlete is our tennis, golf, baseball and sporting goods generally. On the diamond, the golf links, tennis courts, or on lakes, brook or stream, our up-to-date rods are in demand. If you are going on a fishing trip don't neglect to secure our up-to-date rods, reels, baits, lures or spinners.

Tennessee to Construct \$2,000,000 War Memorial

(By the Associated Press)

NASHVILLE, July 25.—A \$2,000,000 memorial, testifying to the valor of the people of Tennessee in the world war, soon will take its place among the most beautiful and elaborate buildings of the kind in this country. While the majority of Tennessee's troops were returning home from the greatest war of all history in the year 1919, and were being welcomed in the larger cities with fervent celebrations and parades, patriotic citizens inaugurated a movement designed to preserve to future generations a record of the contributions and sacrifices of these sons of the state had made in the gigantic struggle for world peace.

Patriotism was still at fever heat when a measure was brought up in the General Assembly to build a \$2,000,000 memorial to the Tennessee world war veterans, especially to the memory of the Gold Star sons. The bill passed easily.

The state appropriated \$1,000,000, the city of Nashville raised \$500,000 and the county of Davidson put up \$500,000 and the post-war campaign crystallized into the plans for a structure which architects claim will be one of the finest and most complete in the entire country.

The structure, according to the design, will be fashioned after the classic Greek Doric order of architecture similar to the famous Parthenon, an exact replica of which stands in Centennial park in Nashville. There is also to be quite a similarity between this memorial and the new Lincoln memorial in Washington, the architect says.

In the new building there will be a capital annex and a museum annex, connected by a memorial court between the two buildings and open to the skies with an allegorical statue of bronze or marble gracing the center of the court, and tablets bearing the war records of Tennessee soldiers killed in the war upon the west wall of the court.

There will be four stories to the structure, including the ground floor, the entire length to be 285 feet and the width 115 feet.

Male Teams Reappear.

ARLINGTON, Ore., July 25.—Memories of bygone days were forcibly brought back to the old-timer Saturday when 16 mules hooked to seven wagons loaded with wheat passed through the streets of Arlington.

Under a recent ruling the making of home wine is legitimate, and now nothing remains to make the darned stuff palatable.
