Fashion Notes

New Gown Fad.

Paris—There is almost a fad now for the gown with a long hood-like and a heavily ruffled skirt. The ruffles often are placed stantwise, giving an additional wrap around effect.

Bracelets and Necklace.

Paris—Wear eight bracelets on lower arm, none on the other, and have a necklace which falls in a double strand about the waist. You may carry a forget-me, too, of fanciful design.

Range of Browns.

London—It is extraordinary what a range of browns, most of them

Big Hat Popular.

London.—In addition to the hat of tam o'shanter crown, the big hat, extending a long distance before and behind also is popular today. It is often of black plush, trimmed with a negligent scarf of white in the long piled, furry plush that resembles fur.

New York.—More and more the use of brilliant is increasing. Evening gowns today are studded with them, hats show gleaming edges of them, while on fans and bracelets and even gloves they run riot.

Give Oregon Share of National Forest Money

The State of Oregon has received \$168,11.55 from the Forest Service, U. S. Department of Agriculture, as its share of the receipts from National Forest resources during the fiscal year 1923, according to an announcement from the District Forester's office in Portland. Word to this effect has been sent to Governor Walter M. Pierce.

Oregon contains 13,137,447 acres of National Forest lands. There are fifteen National Forests located in various parts of the state.

For School and Road Funds.

One-fourth of the money received by the Forest Service from timber sales, grazing permits, summer home site leases, and other uses of National Forest lands is turned over to the states in which such lands are located on a pro rata basis, in accordance with an Act of Congress. Such sums are for the school and road funds of the counties containing National Forest lands. Oregon has received for roads and schools since 1902, as its share of National Forest receipts, a total of \$1,614,284. The total sum turned over to all states containing National Forests during the fiscal year 1923 amounted to \$1,321,422. Twenty-seven states and Alaska shared in the distribution of this sum, which exceeded the annual average for the previous five years by about \$250,000. Increased sales of timber were largely responsible for the record-breaking 1923 receipts.

Haiti Controls Drug Traffic.

PORT-AU-PRINCE, Haiti (AP)—The Haitian Council of State has passed a law to regulate and control the exportation, importation, possession, use or sale of narcotics, poisons and habit-forming drugs in Haiti.

The specific purpose of this legislation is to prevent the possible use of Haiti by German firms as a base for the distribution of narcotics. Previously there was no law of any description bearing on the narcotic problem and Germany, not being a signatory to the Opium convention, was steadily increasing its imports of such substances. The passage of the act has made Haiti eligible as a signatory to this convention.

The new law is based on that which controls the use of narcotics in the United States, with certain modifications to fit local conditions.
