

COUNTY FAIR WILL BE HELD

Wallowa Communities and Organizations Are Backing Annual Event—Four-Day Fair Is Planned.

WALLOWA, Ore. (Special)—Plans are beginning to take form for arrangements for the Annual County Fair to be held at Enterprise, during the first week in October. Many features of the fair will be changed to some extent, to what they have been in former years. The time which the fair is to run will be shortened probably one day—giving four days of fair, instead of five. At all meetings of different organizations, where the question of fair has been brought up for discussion, practically all have expressed themselves very much in favor of continuing the fair. The granges of the county have expressed their willingness of giving it all the support possible, in an effort to make the yearly event more interesting and instructive than ever. This year will no doubt see the exhibit end of the fair taken more interest in than ever before and many have come to the conclusion that strong competition between a large number of exhibitors goes to make things interesting, and also produces very beneficial results in the way of encouraging high class products of all kinds. Much yet remains to be worked out in arrangements for the many features of the fair. Committees will probably be named on a number of them in the near future.

Evelyn Reel left Monday for The Dalles, Ore., going as a delegate from Wallowa Grange No.

693 to the meeting of the State grange, to be held at that place from June 2 to 6, inclusive. A number of other delegates from other granges of the county, left for The Dalles also.

George Coleman was in town the last of the week from his ranch on Powwaka ridge, attending business matters.

Floyd Hylton was among the visitors in town over the week-end. He has been working for Harry Maughan at the sawmill on the ridge. He reports they have been turning out lumber at a rapid rate for a small mill. The logging was done during the winter months, and the mill has been running steadily for the past several weeks at an average cut of slightly over 20,000 feet daily.

Harold Glenn, who was injured the first of last week, by being dragged for some distance by a horse, is reported to be recovering from his injuries. He has been a patient at the hospital here since the injury.

The Moore of Lostine, who was brought to the hospital here Friday, is reported as being very poorly at this time.

T. G. Johnson, the "potato king" of this section, has eight acres planted to this crop.

Walter Colpitts of Hurricane creek, has gone into the potato growing business on a large scale. He has a crop of 40 acres planted on his farm near Joseph.

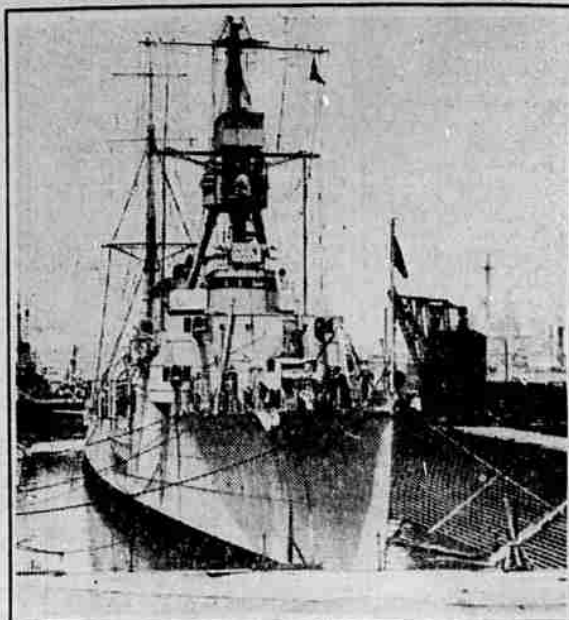

The Moore, Jr. came from the Grande Ronde river the latter part of the week. He has been called here by the serious illness of his uncle Doc Moore, Sr.

Speed Trump was arrested here Thursday evening on a bootlegging charge, and taken to Enterprise where he was given a hearing, and released on \$750 bail.

Giles Plass finished plowing and working down his large tract of summerfallow on his ranch a few miles east of town the latter part of the week.

Mr. and Mrs. I. L. Hyatt and Mr. and Mrs. Abe Parker of La Grande drove from that city Saturday and spent the day visiting

Newest Cruiser on Test Trip

The Trenton, Uncle Sam's latest light cruiser, which is to test its ability in long range scouting by making a 25,000 mile test cruise. The picture shows the Trenton being flooded out of her drydock at Brooklyn (N. Y.) Navy Yard.

H. W. Meek and family.

Jake Henderson and family came in the first of the week from Idaho, where they have been living for some time. Mr. Henderson states that many of the farmers in that section of the country are up against a hard proposition, due in a large part to shortage of irrigation water. He says the crops in this section are the best he has seen on his trip over.

Observed Memorial Day. All places of business were closed Friday in observance of Memorial day. A large crowd of people attended the memorial services held at the cemetery. The program began at 10:30 a. m. After an opening song, the following speakers were heard: Rev. George H. Fesse, Mayor Edwin Marvin, Rev. M. L. Petelle, and H. W. Oliver, a representative of the American Legion also spoke. Wreaths and bronze markers were placed on the graves of the five comrades who are buried here, by the members of the legion.

