

IMBLER BUSY MOVING FRUIT

IMBLER (Special). — Another week will find practically all of the apples in this vicinity shipped. Although the applesmen received a better price for the apples this year than last they have not received the full amount of it, as some received only enough to pay expenses.

Miss Mae Turman is visiting friends at Wallowa.

Mrs. Ella Walker visited friends at Wallowa recently.

Frank Miller was a visitor at Wallowa Monday.

Roy Morris recently received three fur-bearing rabbits from England. They are silver gray. He paid \$55 for the three and expects to build a first class rabbit farm.

George Marshall returned Tuesday from a trip to Iowa. In speaking of the apple market he reports that the market is pretty good in the east.

Mrs. Oscar Howell and children returned home Tuesday morning from a visit with friends at Wallowa, Wash.

Mrs. Lola White came to Imbler from La Grande Sunday and spent the day with Mrs. William Higgins.

William Buckman and son, Harvey, went to Elgin Monday evening to see "The Shepherd of the Hills."

Mr. and Mrs. Allie Watson and family, Chick Cleaver, Marvin Guire, Miss Isabelle Prior and the Rollins were among those who went to Elgin to see "The Shepherd of the Hills" the first of the week.

Frank Wilson brought two of his and Mrs. Leo Clark's boys out from Maxville Saturday evening.

WHY NOT SENTENCE SPEEDERS TO PUBLIC HUMILIATION?

SHIPS STOCK TO PORTLAND

NORTH POWDER, (Special) — Several carloads of stock left the North Powder yards for Portland recently. Among them were one and one-half carloads of cattle shipped by James Wilson, one load of hogs shipped by Len Davis and two carloads of hogs from the Bidwell-Evans Grain company. Frank Bidwell accompanied the shipment to Portland.

Mrs. Emma Clark arrived in this city Saturday and after making a short visit with relatives here left Monday for a point near Santa Barbara, Calif., where she will spend the winter.

Mr. and Mrs. Frank Castor and two small daughters, of Haines, visited with friends at North Powder recently.

Mr. and Mrs. William Tally and son, Milo, left Wednesday for Roseville, Calif., where they intend to make their home. Mr. Tally will be employed in Roseville as an electrician in the P. E. company.

Mr. and Mrs. L. J. Graffe, who purchased the Wm. Tally residence, moved into their new home a few days ago.

Mr. and Mrs. E. G. Buchanan, Mrs. John Gilkinson and Miss Opal Gilkinson motored to La Grande Sunday.

Mr. and Mrs. A. G. Angell were Baker visitors Monday.

Russian Families Split On Children's Religion

MOSCOW, (AP) — The question of the religious education of children is one of the great problems of the Russian people. Frequently it is the cause of dissension between father and mother, leading to divorce and separation. In many cases the state has been called upon to settle disputes arising out of this question. A unique case recently came before a Moscow judge. A wife complained that her husband had objected to the Christianizing of their children, for which reason she left him. She demanded from her husband sufficient money to rear and educate the children, which the husband refused to pay, arguing that his wife intended to give religious instruction to the children. The father then took the case into court and asked the judge to place the children in a children's home in order to save them from the influence of their mother. The judge, who was a Communist, evaded both points, but ordered that the children be returned to the father without any payment to the mother.

Imperial Papers in London Fall Into Soviet Hands

LONDON, (AP) — After extended negotiations, the Soviet delegation here is in possession of Chesnam House, the former Imperial Russian embassy, as well as the Imperial archives housed there. The Soviet government arranged to take over the lease of the house from the executors of the late Count Benckendorff, the last ambassador of the Czar to England, and it has been recognized by the British government as the "de jure" government of Russia. Its claims to the state papers could not be resisted.

GEARSHIFT END IS AIM NOW OF FRENCH EXPERTS

PARIS, (AP) — The death of the gearshift in automobiles after it has been announced, but the general has never taken place, the latest advance notice of the ending of the gearshift and the differential is a complicated mechanism shown first at last year's auto salon, and exhibited again in perfected form this year by one of the best makers of France.

