DR. PHY VISITS PORTLAND SHOW

Hot Lake Watching Pacific International Live Stock Show With Interest.

HOT LAKE, (Special)—The announcement that Matador Sigis Wulfer VI is again grand champion bull at the present Pacific International Livestock Exposition holds especial interest for Hot Lake Sanatorium residents, since much of the milk used on the tables here is produced by cows connected to this persistent prize winner. Many of the Plymouth-bred Huskins-Fredians are of the same strain as Matador Sigis Wulfer VI, while Carnation King, Matador, Dr. Phy's famous bull which died last winter, was closely related to the animal which is attracting such favorable comment at the Portland show.

(Providing his record of never missing a Pacific International, Dr. W. T. Phy left Wednesday afternoon for Portland and the 1923 exposition, in addition to viewing the stock and visiting Portland friends, Dr. Phy plans to be in the stadium at Multnomah field when the whistle blows Saturday for the University of Oregon-Stanford game Saturday. His daughter, Miss Marion Phy, is coming to Portland from Eugene to attend the game with Dr. Phy.

C. J. Wise, whose postoffice address is Ironton, is a patient at the Sanatorium this week. Mr. Wise, with his brother and father, owns a large ranch in eastern Oregon. The two specialists are visiting day and night.

E. C. Payne is a La Grande resident who is taking treatments at the Sanatorium this week. Jennie Matimore and her mother, Mrs. H. A. Hanset are guests here who register from Yakima, Wa. Mr. Martindale, is conductor with the Yakima Valley Transportation company, while Mrs. Hanset's husband is in the retail business.

Mrs. P. H. B. Moulton is here from Weiser. She is the wife of "Pont" Moulton, fruit buyer known west of the Rockies wherever fruit is raised.

The presentation of the "Covered Wagon" in Baker was the cause of twenty seven residents of Hot Lake Sanatorium driving to that city during the first three days of the week. Among the parties making the trip were those of Dr. Phy and Mr. H. H. McCarthy, Monday night; and Mr. and Mrs. Oliver Dusch and Mrs. Grace Harris—Sunday. With Dr. Phy were Mr. and Mrs. Hayes, of La Grande, Mrs. Gertrude Strand, of Pendleton, and Miss Sally Sambeau.

Mrs. Edith Burnett, who is making her home in Union Junction while her husband is in the employ there of the O. W. R. & N., came to the Sanatorium for consultation Saturday.

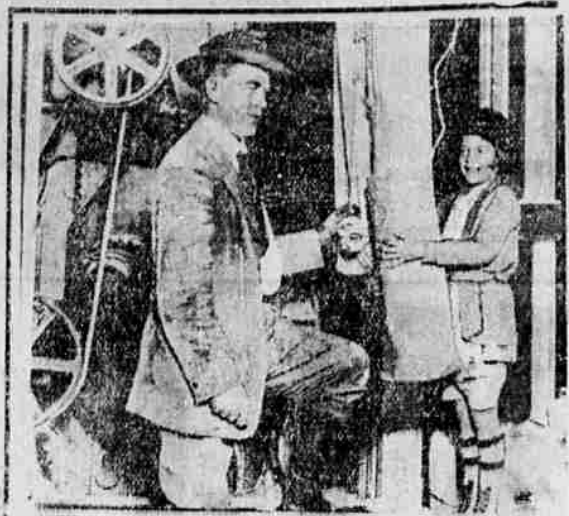

Mrs. Edith Penberton, niece of Mrs. P. L. Meyers of La Grande, is a surgical patient here. Mrs. Penberton, who makes her home near Harrington, Wa. is a sister of Miss Rogena Keith, who was Dr. Phy's private secretary three years ago.

Mrs. Henry Williams, whose husband is a prominent farmer of the Ontario district, reached the Sanatorium the last of the week and will take treatments here for several days. Four Nevada residents who reached the Sanatorium Tuesday afternoon after driving through from Reno in two days are Mr. and Mrs. P. A. Mink, Mr. S. P. Selbert and K. R. McKnight. Mr. Mink has returned for the second of a course of radium treatments he is taking while the other members of the party are making the trip through to Portland with him.

W. Lewis, Loring farmer, was among the first of the week arrivals at the Sanatorium. Mrs. C. C. Cross, whose home is Ogden Utah but who has been spending the summer months in North Powder, brought her daughter, Ida, here for treatment last week.

P. E. Culver was a week-end guest at the Sanatorium. Mr. Culver is a shock-absorber salesman with headquarters in San Francisco. Seattle arrives at the Sanatorium

Good Old Nap

Remember, Nap Buckler, the former star twirler of the Dr. Allen National Lacrosse team? Well, here he is. He owns a flour mill now at Roosevelt, Ga., and is shown here with his seven-year-old daughter Annie, in the mill.

Monday were Mr. and Mrs. William H. Lambert. Mr. Lambert is a salesman for the Kohlers bath fixtures with his territory in the Puget Sound City. He and his wife plan to remain here for about two weeks' treatment.

That her little year-old son, Clarence, might be operated on here Wednesday, Mrs. Edna Ingram is registered at Hot Lake. Mrs. Ingram's home is in Union but this summer she has been living with her mother, Mrs. B. Hoge, of near Haines. Mrs. Hoge is also a guest at the Sanatorium.