Many of the farmers of this section have been using the calcium cyanide in war on the ground squirrels. The results obtained are said to be even more satisfactory than what was expected from some of the first demonstrations. It was at first thought that a considerable amount of moisture was necessary in order to get best results, however, experiments made in some of the driest places which could be found, reveal the fact that very little moisture is necessary. T. G. Johnson, C. W. Mumford and others have used 25 pounds each and are well pleased with the results.

Prof. S. A. Baillie and a number of his agricultural class expect to attend the stock show at Union the latter part of the week.

Ed Anderson and wife expect to leave here within a short time for the western part of the state. Mr. Anderson has had charge of the janitor work for the schools here during the past school year.

Fishing Fair. Large numbers of sportsmen were out Sunday at many points along the river, fishing, some reporting very satisfactory catches. The water is still quite muddy.

Many people around town have been busy the past few days replanting their gardens which were badly frozen last week. Much of the garden truck had made an excellent growth.

Fred Ranes, who has been doing contract work on the high ways, and market roads in this county for the past couple of years, has purchased a large tract of land from H. L. Shintaffer in the hills about six miles northeast of Evans. The ranch contains 1150 acres, of which about 250 acres are in fall wheat.

A number of the farmers in the hill sections are still busily engaged in plowing summerfallow. The ground has become very dry, making the job hang on well.

The Lostine-Evans-Leap market road has been completed to the Chris Johnson place on Parsnip creek, giving the farmers in the Leap section of the county a fine surfaced road for a distance of six miles from that point to the depot at Evans.

Your Grocer Can Supply You With

CHICKEN CROQUETTES
 1/2 tablespoon onion juice few grains pepper
 1/2 tablespoon chopped parsley 2 1/2 cups chopped chicken
 1 teaspoon lemon juice 1 cup thick white sauce
 1/2 teaspoon salt
 Mix seasonings with chicken; add thick white sauce until mixture will hold together. Form into small croquettes and set aside to cool. Beat one egg with 2 tablespoons milk. Roll croquettes in dry bread crumbs, then in egg mixture and then in the dry bread crumbs, covering well. Fry in deep Amaizo hot enough to brown a piece of bread in 40 seconds (385° F.). Drain well on unglazed paper and serve garnished with parsley on hot platter. Makes 14 croquettes.

Thick White Sauce
 2 tablespoons Amaizo few grains pepper
 1/2 cup flour or 1/4 cup corn starch 1 cup scalded milk
 1/2 teaspoon salt
 Put Amaizo into top of double boiler. Add flour and seasonings and stir until thoroughly blended. Cook over flame adding milk gradually, stirring constantly until smooth and thick. Put over hot water, cooking until ready to use.

AMAIZO OIL

Amaizo is ideal for deep frying. It fries beautifully, thoroughly, quickly. It heats quickly. It does not smoke at cooking temperature. It does not carry the flavor of one food to another, so it can be used over and over. It may even be used for shortening, after having been used for frying.

FRENCH FRIED POTATOES
 Select small potatoes. Pare and cut lengthwise in long narrow strips. Allow to stand a few minutes in cold water. Drain and dry well. Fry a few at a time in deep Amaizo hot enough to brown a piece of bread in 20 seconds (395° F.). Fry until light golden brown and cooked through (about 7 minutes). Drain on unglazed paper and salt just before serving. Sweet potatoes can be fried in the same way.

Send for free Amaizo Cook Book, containing many aids to speed in preparation and deliciousness of results.

The Studebaker Light-Six!

More are sold than of any other six in the thousand-dollar price class!

The World's Largest Producer of Quality Automobiles

More because—it is the sweetest, smoothest-running Six you ever drove. Its specially designed offset valve motor, its machined crankshaft, its four big crankshaft bearings, its perfectly precisioned cylinders, pistons and reciprocating parts are the reason.

More because—no other car in its price class shows such obvious indications of quality—genuine leather upholstery, a hand-tailored top and curtains, carefully selected details of equipment, lustrous baked enamel finish.

More because—its 40-horsepower motor, its correct gear ratio, its beautiful balance and low center of gravity, make it like lightning in the "get-away," never failing on a hill, and effortless under a full load on any reasonable road.

More because—it is backed by a great service organization, immediately and willingly accessible.

More because—its recognized used car value protects you with the lowest possible depreciation when you come to trade it in.

