"ASK THE ENVELOPE" AND KNOW THE TRUTH ABOUT

Today's Buick is the choice of the American market. It took yesterday's Buick to make this condition possible. For much less money than a new one you can own the same car that helped establish Buick's accepted supremacy. All the in-built qualities by which new Buicks are judged—dependable operation—smartness of lines—all are yours at a price no more than asked for a cheap new car. Too small for your needs.

"The Line is Busy"

When the telephone operator tells you "the line is busy," this fact has been made known to her by an electrical signal, which in the fraction of a second automatically indicates that the line called for is in use.

When "busy" reports are repeated on successive calls for the same number, it is generally due to an immoderate use of the called line. The length of a telephone conversation is obviously beyond the control of the telephone operator. Have confidence in her when she makes the report, "the line is busy."
