The combination of printed and plain fabrics is one of fashion's favorites this summer. Here three kinds of the plain material give a charming contrast effect to the shirt and the neck forms the only other trimmings necessary besides the bows on the sleeves—divy and feminine and alluring touch. The matching skirt is merely a two-yard length of the material bound with the plain silk.

**FRENCHWOMAN'S MOTOR HOST MUST PAY FOR RUINING HER SMILE.**

PARCE (AP) — It is by careless driving when out with a perfect body you get her into an accident that robs her of her smile, you'll pay for it, and if the lady in question is a professional smile, it comes pretty hard in France.

Twenty thousand francs is what Miss Jean Lagaud, a medical student, has just received as damages from her motoring expert of a year ago. The smashup she figured in left her with scars on the right ear, the forehead and lips. In sewing up the last-named wounds, the face was so contorted as to make Miss Lagaud's famed toothlight smile a thing of the past. Hence the lawsuit.

## HIGH INTEREST HITS BUSINESS

Small Credits Are Another Reason for German Affairs to Be Below Par.

BERLIN (AP) — Interest rates in Germany under the present unorganised financial condition vary from 2 to 3 per cent monthly. Furthermore, the amount of credit available for manufacturers and agriculturists is greatly limited by the restricted circulation of rentmarks, which must be kept low to prevent the rentmark from collapsing as did the paper mark. So all in all the German manufacturer, farmer or merchant who is in need of a loan to carry on his operations, finds himself in great difficulty.

Few manufacturers can purchase raw materials, make them up, market and collect on the product in less than two months. Money borrowed for such an operation adds tremendously to the cost. Merchants everywhere are marking up their stocks and making the public bear the burden, even on stocks obtained before the rentmark was placed on a solid basis.

The shoe industry in Germany is especially handicapped by the high interest rates. During the period when the paper mark was making its spectacular fall, dealers stocked up with shoes at very low prices. Warehouses were filled with them and the markets were glutted. Consequently the manufacturers had to shut down. Now there is a demand for reasonable prices of late styles to free up the accumulated stocks of shoe dealers, but money is so dear that manufacturers cannot finance their operations.

Interest rates, high taxes and uncertainty of the financial situation are advanced by merchants as the reasons for the extremely high prices asked for almost all manufactured articles in Germany. Dr. Reichelt, president of the Reichsbank and directors of currency.

fully realizes the great handicap imposed on industry by the strict limitation of credits. But he says the rentmark cannot be kept stable if credits are not carefully restricted, and he believes the republic as a whole will do better with stable money and restricted credits than it would with a falling currency.