J. C. Dixon, owner of a sheep ranch near Prairie City, reached here Tuesday and is remaining for several days. Frank Cadwell came to the Sanatorium from Lima last week to undergo an operation here. Young Cadwell, the son of C. L. Cadwell, manager of the Union Hardware store, is now employed by the Portland Cement company of Lima. At present he is visiting with his parents.

Three Dayton residents who have come to the Sanatorium within the last few days are Mrs. Martha Anderson, Veri Anderson and James Thorn. Mr. Anderson is here to be with Mrs. Anderson, his mother, while she recovers from a surgical operation. James Thorn, a friend who owns a ranch in the Dayton vicinity chose this time to take treatments here.

A large bunch of sweet peas untouched by frost and a large box of fruit were brought to the Hot Lake Sanatorium by a group of Promise residents Wednesday as proof that their country north of Wallowa is truly the "Promised Land." In the party were Mr. and Mrs. Hattie Taylor and Mr. J. M. Taylor. They drove down to visit Mrs. J. M. Taylor, a surgical patient in the hospital.

Springfield Union Perfect anobusiness is never achieved by those who do not pronounce it pumpkin pie.

In this conservative country even the leaves that turn red soon lose their grip on things.

Weather Officials Scoff At Far-Ahead Predictions

WASHINGTON, (AP)—Pay no attention to forecasts of next winter's weather or predictions of weather conditions for long periods in the future, is the advice of the Weather Bureau.

A prediction from New England that the "coming winter will be the coldest and snowiest winter in history" in that section of the country has led the government officials to disclaim any responsibility for the forecast. The Weather Bureau does not attempt to issue predictions even for a general character for weeks or months in advance. The subject of forecasting for seasons or considerable periods ahead has long engaged the attention of meteorological scientists, but thus far, weather experts here say, no laws or sequences have been discovered whereby long-range forecasts of a reliable character can be made.

Reputable scientists throughout the world agree that the science has not advanced to the point where that can be done. Thus the government experts throw down the predictions of "good-bone weather prophets" and the forecasts which appear in almanacs and calendars a year in advance.

Gas Blows Up Steamer Sank Seven Years Ago

ORAN, Algeria, (AP)—An extraordinary sequel to an incident of the war occurred recently in this harbor, and before explanation was broad east caused much excitement along the waterfront.

A German submarine in 1916 laid mines at the port entrance. In due time the steamer Hivos, laden with grain, struck one of these bombs and went down keel uppermost in 10 fathoms.

There she lay for seven years, but during this time the confined grain was generating gas. This finally lifted the steamer again to the surface where she righted and promptly blew up. Nobody was near and it was at night, so for a while the mystery was unsolved, but the answer was found in the quantities of wreckage and floating grain, highly fermented, discovered floating on the surface of the water.

An educated man is one who can name the members of the cabinet and give a reasonable explanation.

SPORT NEWS

Aggies Pepped Up For Idaho

OREGON AGRICULTURE COLLEGE, Corvallis, (Special)—The Aggies are again working hard in preparation for the game with the University of Idaho Vandals. Although the Orange and Black men were defeated by the University of Washington by a score of 14 to 0 last Saturday, they are not discouraged and are determined to give their best in this game with the men from Idaho Saturday, November 10.

The game with the northernmost last Saturday showed the Aggies their weakest point in the offensive. The Washington men start their end runs with a sweeping interference, in which each man on the team takes a member of the opposing team out of play. When the Aggie started an end run, the Aggie runner would no more than get started when a line of Huskies would meet him and bring him down.

The Aggie men must get some through the game with the Huskies in

good condition and will be ready to give their best once again in the game this week end. Idaho has a fast, chifty team with plenty of snap and dash and the Aggies have their work cut out for them if they are to hand a defeat to the fast Vandals.

WALLA WALLA HI TO PLAY SCOTT HI NOVEMBER 17

TOLEDO, O.—Scott High school football team will play the high school team of Walla Walla Wash., November 17, according to announcement today by Fred Siebert, representing Scott High. Walla Walla was selected to represent the Northwest by three newspapers, Portland Oregonian, Seattle Times and Seattle Star, the sporting editors of which telegraphed Scott officials that this team was undoubtedly the best scholastic eleven in that section.

A "don" is a room where the little tables show marks of masculine heels.

PENDLETON TO MEET BOISE TOMORROW

PENDLETON — Pendleton High school has four more games on the 1923 football schedule, two at home and two away. This week, on Friday, the Buckaroos will try conclusions with Boise at Boise. The squad of 17 players and Coach Taylor will leave here Thursday morning by auto and will take in the O. A. C. University of Idaho conflict in that city on Saturday.

New Winter Wheat Resistant Of Bunt and Smut Announced

WASHINGTON, (AP)—Development of a new variety of winter wheat which is resistant to bunt or smut is announced by the Department of Agriculture. It has been named "Hibit" because it is expected to rid the wheat fields of smut. The variety was developed by Dr. E. F. Gaines of the Washington agricultural experiment station at Pullman, Wash., in cooperation with the Department of Agriculture. It was bred through crossing Turkey and Florence varieties, the latter a smut resisting spring wheat from Australia. Hibit has been found better adapted for the more humid regions than for semiarid regions. A few hundred farmers in eastern Washington planted Hibit this fall to give it a more complete trial than it has had in experiments.

Armistice Day

And Kuppenheimer Clothes

Link together in the fact of being well dressed. Dressed for the functions of the day—whether party, dance, outing or marching. You'll find just the suit to meet your ideas of the occasion, and priced moderately.
