# A New Year's Resolution

At the beginning of a new year, when you look back on the hard work and drudgery and inconvenience of the last twelve months, and look forward to the pleasure and comfort and convenience of the months that are to come—when you are thus taking stock of the past and anticipating the future, have you made a resolution to let electricity and modern methods play its proper part?

Women already appreciate the advantage and desirability of "doing it electrically"—most of them know by experience that electric appliances save endless labor, time, and materials. More than that—and here is the point that should interest the man in every household—they save money. Appliances will pay for themselves while adding untold pleasure to the joy of living and home making.

So we urge every household to resolve to enjoy life more in 1925—to have less drudgery and more pleasure, to substitute leisure for hard work, to inaugurate modern economy in place of old-fashioned extravagance. We will be glad to show you how this can be done in your own home.
