

# ODD FELLOWS IN ROLL CALL

UNION, (Special)—Friday evening the Odd Fellows lodge held their first annual roll call with the Hebekeas and a few invited guests present. Besides the roll call there was a short program followed by light refreshments. The lodge plans to make this an annual event like many other lodges keep the date.

Wallowa high school girls were here Saturday for a return game of indoor baseball with the Union High team, which was played Saturday evening at the school gymnasium. The score was 6-6 and Union 25-10. The game was rather in the nature of a marathon, as both teams played no more than fifty scores during the nine innings. A tied score, 57-57, followed the teams back onto the floor after they had retired to the dressing rooms, and after another inning the visitors had 66 and Union 25.

The visiting girls were entertained by two of the local high school organizations, the Booster Club giving them a chicken dinner at five o'clock, and the Tom Cuts serving a lunch after the game.

Mrs. Stella Kennedy is here from Boise for a short visit with her parents, Mr. and Mrs. Jenkins.

Miss Fiddle Miller, who has been spending her spring vacation with her parents, Mr. and Mrs. Ed Miller, returned to her school work in Portland the first of this week. Miss Miller is a student of St. Helena High School.

Quite a few nice fish, both steel heads and rainbows are being taken from Catherine Creek, most of the fishing being done close to Union.

W. O. Hargerty who has been at Hot Lake for several weeks, recovering from a combined attack of flu and pneumonia, has so far improved as to be able to return to his home here in Union.

**Play Given**  
The agriculture department of the Union High School staged Saturday evening at the school gymnasium their play, "Yonnie Yanson's Yob."

a comedy-drama in three acts. The parts were well delivered by all the cast and the play thoroughly enjoyed by the audience. The money raised by this play will help defray the expense of the stock judging team on their annual trip to the Pacific International stock show in Portland.

Lights frosts and freezes during the past week did some more damage to the fruit, especially to the varieties which are in full bloom. It is not believed that the prune crop is much injured, but the market cherries will be a short crop this year in this vicinity.

The field and track meet, with Baker at the latter place Saturday resulted in a definite victory for the Baker boys. Although the Union outsiders came out first in several events, the total score for Baker was about twice that of Union.

Mrs. George A. Seibert, wife of the editor of the local weekly newspaper, left Thursday for an extended trip into Washington. She will visit her son, P. Seibert in Mr. Vernon, Dale another son, in Spokane, and also with friends in Portland. A trip to the Canadian border will probably be included in her itinerary.

**Boy Scout Meeting**  
A special Boy Scout meeting was held at the Presbyterian Church Sunday evening, when several boys were examined by a committee of local men, for merit badges.

Mr. and Mrs. Earl Garrison came down from North Powder and spent Sunday visiting with Mrs. Garrison's parents, Mr. and Mrs. Garrison. They returned to Powder Sunday evening.

Lyle Wilson and Mr. and Mrs. Ray Wilson were over from Imbler Sunday visiting with their sister and brother-in-law, Mr. and Mrs. Fred Fox.

Sunday evening services at the Methodist church were dismissed and the members attended the Scout services at the Presbyterian church. Sunday morning both congregations attended the Methodist church for the special Odd Fellows meeting.

Edgar Wilcock and family were here from La Grande Sunday the guests of Mr. and Mrs. W. V. Connor.

**Colter Survey**  
A colter survey under the direction of Dr. Gilmore was made in the grade and high schools here last week. The result was made showed a great number of indications of colter, especially among the girls of the intermediate grades.

A telegram was received Saturday by the local Odd Fellows announcing the death of Albert Cummings at Medford, Oregon. Mr. Cummings will be remembered as having lived in Union several years ago. The funeral services will be held in Medford.

The arrival of a car load of lumber will see the Catherine Creek bridge just below the state hotel, completed within a few days. All that is lacking now is the floor of the bridge.

Much more interest is being manifested here in the annual stock show since the weekly meetings have been resumed on each Wednesday at the city hall.

