

NEWS of SOCIETY

Social news must be in the hands of the society editor by 2:30 o'clock. Due to the fact that the social page is made up before noon, it is practically impossible to insert stories after that hour. Hereafter, items, no matter how important they are, that are delayed beyond that hour, will not be printed until the following day—News Editor's Note.

The Ladies Auxiliary of the B. of E. T. gave a delightful reception yesterday, honoring Mrs. J. E. Ensign, who will leave La Grande in the near future to make her home at Baker, at the home of Mrs. W. H. Allistott.

The home was attractively decorated with beautiful roses and after a very pleasant afternoon spent in social entertainment a delicious luncheon was served by the charming hostesses.

Approximately twenty members of the Mission Band of the Protestant church met yesterday afternoon at the home of Miss Ruth Falow and spent a very interesting afternoon. The meeting was opened by a song and the regular business meeting took place and the lesson in the Mission Book read and discussed. Before adjournment a delicious luncheon was served.

The Junior Missionary Society, consisting of about a dozen young girls of the M. E. church, returned Sunday from an enjoyed week's camping trip at Wallowa lake. They stayed at the Methodist dormitory. The girls were chaperoned by Mrs. R. W. Loughton and Mrs. E. P. Tyler.

The Friday Bridge club will meet at the home of Mrs. Lawrence Prescott Friday, June 12, instead of at the home of Mrs. Stanley Lyons as previously announced. Mrs. Prescott and Mrs. Lyons will be hostesses.

The Mission Society of the Christian church will meet at the home of Mrs. C. E. Golden, 1919 Cedar street tomorrow afternoon, Friday, at 2:30 o'clock. All members are urged to attend.

The social "A Trip Around the World," planned by the Loyal Woman's class of the Christian church has been indefinitely postponed.

Hints for the Housewife

MY FAVORITE DESSERT
(Contributed by Mrs. J. D. Lynch, President La Grande Neighborhood Club.)

Take 1 cup milk (either sweet or sour as convenient); eggs, as many as desired; 1 cup sugar, granulated or brown; baking powder or soda, according to the milk; nuts, raisins, dates, chocolate or coconut or anything you have convenient in the cupboard; add enough flour, steam or lard in a sheet or loaf or small pans; ice with any kind of icing or serve with favorite sauce.

MY FAVORITE LUNCHEON DISH

1 cup flaked fish or cold meat (ground or cubed); 1 cup cream sauce or tomato sauce or cold gravy; parsley or onions to taste.

Portolive — Brimful of The Elements Which Give Health and Vitality — Port Wine and Oil of Olive

Five out of every seven people fall a prey to colds when the system is at low ebb and susceptible to ailments.

Portolive is not only a corrective of digestion and a sparkling tonic to your nervous system, but it greatly stands between you and seasonal ailments.

Habituals to take a toothsome mingling of nature's correctives with pure old Port Wine and Oil of Olive.

Take it three times daily and at night. It's a regular builder in thousands upon thousands of homes.

PORTOLIVE LAXATIVE

Fringe

This dinner frock of black satin has little to distinguish it but the fringe overskirt woven in fringe by patterns to give the effect of heavy embroidery. Fringe is very fashionable this season because it falls naturally into the straight lines that are imperative if one achieves the smart silhouette.

Season well with salt and pepper. From here on use your judgment. Add eggs as an omelette or to make a soufflé. Or serve on toast or muffins or hot biscuits.—Oregon Federation News.

STOPS THEFTS OF METAL ORE

DENVER, Colo. (AP)—The game of "high-grading" which has been an annoyance to the mining of precious metals throughout the world, has been virtually stopped in Colorado mining camps during the last nine years as a result of the efforts of special agents working under the direction of the secretary of state in enforcing the Ore Buyers' Act passed by the Colorado assembly in 1915.

The term "high-grading" came from the practice originating in the theft and sale of high grade metal ore by miners and the subsequent conversion of the ore into gold and silver bullion for sale to the United States mint. Colorado mine owners had tried in every conceivable way to put a stop to the practice, but apparently without success, according to their reports to the authorities. Some mines operating with extremely valuable veins, installed "change rooms" where workmen were required to change clothing on entering and leaving the mine. But even this scheme was said not to have been entirely effective as the certain small percentage of dishonest miners managed to find some way to smuggle ore outside.

The Ore Buyers' Act, passed after a bitter struggle between the mine owners' association and alleged "high-grading" interests provides that buyers of precious metals must be licensed by the state and must post a bond of \$5000 for the faithful observance of the act. The law requires such a buyer to make a diligent effort to learn where the vendor acquired his ore and with what authority he is selling it. Giving false information to a buyer is made a punishable offense. In this way the special agents have been able to check the activities of unauthorized sellers. The virtual bottling up of the illicit market is said to have had the effect of stopping almost entirely the surreptitious removal of ore.

Since the law was adopted, the number of licensed ore buyers in the state has decreased from 72 to seven.

Efficient enforcement of the statute dates from 1917 when 8 of the 12 alleged "high-graders" were given prison sentences of two years each. At the trial more than a score of miners testified that they had sold ore to the accused men.

TALK LABOR AT MEETING

GENEVA (AP)—The machinery of the International Labor bureau has worked so fast that draft conventions on the four questions which will be discussed at the next international labor conference here June 14 already have been elaborated and are being distributed to the half hundred countries which will be represented.

