STRIBLING IS SWEET SOCKER

Despite the Fact That He Is Called a "Mamma's Boy" He's There in the Ring.

(By Jack Carberry.) International News Service Staff Correspondent.

New York.—A "mamma's boy" does not have to be a "sissy." There's William Lawrence Stribling, Jr., for example.

While he is a "mamma's boy," he says so himself, down home in Columbus, Ga., he helps with the dishes, never goes out with a girl his mother doesn't like.

Just to start the new year right Willie socked out a victory over Dave Rosenber, one of Brooklyn's socking champions.

William Lawrence Stribling, Jr. is just that kind of a boy. Stribling, who first came into the limelight as "The Georgia Schoolboy" by virtue of the fact that he maintained his school standing in good shape, notwithstanding his training activities in the early stages of his career, bears the somewhat surprising distinction of having been a world's champion for about two hours.

When Mike McGuire, who won a decision over Battling Siki in Ireland last St. Patrick's day, was matched recently to meet Stribling in Georgia, Mike took with him Harry Erle, who refereed the Dempsey-Carpenter bout and who has achieved other claims to fame in such matters. There were some who held that Harry was somewhat mistaken, however, when he concluded that Stribling and McGuire had fought a draw in the Georgia city.

Young Stribling's most recent performance—that against Rosenberg—demonstrated beyond a doubt that the 19-year-old South-werner has class, but it also indi-

AFRICAN FLY BELIEVED MORTAL Foe TO LOCUST

JOHANNESBURG.—(J.N.S.)—Discovery of a fly which is believed to be a deadly enemy of the locust is reported by a government official from the Western Transvaal.

The fly is known in color and in some-what similar to the "red fly," although much broader. The theory is that the fly lays an egg behind the neck of the locust, and in the course of a few days a maggot or worm, develops and kills the locust.

The discovery is welcomed with great satisfaction in South Africa, where locust hatching of locust eggs have been feared as a result of recent rains.
