

### SCIENCE TO PROVE CASE

LONDON, (AP)—Efforts to solve the mystery of the "human head squarer" a tribe of which almost nothing is known and which lives in the wilds of the mountains between the main Amazon basin and the northern Andes, is to be one of the aims of an exploring expedition to South America to be made next summer by Dr. William M. McGovern, one of England's most famous anthropologists. Dr. McGovern, who was born in Brooklyn, N. Y., visited Iquitos, the Peruvian city of 100,000, distinguished in a 10-day visit last year, and has headed numerous other expeditions in various parts of the world in the interest of anthropological research work.

The "human head squarer" who has a way of reducing the heads of their victims to the size of a person's hat, according to Dr. McGovern, also are supposed to be the possessors of gold and diamond mines in their native haunts just to the north of the Amazon jungle. The Londoner plans to spend about ten months in their midst, studying their habits and customs. No white man has ever solved the process of how heads are reduced in size without so much as distorting any of the victim's features and in the interest of science Dr. McGovern hopes to be able to overcome this riddle in the course of his explorations of this tribe and its haunts.

Dr. McGovern plans to leave London early in May and in the trip across the Andes will cover parts of Brazil, Colombia, Ecuador and Peru where no white man is far as known, has ever before set foot.

Dr. McGovern will carry a wireless receiving set, cameras and other apparatus necessary for expeditions of this kind. He proposes to make observations and drawings which will be of future value.

use to scientists throughout the world.

"I shall be particularly interested in anthropological research work in the Amazon basin where interesting remains, such as great rock temples, of prehistoric tribes, are supposed to exist but to this day have never been seen by the white man," said the explorer. "Diamond and gold nuggets have been brought from some of the natives on the edge of the unexplored country, and there is a belief that the natives have discovered mines within their native haunts from which they extract the precious stones and metal now and then. These natives of the interior have not even been seen by white men, so far as I know, and have been carrying on feuds for generations with all persons, white or black, who have attempted to invade their territory."

The expedition will terminate at Lima, Peru, perhaps early next year, from which place Dr. McGovern will go to the United States before returning to London.