It has been tried for two years in trucks and some test cars, but probably won't get on the market until next year. It is a series of ratchets automatically thrown into action progressively as the car gains speed so that the motor continuing to turn at normal speed, applies its power, what corresponds to a very low gear at the start, and at an increasingly higher gear as the speed increases, until direct drive is reached.

As there is neither differential or gearshift the driver has only to start, let in his clutch and tap on the accelerator. The amount of gas alone determines the power applied, and the speed dependent upon the power required to move the car.

Besides simplifying a car, this mechanism is intended to obviate shock to the engine and prevent stalling the motor. If a heavy load were put suddenly upon the engine the mechanism automatically would adjust itself, hanging the gear to a lower one that would allow the engine to maintain an efficient speed while propelling the car at a slower rate.

OCEAN HELPS FORECASTERS

SAN DIEGO, Cal. (AP) — There is a direct relation between the temperature of the ocean and the seasonal rainfall in the same region, according to George F. McEwen, of the Biological Institute at La Jolla, Cal., who has reached this conclusion after extended research.

Using this theory Mr. McEwen has predicted that the rainfall in San Diego and vicinity this year would be five inches more than the average for the last eight years. According to the hypothesis, low summer temperatures in

the ocean mean increased rainfall in the winter, and higher temperatures indicate less precipitation.

"The moisture of the air over the North Pacific ocean," explained Mr. McEwen, "is continually replenished by evaporation from the ocean surface. The amount of water vapor available for precipitation upon the land is proportional to the mass of air flowing in from the ocean."

"It has long been known that a high pressure area over the North Pacific, centered 1000 miles or more west of San Luis Obispo, reaches its maximum intensity in late summer and diminishes till about February, when in some years it disappears entirely, and again increases to a summer maximum. Therefore a summer in which the ocean 'high' is relatively great should be followed by a relatively great transfer of air landward during the winter or rainy season. Numerous barometric observations over the ocean, suitably

distributed both in space and time, would serve to determine the amount of air forming the Pacific 'high.' Foreknowledge of the amount of air available for transfer landward would indicate in advance whether to expect a wet or dry season."

Mr. McEwen said his observations had indicated that a change in ocean temperature of one degree Fahrenheit corresponded, on the average, to a difference of two inches of rain over the coastal region of southern California.

Exhaust Fumes Searily Fatal
CASCADE LOCKS, Ore. — Charles Rayston, 46, of Cascade Locks, barely escaped death while he was returning from Wyeth in the back of a covered truck. The poisonous fumes from the gasoline in the exhaust affected him to such an extent that, although the distance is only 7 miles, he was partially paralyzed and very much dazed when the truck arrived here.

Expert testimony

Five of the best-known cooking authorities in the country conducted the tests — with ten different kinds of foods.

Each dish was cooked twice, from exactly the same recipe, except that plain milk was used in one batch and Borden's Evaporated in the other. The two samples of each dish were served to groups of men and women who knew nothing about the purpose of the test. Each person was asked whether he could tell the difference, or which he preferred. Here are a few of the results:

Soups: seven out of eight preferred the soup made with Borden's Evaporated.

Creamed Carrots: five out of seven favored Borden's.

Creamed Potatoes: everybody voted for the Borden dish.

Muffins and Creamed Chipped Beef: six out of ten preferred Borden's; three of the others couldn't tell the difference.

They proved beyond question that Borden's Evaporated Milk is exactly as good as plain milk for all cooking — while for many dishes it is better.

the taste tells

Recipes of the ten delicious dishes prepared by the experts for these tests, as well as details of the experiments, are given in our booklet "Ten Cooking Tests." Write us for a FREE copy today.

Mugglers Across Irish Line

LONDON, Ireland (AP) — The smuggling of dutiable goods from Londonderry into the Free State has lately reached such alarming proportions that private troops have been drafted to the border in order to suppress the traffic.

If this step does not suffice, it is proposed to close certain roads with barbed wire to prevent the passage of merchandise until it is thoroughly examined, to empty all carts, motors and trains for such examination, to forbid all traffic across the borders after 5 p. m., and to make a thorough search of each person crossing the line.

They still worship the sun in India. We may do the same this winter.
