LOGS FREED BY FRESHET

EUGENE, Ore. — Two million feet of logs have been taken down the Siuslaw river by the recent high water to the boom of the Siuslaw Room company, near Chishman, where they will be stored until marketed.

It is thought that there is 1,000,000 feet of logs still in the river to be floated down later. Most of the logs are shipped by rail to Coos Bay.

HEALTH

(By Frederick Stricker) Cough is perhaps the commonest affliction from which the human family suffers. Not in itself a disease, it is an indicator of disease. It is a "stop, look and listen" sign which nature hangs out to warn of trouble.

CHURCH TEAM TO VISIT CITY

Announcement was made this morning of a visit scheduled for this coming Sunday by an Every Church Visitation team of the Synod of Oregon for the Grande Ronde Presbytery. This team will be in the local Presbyterian church this coming Sunday morning and evening with the general public invited to hear their message.

The Rev. W. L. VanNuy, educational director of the state representing the Board of Christian Education; the Rev. D. A. Thompson, D. D., the Synodical Executive for the state; the Rev. Wm. Baird of Baker representing the Board of Pensions; and the Rev. F. M. Gault, a returned missionary from the Cameron, Africa, will comprise the team and will present the world-wide work of the church from an educational and informational viewpoint.

The general public should feel that an opportunity is presented in this invitation to learn of the work which the church at large is doing in the world," states the pastor.

Do not wait until it is too late. You may think that in these health talks the necessity of calling a doctor early and frequently is over-emphasized. That is not true. We see so sad results due to neglect to call a physician early that we cannot over-stress its importance.

"The principal causes of cough are inflammation of the mucous membrane lining the air passages. This membrane begins in the nose and ends in the air cells of the lungs. In this group are common head colds, sore throat, bronchitis and pneumonia. Cough with bronchitis is often associated with the beginning of typhoid fever, influenza, measles or some other acute communicable disease.

"One of the commonest causes of cough is smoking. Nervousness is a frequent cause of cough, usually manifesting itself as a part of the general condition. Many times a habit accounts for cough. The mild cough, the slight hacking cough, the cough that you think comes from the throat, the cough that occasionally produces a little mucus and yet is not annoying or does not make the person feel very ill or uncomfortable—that is the cough that should be thoroughly investigated. That is the cough that may deceive you. That is the cough that frequently means the beginning of lung tuberculosis. You cannot afford to buy lozenges at the drug store for that cough, because if you do, you may delay a correct diagnosis upon which successful treatment depends. Every cough is not tuberculosis, but almost every person with tuberculosis coughs. This makes the diagnosis of every cough imperative if you wish to prevent disaster.

"Just a word should be said concerning the protection of others. If you have a cough, play fair with the other fellow; cover your cough. Use your handkerchief to do this. Do not cough into your hand and then shake hands with another person. The little particles of moisture coughed out carry germs of whatever disease you may have. If you have a cough that has been hanging on for some time, go to a doctor for examination and follow his advice.

LADIES AFTER COUNTY NURSE

ENTERTAINMENT, Ory. (Special)—The question of a county nurse was subject for a brief conference of the county court and of members of the public health association recently. The visitors reported to the court that the public health association and the Red Cross chapter had about \$500 on hand, and an automobile, which they offered to the county to help maintain a nurse. Several expressed their belief in the value of a nurse, but the court was not urged, and the matter was left in its hands, states a local newspaper.

Among the members of the visiting committee were Mrs. C. G. Holst, Mrs. Dudley Richards, Mrs. W. E. Loeffel, and Mrs. J. F. Hanson of Joseph, Mrs. Chris Johnson and Mrs. E. G. Seaman of Lentine, Mrs. E. B. Whitaker, Mrs. G. I. Ratcliff, Mrs. F. A. Moody and Dr. C. T. Hockett of Enterprise. Particular emphasis was laid by the speakers on the great service to children in the schools rendered by a nurse.

No appropriation for a nurse was made in the 1925 budget and the court asked if additional financial help, beside that already on hand and offered, could be expected later. No one could give a positive reply. Funds on hand include a little more than \$100 in the treasury of the Red Cross which also owns a coupe, and more than \$500 Youth's Companion; in the public health association treasury. The Red Cross car was bought in the spring of 1923 and

was used that year by Miss Della Pearson, then county nurse. Since then it has been in storage.

The public health money has been accumulated gradually thru several years, and consists chiefly of the county's share of sales of Christmas seals. Last December, these seals brought in \$425.42, according to reports received to date, sales in four towns being: Enterprise, \$254.49; Joseph, \$76.54; Lentine, \$27.55, and Wallowa, \$66.88. About half of the \$425.42 will have to be sent to the Oregon State Tuberculosis association.
