

RAIN STAMPS SWAMP BLAZE

CLOVER CREEK. (Special)—The high winds of Saturday and Sunday started the fire in the swamp to the extent that it was necessary to call Fire Chief Scott from Baker, who looked the situation over Sunday. The rain came Monday and practically extinguished the flames.

Mr. and Mrs. A. E. DeVore and little son visited relatives in this vicinity several days this week.

Stanley Shaw and Edson McCann bought a machine for treating seed wheat with carborane copper. Besides being superior to blue vitriol for the treatment of smut it requires less seed per acre when treated in this manner.

Miss Berneice West spent the weekend at her home near North Powder, attending the dance at North Powder Friday night and one at Union Saturday night.

Gay Miller moved his sheep from this locality this week to their home place at the foot of Ladd Canyon. Mr. Miller expects to winter his herd in the vicinity of North Powder.

Stanley Shaw is rounding up his farm work and preparing to move to North Powder to be nearer the school.

Mrs. William Wicksworth spent a few days this week visiting at the home of her daughter, Mrs. J. T. DeVore. Mrs. Wicksworth expects soon to depart for Portland where she will spend the winter with her other daughter, Mrs. C. B. Gatchell.

Mrs. G. L. Carnes is a frequent visitor to La Grande, usually returning by way of Union to visit her parents, Mr. and Mrs. Chas. Scott.

Nearly every chicken roost in this vicinity has been visited by the shunka this season. They are very destructive and a number have been trapped.

Miss Lydia Sallor was a week-end visitor here recently.

Miss Georgia Aughey is attending school at North Powder.

J. P. DeVore was a business visitor to La Grande the first of the week.

Even though it has been quite dry much fall plowing has been done here.

Ralph Butler made a trip to the Ben Blaise farm recently for two loads of grain to be fed to his fine bunch of poultry.

Mrs. Ben Blaise expects her mother, Mrs. Harbuck, of Eugene, to spend several weeks during the winter months at her home here on Clover Creek.

It is reported that George Carnes has rented what is known as the old Grant place for another year. He is at present seeding some fall grain.

The telephone line in this vicinity has been put in excellent condition. The credit is due Paul Dahlstrom for getting the work done. He works Friday of every week on the line, having a day off from his regular work for the railroad company at this time.

Mr. and Mrs. Chas. Scott of Union, spent a few days this week with her daughter, Mrs. George Carnes.

OUTBURSTS OF EVERETT TRUE

By Condo

WELL, HOW ARE YOU TODAY, MR. TRUE? I HAVE A BUSINESS MATTER THAT I THINK WILL INTEREST YOU, AND I CAME IN TO TALK IT OVER WITH YOU. NOW,--

I'M WILLING TO TALK IT OVER, BUT WE WILL HAVE TO TALK IT OVER THE 'PHONE!! EITHER THAT OR YOU'LL HAVE TO LET IT GO FOR ANOTHER TWENTY-FOUR HOURS TO ALLOW THE ONIONS TO EVAPORATE!!

HOLD YOUR TAT OVER YOUR TRAP TILL YOU GET OUT!!!

Coins of the Period Of Roman Rule Over Great Britain Dug Up

LONDON. (AP)—Interest in excavation of Roman remains seems to be receiving new impetus in many parts of England and work being carried on at Portland on the Somerset seashore is yielding highly important results.

These excavations had their beginning after a ploughman casually turned up a small quantity of coins, which upon examination were found to be of Roman origin. The work has now been taken in hand, by an archaeologist, R. E. Godwin, who reports the recovery of no fewer than 4,000 coins.

"I have already found 4,000 bronze coins," said Mr. Godwin, "and many more are being added from day to day. They are in excellent preservation and date from A. D. 22 to A. D. 400 (21 years before the Roman conquest of Britain).

to just before the final evacuation."

"They belong to practically every period of the Roman Empire, and it is remarkable that apparently no two are exactly alike. The field in which I am working was used by the ancient Britons as a camp, and this was afterwards taken over by the Romans."

BIRD BABIES PHOTOS

Never attempt to photograph bird babies until they are sufficiently sturdy to be taken from the nest without harm, says Nature Magazine. The best time for juvenile portraiture in birdland is just prior to the breaking of home ties, when the youngsters are fully feathered.

The Torrey pine, now vanishing, was named in honor of John Torrey, professor of botany in Columbia University, says Nature Magazine. He visited California and studied its flora long before the transcontinental railroad.

CALVES SENT TO PORTLAND

COVE (Special).—The Boys' Calf club shipped their fat calves to Portland Tuesday.

George Miller has purchased a new Dodge sedan car and is building a garage for it.

Mr. and Mrs. Ed Clark and children are visiting at the George Miller home.

Mr. and Mrs. Wallace Clark, after spending the summer at the Johnson home, after moving to the William Woodruff home near Union. Edson Clark remained with T. H. Johnson for the winter and will attend Cove high school.

Clifford Knight and Louis Lank are hauling hay from the Becker farm this week.

Ed Miller of Union has a bunch of sheep on the stubble fields of the S. W. Koger farm.

Mrs. Leah Becker and Mrs. L. V. Johnson of La Grande, were cow visitors recently.

The rain was welcomed by the farmers, but it has not ruined enough yet for plowing.

Nelson Knight left last week for Raymond, Wash., and will visit friends and relatives for a couple of months.

Mrs. E. W. Borgren and children and Mrs. Waldo Richardson and children returned to their home in Leavenworth, Wash., last Thursday.

A. L. Becker and T. B. Johnson spent the fore part of the

week in the vicinity of North Powder buying sheep.

PUT IN DATE BOOK

The Andromeda appears to come from the direction of Andromeda in the evening hours about November 23 or 24, says Nature Magazine. Then there are the Taurids, several different groups appearing at different times during the month from different points in Taurus. These also will appear in the evening hours from the direction of Taurus nearly due east.

WHALES THROAT SMALL

The blue whale sometimes reaches a length of 80 or 85 feet, says Nature Magazine. The average length of one of these monsters is no larger than 10 or 12 men can stand upright in its length, and the throat measures only about eight inches in diameter.

The organizers expect to demonstrate the superiority of many Argentine manufactured goods over similar foreign products, and that there is no necessity of pretending they are imported in order to make them salable. Many manufacturers have complained that they are unable to sell their goods to retailers unless they bear American labels.

Argentina Shows Pride In Home Manufacturers

BUTENOR AIRES. (AP)—An industrial exhibition intended to show the progress attained in manufactures in Argentina, and with the hope of discouraging the practice of putting foreign labels on Argentine-made goods, will be held in Buenos Aires in December. It is being organized by the Argentine Industrial Union under the auspices of the government.

The organizers expect to demonstrate the superiority of many Argentine manufactured goods over similar foreign products, and that there is no necessity of pretending they are imported in order to make them salable. Many manufacturers have complained that they are unable to sell their goods to retailers unless they bear American labels.

English, German, Italian or French labels, and they welcome any propaganda such as this exhibition to show that Argentine wares are as good as or better than the same class of imported ones.

The organizers believe the public will be surprised to see the enormous strides made in Argentine industries since the last industrial exhibition held in Buenos Aires in 1910, and the variety of goods made.

WHALES HAVE GONE

Captain Scammon, a noted authority on whaling, estimated, according to Nature Magazine, that about 183,200,000 gray whales were on the California coast during the period from 1919 to 1922 only one was captured there.

Corn is found among the relics of the most ancient tribes of Indians, says Nature Magazine. It was cultivated by all the agricultural natives of which there is any record.