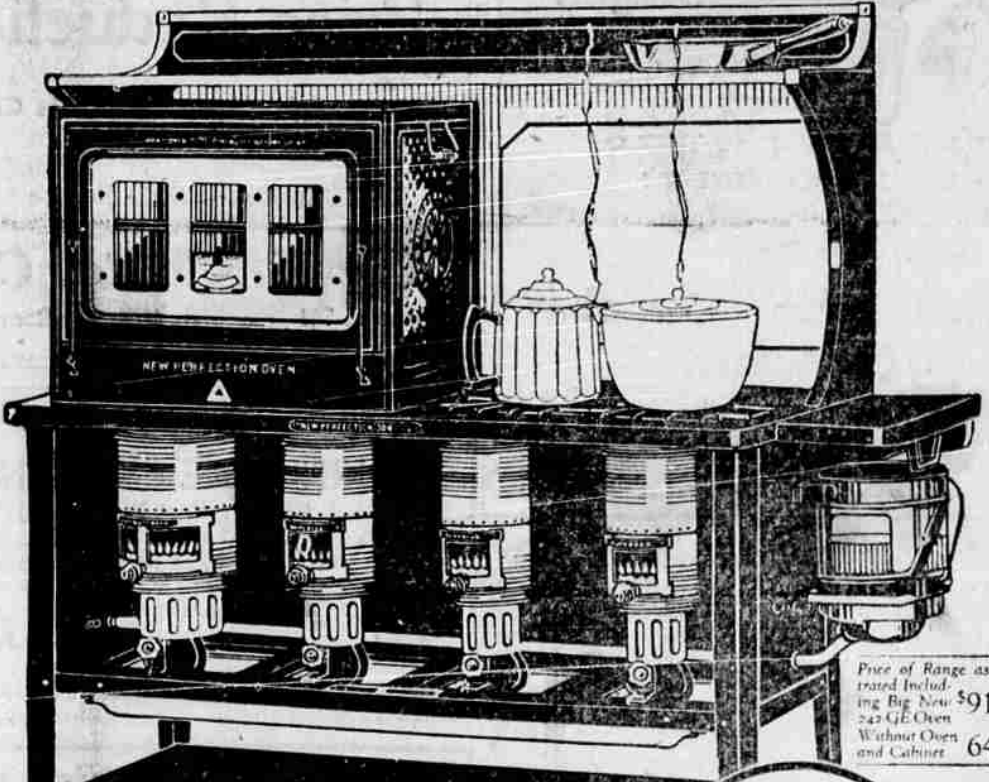

\$1045 f. o. b. factory

To prove its goodness by performance we will lend you a Light-Six any day this week—come in and ask for it.

100,000 Users

Price of Range as Illustrated Including Big New 243 GE Oven Without Oven and Cabinet \$91.25 64.00

in its first year!

The enthusiasm with which one hundred thousand women have received this new range is convincing evidence of how completely it meets the need for an oil stove which will do everything that any stove will do.

Its powerful Superfex Burners cook as fast as gas. It will boil, roast, broil, toast or fry.

It is so completely equipped, so roomy and substantial, that it meets every cook stove need the year-round. Beautifully designed and finished. It adds attractiveness to the most modern kitchen.

At your dealers you will find styles and sizes ranging from \$7.50 to \$130.00, to suit every requirement—each one the utmost in cooking satisfaction at its price.

THE CLEVELAND METAL PRODUCTS CO., Cleveland, Ohio.
 Oakland Branch, 45th and Hollis Sts.

Also makers of the well known PURITAN "Short Chimney" oil stove.

Fast-as-Gas Superfex Burners
 Fastest oil burners made. One "Big Giant" Superfex on each range, with speed of giant gas burners. Especially desirable for instant heat or quick cooking in large quantities. The other burners are "Little Giants"—as hot as the standard gas burner.

FRUIT POISON CAUSE FOUND

PORTLAND, Ore. (Special).—Research workers at the University of Oregon medical school have succeeded in discovering the cause of so-called fruit poisoning, a disease which attacks hundreds of workers in the canneries and packing houses of the northwest during the fruit packing season.

After six months of investigation, Dr. Lyle Kingery, professor of dermatology and Dr. C. H. Thienes, professor of pharmacology, have isolated the organism that produces the disease and they are now on the way to find the most effective means of checking and preventing the malady. Dr. Kingery will present the results of their investigation before the annual meeting of the American Society of Dermatologists in Minneapolis in July.

Fruit poisoning is a painful skin infection which attacks workers who pare and cut fruit in canneries. Those who hull strawberries are also liable to be infected. The disease causes the persons infected to be completely incapacitated for a month or two and often results in loss of the finger nails. Before the investigations of the University of Oregon men were made, the cause of the disease was unknown. The infection causes large economic loss to the fruit industry and its workers.

When sufferers from fruit poisoning were brought to Portland hospitals last year, Dr. Thienes and Dr. Kingery became interested in discovering a cure for the disease, which was then unclassified by medical science. They made trips to Oregon orchards and canneries, and studied cases of the poisoning, finally isolating the organism which caused the trouble. They are now experimenting at the medical school to find the best means of exterminating the organism from the human body so that cures may be effected.

TIME TO KILL CODLING MOTH

OREGON AGRICULTURAL COLLEGE, Corvallis, Ore. (Special).—The first codling moth cover spray needs to be applied in a hurry now if it is to "get" the worms before they enter the fruit. Codling moths have been emerging since May 15 and the high temperatures of the last few evenings have forced them to lay eggs. The eggs laid now will hatch in 8 to 15 days, depending upon the temperature. Unless it is applied where the newly hatched worms will get it in their first meal—which will be that case prove like which their food—there may be no chance to poison them if they enter the fruit to finish their repast.

This first cover spray is frequently called by growers the "20 day spray" because it is generally applied 20 days after the caterpillars spray when conditions are normal. Lead arsenate is the standard poison material, the powder form usually preferable. The standard dilution is three pounds of the powdered arsenate to 200 gallons of spray solution. If the paste form is used it takes double the quantity.