The conference will consider these topics: first, the development of facilities for the utilization of workers' leisure; second, equality of treatment for national and foreign workers as regards workmen's compensation for accidents; third, the weekly suspension of work for 24 hours in glass manufacturing processes where tank furnaces are used, and fourth, night work in bakeries.

All these subjects have their relation to the Washington labor conference which adopted a convention limiting the hours of work in industrial undertakings to eight hours in the day and 45 in the week. Their proposed treatment is based on the idea that everything possible should be done to make the workers' employment not only as effective as possible, but also that his working hours should be so arranged that the leisure time should be thought of as well as the actual hours of labor.

The proposed solution of the problem of leisure time specifically takes the form of recommendations. The conference will be asked to recommend that each member state, having due regard to local customs, should consider the means of so arranging the working day as to make spare time as continuous as possible. It is also suggested that by means of a well-conceived transport system, reduced fares and suitable time tables, the time spent by workers between their homes and their work should be shortened as much as possible that the employers' and workers' organizations should be largely consulted by public or private transport authorities as to the best means of devising such a system.

The conference will be further asked to recommend to all countries the construction of houses on a sufficient scale and with low rental in garden cities or suburbs, under conditions insuring a proper degree of health and comfort, the providing of public baths, swimming pools, etc., and legislative or private action against the misuse of alcohol. Further suggestions are the development of physical health and sports and the encouragement of technical and general education through the use of libraries, reading rooms, and lectures. Finally, the recommendations lay great emphasis on the safeguarding of the liberty of the workers of the world and their individual freedom.

On the second subject the draft convention prepared provides that all countries grant to foreigners who are citizens of a country which also ratifies the convention in question, and who are injured in an accident, the same treatment in respect of workmen's compensation as they grant their own nationals.

As for night work in bakeries the convention drawn up establishes as a general principle that

there shall be no night work whatsoever in bakeries.

The convention provides that the prohibition of night work may be partially or entirely suspended by any government when public interest demands. In order that the basic principle may be enforced, the convention calls upon all signatory states to prohibit the sale of new bread before a specified hour, or to make use of some other effective measure.

Nashville Sets Up New Unit In Group of Nation's Milestones

NASHVILLE, Tenn. (AP)—Tennessee's zero milestone, located on state memorial property in the heart of Nashville, has just been dedicated.

This is the third marker of the point where distance begins and ends in the United States, and is a gift to the state from the Nashville Automobile club, representing the club's interest in the good roads movement.

The first milestone was erected at Washington, D. C. and dedicated by the late President Harding, and the second at San Diego, California, Nashville taking the initiative in this respect in the southeast.

A good roads program featured the dedication ceremonies, Governor Austin Peay receiving the gift in behalf of the state, and other officials also participating in the program.

The milestone, hewn of white Tennessee marble, is about three feet by two and a half feet each way and five feet tall. It will contain a record of distances to various cities in Tennessee and other states.

Says His Prescription Has Powerful Influence Over Rheumatism

Mr. James H. Allen, of Rochester, N. Y., suffered for years with rheumatism. Many times this terrible disease left him helpless and unable to work.

He finally decided, after years of ceaseless study, that no one can be free from rheumatism until the accumulated impurities, commonly called uric acid deposits, were dissolved in the joints and muscles and expelled from the body.

With this idea in mind he consulted physicians, made experiments and finally compounded a prescription that quickly and completely banished every sign and symptom of rheumatism from his system.

He freely gave his discovery, which he called Allenbu, to others who took it, with what might be called marvelous success. After years of urging he decided to let sufferers everywhere know about his discovery through the newspapers. He has therefore instructed druggists everywhere to dispense Allenbu with the understanding that if the first pint bottle does not show the way to complete recovery he will gladly return your money without comment. Red Cross Pharmacy will supply you. (Mail orders accepted).—Adv.

Permanently waved, wavy or curly hair should be Water-Waved

The water-wave is soft and natural in appearance. In no wise can it possibly harm the hair.

Moles, warts, superfluous hair permanently removed without scar.

Road Bonds are Sold.

THE DALLES, Ore. — Wasco county has sold \$250,000 of its \$500,000 road bond issue at a premium of \$2900. Ames, Emerich & Co. of Chicago and the John Price company of Seattle were the successful bidders. A total of \$550,000 of the \$500,000 issue has now been sold.

The money is being matched by the state and used in the construction of The Dalles-California highway in Wasco county, now nearing completion. It is expected that at least \$50,000 of the issue will not have to be sold.

A forgiving nature isn't worth a darn, however, unless it enables you to forgive yourself.

Seven years of thorough satisfaction

The Overland Freight Transfer Company of San Francisco operates over 125 pieces of automotive equipment, ranging in size from 10-ton Kleiber and G. M. C. tractors and 6-ton Doane trucks to Ford roadsters, all of which are probably subjected to as severe usage as any fleet of trucks in California.

This Company has ample facilities for testing out various lubricating oils and basing their choice on proven success in service. They write:

"After seven years of thorough satisfaction covering the lubrication of our equipment with your Zerolene oils and greases, we are more than pleased to again enter into a contract for our requirements."

In spite of the fact that many automotive engineers are of the decided opinion that the most suitable crude for the manufacture of an automobile lubricant is produced right here on the Pacific Coast, a certain proportion of the motoring public is still influenced by the superstition that there is something mysteriously "better" about eastern oils, just because they cost more.
