

PETITION BY ELGIN PASSED

ELGIN. (Special)—A delegation of business men went to the county court at La Grande Thursday with the petition urging the court to assist the people of Elgin in building a road into the Phillips creek region directly west of town. The venture was successful and the court has promised to appropriate a sum of money equal to that raised here. This new road will be very beneficial after the new planning mill has been built.

At a meeting last Tuesday night the A. C. club had as its guest William Moore, who is the man backing the new planning mill for Elgin. Final details were discussed at the meeting and committees appointed to go ahead with the work. Wednesday evening Mr. Moore went to Portland and he and Mr. Weather- spoon will meet there with railway authorities to complete plans for building a side track on the site of the planer. As soon as this is completed work will begin on the building. It is expected that the machinery will be installed by the first of June.

County Sheriff Hueschler spent Sunday with his family here. Mrs. Quintin Willy and son, Ralph, were visiting with Mrs. Willy's parents, Mr. and Mrs. Joseph Scott, this week.

Mrs. Jennie Greiner came to Elgin Friday to spend some time visiting her daughter, Mrs. C. C. Cates.

Mrs. J. C. Rive spent one day last week at Mission on business. Several new radio machines have been installed at Elgin in the past few weeks. D. A. Barnes has had his in use for two weeks. Rude Ohms has one ready for installation. Earl Chandler plans to have one in use in a few days and A. Klooster, C. I. Haxand and E. E. Harman, each have a new set.

Mr. and Mrs. Nicolson plan to move to a small ranch near the northern edge of town, where they will have several acres in orchard and several in grain. Mrs. Nicolson is a teacher in the public school here.

Mrs. Rex Boulet has been quite ill at her home in Cricket Flat.

L. H. Buckley is now proudly displaying a new truck recently supplied to him for use in his work with the Eastern Oregon Light and Power company here.

Nels Nelson came in from the

For Sale Or Trade

104-acre farm one mile from Elgin, well improved; 55 acres in cultivation. Will trade for La Grande property.

160 acres, three miles from La Grande, well improved; stock and equipment goes with the place. Fine dairy ranch. Will trade for Apartment or Rooming House in La Grande.

FOR SALE—A small grocery store in La Grande doing a good business. Also the store building and residence.

Six fine building lots within one block of Stange's new home, \$500.00 each. Will give good terms.

Wallowa County lumber camps last Friday. He has been working in that county for the past several months.

The Home Economics committee of the Cricket Flat Garage will serve lunch for the county farm conference to be held here next Thursday. The members of the Elgin Ad club will furnish the meal and the women will prepare and serve it. The forenoon program will be put on in the city hall and the committee work in the afternoon will be held in the high school building.

Mr. and Mrs. Thomas Baird of Baker have moved to Elgin where Mr. Baird is employed at the G. M. store, in charge of the shoe and dry goods department.

The Pythian Sisters prepared and served a dinner last Tuesday evening to the Ad club and a few guests. Floyd McKennon, of La Grande, was toastmaster.

Mrs. W. F. Hug spent several days last week in La Grande, where she was under the care of specialists. Mr. and Mrs. Claude Holbrook brought her home last Wednesday evening, returning to their home in La Grande Thursday morning.

HEALTH

THE NEW GOLD CURE FOR TUBERCULOSIS

(By Dr. Frederick Stricker)
It is not remarkable that gold has been considered since remote antiquity to have curative qualities. Its rarity, its luster and above all, its incorruptibility or in modern terms, its resistance to oxidation, make it the perfect metal. Many famous physicians have used gold in the attempt to cure disease.

The theoretical cure of a germ disease is simple. To effect it all we have to do is to find a substance that will kill the germ without killing the patient. Unfortunately, most disease germs cannot be destroyed in the patient's body without endangering the life of the patient. Up to the present time these efforts have resulted in their culmination in the brilliant results secured by Ehrlich and his co-workers in the use of arsenical compounds in syphilis and sleeping sickness. Compounds of antimony and silver have also been found to be effective. A very large number of attempts have been made to poison the tubercle bacillus within the human and animal body.

In 1894 the gold cure had a run of popularity. The results were decidedly conflicting in regard to the value of gold as a curative agent, but it was definitely shown that gold compounds have a strongly inhibiting effect upon the growth of the bacillus of tuberculosis in the test tube. The most recent experiments on gold in tuberculosis are those coming from the laboratory of Prof. Holger Moolenaar in Copenhagen. He injects a gold compound which he calls "Sanacrysin," a double salt of gold and sodium thiocyanate. The salt is entirely harmless provided the tissues are healthy, a violent reaction, if they are tubercular. This severe reaction is a result of liberating large quantities of poison derived from the bacteria following their destruction by the gold salt. To counteract this injurious effect a horse serum is injected which has been prepared by injecting the blood of the horse with small quantities of dead tubercle bacilli over a long period of time. This specially prepared horse serum is believed to neutralize the poison coming from the gold-killed bacteria. The claims for "Sanacrysin" as a cure for tuberculosis have not been proven. This cure is still in the experimental stage and much work must be done before it can be given to the world as a reliable treatment for tuberculosis. Tubercular patients are advised not to place false hopes in the many highly exaggerated statements regarding the gold cure that have been made by various people.

