Why Is A Building & Loan Investment Both Safe and Desirable?

Any building and loan association, organized under the laws of Oregon as is the La Grande Association, is a safe and sure investment because for every \$1000 loaned the Association must deposit with the state securities having a value of not less than \$2,100.

With such securities your investment is twice safe, and the securities must stay on deposit until the loan is completely paid off. Each month each loan becomes less, but the security remains the same, making your investment all the more protected.

A Guarantee of 7%

The La Grande Association is not organized for profit except for the indirect benefits to the community from having home investments made at home, and it can therefore guarantee a 7% return, backed by its ten directors, some of the most successful business and professional men in the city.

Building & Loan stocks is available in amounts of \$100 or more. Drop in at the office or ask a representative to call at your convenience.