Odd Fellows and Hebekeas attended the Methodist Church Sunday morning and listened to a sermon on the principals of their order by the pastor, Rev. C. A. Quinn. The members of the two orders assembled at the hall and marched in a body to the church for the services.

Care of the city park and the library grounds, which adjoin the park, has been placed under the direction of John Ferguson who will look after the new shower baths which have just been installed for the benefit of tourists in the camp grounds.

## Arch of Human Foot Is Remarkable Structure

The world's most wonderful arch is the arch of the human foot, according to an article by Dr. Geo. W. Goodie in the May number of the Osteopathic magazine.

It is a little arch and it is flexible, and yet upon one end of it we put a weight of anywhere from one hundred up to three or four hundred pounds, depending on how much we weigh and how much we are carrying, at every step.

The arch not only has to support this weight, but has to become a moving arch, adjustable to undulations or variations in the surface over which it moves.

There are other archways in the world, in bridges or doorways, in windows, in triumphal arches, but in complexity and efficiency, the arch of the human foot is in a class by itself.

**Film Agents in the Balkans**  
Victims of Sharp Practice

BERLIN (AP)—Picture pirates keep American moving picture agents on the jump in the Balkans. There are no copyright laws and treaty provisions which protect American films in Turkey, Rumania and Bulgaria, and consequently these countries are the happy hunting ground for film thieves. A film stolen in transit is copied and the copies sold in the Balkan countries.

As a result of this illicit trade, American producers are now rushing their new films immediately to the markets where there is no protection, and selling them before pirates have a chance to get hold of them.

It is not uncommon, according to film agents in Berlin, to discover American titles of the most expensive sort showing under another title in the cinemas of Turkey, Bulgaria and Rumania, where the moving picture men swap their fingers at agents who demand rent, and dare them to try to collect it, the courts.

Probably spurred on by crossword puzzles, a statue of the Babylonian moon god has been found.

# TURNOVER IN LABOR LARGE

PORTLAND, Ore. (Special)—A curtailing of falling and bucking operations in some of the producing districts, and a heavy labor turnover in both camps and sawmills west of the Cascades, featured last week's employment situation, according to reports from 41 employment service offices in various northwestern cities received at 41 headquarters here today. Labor turnover in the logging camps was the largest it has been this year.

Woods work in the pine districts of eastern Oregon and Washington and in Idaho, is becoming more active, the reports show, and river driving, sawmilling, mining and agricultural work have greatly reduced the unemployed there. Condensed reports from the various 41 offices follow:

**PORTLAND**—The largest labor turnover of the year was noted last week in logging camps along the Columbia river and in adjacent territory; more than 100 loggers left town daily for replacement jobs. An increased turnover of sawmill help also continued throughout the week. There has been but little change of operating schedules in either camps or mills of this district. The Ladies Logging company at Sweetestill on the Kerry line closed the camp temporarily, and the St. Johns sawmill, Portland, has been shut down. The camps of the Oregon Lumber company at Dee, a high-level operation, have started logging for the season. Farm jobs are plenty. Demands for construction workers have fallen off.

**ABERDEEN**—Fallen and bucked trees have been left off at camps of the Aloha, Wagoner, Independence and Greenwood logging operations. A large surplus of logs has already accumulated in Gray's Harbor waters. Operating schedules of local sawmills remain unchanged from last week. Labor turnover has been large.

**TACOMA**—There are not very many idle men in this city. Logging and lumbering continue to operate on practically the same schedule as for the past month. After a layoff of several weeks the night shift at Mill C of the St. Paul & Tacoma Lumber company has resumed work.

**SEATTLE**—Demands for all kinds of labor fell off during the last week. Some camps have laid off fallers and buckers. Local sawmills are operating on the same schedule as for weeks past. By far the greater number of jobs now on local boards is for farm work. Heavy rainfall during the past

week has slowed up all outdoor construction.

**SPOKANE**—Summer logging is getting under way and the demand for woodmen is increasing. Practically all the sawmills which have been closed for the past ten days due to high water in the St. Marier river, will probably be able to resume cutting soon. Construction of 27 miles of logging railroad into the Santa and Haggan creek districts of northern Idaho has been announced by the McIntosh Lumber company. This work will be in charge of H. A. Black. A without-of-river drive on the Leavenworth drive of the Great Northern Lumber company was reported here last week. The men are demanding an increase of \$1 per day if it is made.

