Progress in Standardization Comes Slowly in Europe

DUBLIN (AP).— Germany is struggling to establish a general standardization in industries and the progress which has been made was reported upon recently at a meeting of industrialists.

Dr. F. Neuhaus, director general of the Thersig works, who is chairman of the standardization committee, gave a survey of last year's efforts. Tools have been standardized to a considerable extent. One great forward step has been the standardization of the threads on pipes.
