WASHINGTON (AP)—Daily air mail service between New York and San Francisco with deliveries within 35 hours, or from one morning to the following evening, will begin July 1, it was announced Sunday by Postmaster General New. The time of transit will be cut to 24 hours probably within a few months, the postmaster general believes.

Not only will people on the two coasts benefit by the rapid delivery, but those of the country generally will be enabled to transmit their letters more swiftly as special air mail stamps will carry them from any city to any transmission from coast to coast or to intermediate cities for further dispatch by train. Letters between New York and San Francisco now require 37 hours by train. The new service will cut that time down by three-fifths.

Special air mail postage has been arranged and special stamps in three denominations, 5-cent, 10-cent and 24-cent, will be distributed to all the principal cities of the country for use on specially designated letters to go by plane. Three routes have been designated for postage purposes, one between New York and Chicago, another between Chicago and Cincinnati and the third between Cincinnati and San Francisco. An 8-cent air mail stamp will carry an entire letter anywhere within one mile a 16-cent stamp anywhere within two miles and a 24-cent stamp anywhere within three miles.

Letters from points not on the air mail route, if bearing proper air mail stamps, will be transmitted to the nearest air mail field for dispatch within additional postage. Any class of mail, including periodical publications, may be sent by air mail but only at regular air mail rates. Special air mail letter boxes are being installed in the larger cities along the route to expedite handling.

Regular landing fields, where changes of planes will be made on both eastbound and westbound trips, are located at New York, Detroit, St. Cleveland, Chicago.

TIRES TIRES TIRES

Has it ever occurred to you what an expense it is to buy a cheap-made tire and tube? Nine-tenths of your trouble is because you buy a cheap constructed tire, one that is made to sell, not to wear. Side-wall trouble is caused by not having a proper amount of cushion and rubber protection to withstand the shocks or sharp rocks. Don't be misled, but come look at the Gates New Super Trend Tires and Tubes and you will be convinced on sight of them, you have been all wrong.