**PAKEL** Ore.—There are few idle men in this district. Camps and sawmills are operating at normal capacity, while mining is more active than it was last year. Agricultural work is picking up.

**LEND**—Local sawmills and woods operations are operating at about 50 per cent of capacity. Head-hunt help of all kinds is well employed and there is enough to meet all demands. Building and highway work here is equal to that of 1924. There are practically no unemployed men in this city.

**Coquille Man Drowns**  
MARSHFIELD, Ore.—George N. Goodrich, 75, a Coquille resident for 20 years, drowned in the Coquille river. Whether he was a victim of ill health and accident was not fully determined. His widow at Coquille and eight children, all in Coquille, live in California since.

# WEATHER IS NOT SATISFACTORY IN WALLOWA COUNTY

WALLOWA, Ore. (Special)—The weather has been very cold and backward here for the past week. The ground has frozen some during one or two nights. The cold has greatly checked the growth of grass and grain. Some farmers in the hill sections report the wire worms are working in the fall wheat fields, and are doing considerable damage to plants. Considerable spring seeding has been finished, and there are indications that should the weather continue cool for the next few weeks, that the spring seedings will be damaged by the worms.

H. C. Boggs finished spring seeding of his ranch in the hills the last of the week.

Proclamation is the thief of success.

Here it is

The Delco-Light Millions Have Waited For

\$195

F. O. B. DAYTON, O.

**AS THE world's largest manufacturers of farm electric plants, we have been working for months on the development of a lighting plant that could be sold at a radically lower price—a price so low that it would bring electricity within the reach of every farm home in America.**

We knew that a million farm homes were ready for electricity—that a million farmers realized the money-saving, time-saving value of electricity—that a million farm women had learned that electricity would lighten the burdens of farm life and bring new happiness and new opportunities to their families.

**A Price That Is Revolutionary**

We realized that a small reduction in price would not be enough. It must be revolutionary—drastic. And we wanted to be able to offer this plant on very easy terms—so that every farm home, whether owned or rented, could have the benefits that are so much appreciated on the 200,000 farms where Delco-Light is now in use.

**And Now It's Ready**

Today the new Delco-Light is ready. It is more than we had hoped. Quantity production—

modern engineering—millions of dollars worth of machinery—research and invention—have produced the Delco-Light that can make all farms electrically lighted farms.

**A 600-Watt Non-Storage-Battery Plant**

The new plant is a genuine Delco-Light in every respect—full 600-watt capacity, strong, sturdily built, economical in operation. It is equipped with a standard Delco starter and an economical starting battery. And its price is only \$195 f. o. b. Dayton—the lowest price and the greatest value ever offered in a Delco-Light electric plant.

**Complete Installation at a Remarkably Small Cost**

In addition to this, special arrangements have been made whereby the Delco-Light dealer in your community will install your plant and wire your house for five lights, to be located wherever you specify. You will receive with the plant five beautiful spun-brass lighting fixtures complete with bulbs.

And all of this—plant, installation, wiring, fixtures, everything

ready to turn on the lights—will cost you only \$53, in addition to the price of the plant itself.

**A Small Down Payment—Balance on Easy Terms**

Finally, we have arranged that this new low cost for Delco-Light, completely installed, can be paid on terms so easy that anyone can take advantage of them. The total cost is only \$248, including freight (a little more west of the Mississippi). But you make only a small down payment. The balance is payable on easy terms, arranged to suit your convenience.

**Ask for Details**

Never before has such an offer been made. Never before has Delco-Light cost so little and been so easy to buy. It means that any farm home—your home—can have Delco-Light today.

At the bottom of this advertisement appear the name and address of the Delco-Light dealer for your community. Call on him, write, or telephone for full information—specifications of the plant, illustrations of the fixtures that come with it, details of our complete installation and wiring plan, and the figures that show how easily you can now get Delco-Light.
