Says His Prescription Has Powerful Influence Over RHEUMATISM

Has Also Proven Remarkably Successful in Severe Cases of Rheumatic Neuritis.

Mr. James H. Allen suffered for years with the malady. Many times this terrible disease left him helpless and unable to work. He finally decided, after years of ceaseless study, that no one can be free from rheumatism until the accumulated poisons, commonly called acids, which were dissolved in the joints and muscles and expelled from the body.

With this idea in mind he consulted physicians, made experiments and finally compounded a prescription that quickly and completely banished every sign and symptom of rheumatism from his system.

He freely gave his discovery, which he called Altherbu, to others who took it, with what might be called marvelous success. After years of urging he decided to let sufferers everywhere know about his discovery through the newspapers. He has therefore instructed druggists everywhere to dispense Altherbu with the understanding that if the first pint bottle does not show the way to complete recovery he will gladly return your money without comment.—Adv.
