German Study Methods To Increase Auto Driving

BERLIN (AP)—In all of Germany, which is somewhat larger than the state of California, there is not a single parking space for automobiles. This fact came to light as a result of an investigation to determine the condition of the motor industry in the country. Police regulations do not permit automobiles to stand in the streets unless attended by the driver, and even then for only a short time.

In order to popularize locally the great American pastime of driving one's own car, a movement has been started in Berlin and some of the other cities to set up automobile parks within the city centers.
