TAILOR MAKES VALUABLE FIND

"After spending \$300 for modern clothes and looking in four years without getting any benefit for stomach trouble and bloating, I was induced by my druggist to try Mayo's Wonderful Remedy and must say that a \$1.25 bottle has done me \$500 worth of good." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allows the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will relieve or money refunded. At all druggists.—Adv.

The speaker who in a recent late expressed the belief that women were getting uglier every day should not be so critical. The drug stores are doing the best they can.

Einstein Greatest Thinker of the Day, Declares Brandes

PARIS. (AP)—George Brandes, the Danish critic and essayist, who is visiting Paris, is rather hard on American taste, still critical of Bergsonian philosophy, and regards Freud as apostle of "obscene inhuman imagination." Though in his 84th year Brandes is very active.

Asked whom he considered the greatest thinker of the day, he replied "Einstein beyond contradiction; he is the Newton of this age. All his conclusions are being, or will be established."

As to Freud, he threw up his hands in a gesture of horror and exclaimed "What have such obscene inhuman imaginations to do with us? Leave them to America where they are said to be very successful, delighting the bluestocking to whom that country is the chosen land."

Brandes was reminded that when lecturing once in London he declared that intuition was a quality which should be left to female admirers of Bergson, and that this statement drew a reproach from the French philosopher's mother who happened to be in the audience. Brandes says he remains faithful to that opinion.