In view of the serious danger involved in the use of gold compounds and in view of the extended study now being made, patients afflicted with tuberculosis are cautioned not to be unduly optimistic in regard to this treatment. No patient should discontinue the well known methods for the cure of tuberculosis by proper regulation of their lives with special emphasis upon rest, food and fresh air under competent medical direction.

Contagious disease report for week ending February 28, 1925: Tuberculosis 20, typhoid 1, diphtheria 24, poliomyelitis 1, ophthalmia neonatorum 1, scarlet fever 35, chickenpox 25, whooping cough 12, measles 4, smallpox 45, mumps 18, influenza 8, lobar pneumonia 1, pneumonia 1, pneumonia 4, erysipelas 4.

Fortune, II—

Captain A. T. Blake of Wilkie, Saskatchewan, will receive the largest part of the \$48,000 estate of his uncle, Colonel Arthur G. Blake of England, if he swells before 1929; remains in Canada until 1927, encourages fox hunting; visits his mother's birthplace and also the spot where his father was killed in the Boer War.

Barton

James P. Barton, adjutant of the Iowa department of the American Legion, has accepted the post of national adjutant, tendered him by Commander J. A. Drain.

Ireland Prepares to Dam Heavy Flow of Liquor

DUBLIN (AP)—The Free State government has appointed a commission of nine persons to inquire into the excess in the number of drink shops. There are more than 15,000 in the 26 counties. Some small towns have as many as 70 shops where drink is sold. It is agreed that at least half the number should be abolished, and the work of the commission is to find out what scale of reduction should be adopted.

As in England, which has seen a large reduction in the number of drink shops, the problem of compensating the dispossessed has to be faced. The report of the commission is intended to form the basis of future legislation.

Figures Show Germans' Feeling About Liquor

BERLIN (AP)—The faces of hard liquor distillers at Halle grow long when one asks them how business is. They relate that during 1924 only 1,000,000 hectoliters (over 26,000,000 gallons) of distilled liquors were consumed. Before the war, they say, Germany used to be good for 4,000,000 hectoliters and more.

When statistics first began to be assembled on this question, around 1820, the annual consumption was about 1,200,000 to 1,500,000 hectoliters. From 1900 on the consumption was at least three times and usually four times what it was in 1924.

It does not necessarily follow from this that the use of alcoholic drinks in Germany has declined to one-fourth the pre-war consumption. It must be remembered that many farmers, for economic reasons, make their own liquor. Nevertheless, it is safe to say that hard liquor is no longer consumed in as large quantities as before 1914.

Drunk men have become such a menace and nuisance at some railway stations and on trains in Germany that railway officials have issued a general order to conductors to remove all intoxicated men from railroad property and deny them the right to travel until they are sober. Employees are instructed to tell drunkards that they are denied the right to travel for their own safety, as well as for the protection of the public.

Prof. Reimberger, rector of Bonn University, made the opening address at the conference recently held in Bonn by organizations fighting alcohol. He said that built of Germany's atmosphere and principles would be superfluous if it were not for the crimes committed under liquor, and said he was in favor of treating drunkards in special institutions, as well as preventing them from getting liquor.

On the occasion of the fifth anniversary of American prohibition, the newspaper Vorwarts gave a long review of the statistics concerning the temperance movement in the United States and said in conclusion: "The working classes of all countries, and particularly of poverty-stricken Germany, have good reason to support the anti-alcohol movement and hasten the coming of a prohibition law."

The Fontana way of making real egg noodles assures you of noodles which are rich in flavor and free from unwholesome starchiness. Think of this when you buy. Then you will insist on Fontana's. At your grocer's—only 10 cents.

SNOW MELTING IN MOUNTAINS

COVE (Special)—According to the forest ranger, P. M. Ellis, who has just returned from a trip to the Big Minns, the snow on the mountain at Mill creek pass is 73 inches deep and wet all the way through, showing that it is melting, a thing that is almost unheard of at this time of year.

If present warm weather continues the snow will soon disappear in the mountains. On the mountain ranges the snow is from four to six feet deep, but is melting everywhere.

Quite a variety of playground equipment has been purchased by the school board, including swings, slides, baseball outfits, etc.

R. Z. Butler is again Cove's tonorial artist. Alvin Lloyd, who has presided there for the past

year, has resigned his post, receiving congratulations on the birth of a daughter, Monday, March 2. Thomas Towle is busy reseeded Monday evening the following officers were elected: H. H. Barker, president; J. E. Miller, vice president and I. G. Lentz, secretary treasurer.

The plans for the new community hall are developing and a tract of land opposite the Baptist church has been chosen for the site. Mr. and Mrs. Russell Fulp are good.

Mr. and Mrs. Jack Fletcher, who have been on the sick list, are slowly recovering. If he advertises it, he knows it's

The woman who entertains well...

THERE'S something indescribably fine about the woman who entertains well. From the cheery appearance of her home to the service she so deftly affords—everything is so natural—yet so charmingly different.

Such splendid hostesses, once very rare and belonging only to the idle classes, are now to be found everywhere. They grace homes in every walk of life—making them happier through the many friends they attract.

Advertisements keep these women ahead of the commonplace. Advertisements tell of the newest and most delightful things. Advertisements announce new customs and practices. They tell what the world approves as correct.

The woman who entertains well must read the advertisements. Not only to keep pace with progress—but to learn how to do so on a limited purse. For the advertisements are more than harbingers of style—they are announcements of economies that may be practiced safely.

Read the advertisements—to know what is new, what is correct—and what is economical.
