Sister Mary's Kitchen

BY SISTER MARY

Breakfast Malted orange juice, cereal, thin cream, crisp granola toast, broiled bacon, French toast, syrup, milk, coffee.

Luncheon Asparagus eggs, brown bread and butter sandwiches, rhubarb meringue pudding, milk, tea.

Dinner Roast shoulder of lamb, rice, potatoes, beet greens, fruit and vegetable salad, whole wheat bread, cream puffs with strawberry filling, milk, coffee.

Fresh mint leaves crushed in orange juice make a drink that is most refreshing on a warm spring morning.

A sprig of mint is delicious in each glass of iced tea.

Mint sauce, jelly or ice is traditionally the finishing touch to lamb, but it's quite as acceptable with other meats.

Asparagus eggs makes a satisfactory company dish for luncheon.

Asparagus Eggs. Two and one-half cups milk, 4 tablespoons butter, 3 tablespoons flour, 1/2 teaspoon salt, paprika, 1/2 cup cooked asparagus, 5 eggs.

Melt butter, stir in flour and slowly add milk, stirring constantly. The apparatus should be cut into inch pieces. When the sauce is thick and smooth add asparagus and turn into a buttered baking dish. Open eggs into a saucer and carefully slide into baking dish, taking care not to break the yolk. Cover dish and place in a moderate oven until eggs are set. Serve from the baking dish on triangles of hot toast.

Much Snow Remains There is quite an amount of snow remaining in the mountains in spite of the rains that have taken it down considerably. The creek is about as high as ever.

A bunch of anglers from Baker city were on the creek last Sunday but returned with very little luck.

Had Lay is using his Ford roadster to deliver the mail since last week.

Guy McNair, the fire warden has moved from his Union home to his ranch on Little Catherine creek.

Elmer Swiger is preparing to move his dairy outfit from his winter headquarters on Little creek at the Sunnyside farm to the summer feeding grounds on the Hill ranch.

Kenneth Vanorder was a Big creek visitor with his parents Mr. and Mrs. Clarence Vanorder Sunday.

Fencing Work Planned Joseph Lay is to look over a proposed fencing on the forest preserve in anticipation of a contract to build it. The contract was offered him by Mr. Jones, the forest ranger of Baker. The fence is to be built in the Medical Springs district.

George McDowd motored to Union Sunday returning the same day.

Cy Turner has bargained for a load of seed oats from Clarence Vanorder, Monday. He will haul them to his Big creek ranch.

Fred Smith was driving a bunch of cattle to the Snake river pass on Friday. The cattle belonged to William Hagg of Union.

Mrs. Ella Hunter will visit her daughter Mrs. Charles Wilson of 1510 Jackson, La Grande, and also will visit several friends in the city before she returns.

The baseball game was played as scheduled here in Clarence Vanorder's field between the Park and Big creek. The score was 20 to 14 again in favor of the Park.

Dull Wits of Olden Days Wasted Time LONDON (AP)—Card games of the middle ages required much more time than the card games of today because the brains of the people of that period were much slower than the modern mind, according to card playing experts who have inspected a rare old collection of cards shown recently at the City of London Guildhall library.

The collection consisted of 18 varieties, the earliest pack being that of the 13th century. It has credit to be international driving certificates for 12 months, facilitating entering and leaving a country as often as desired. Standard road signs will be adopted, and explained to drivers, and interstate touring will otherwise be made safer.

Europe Planning To Make Motor Touring Less Risky GENEVA (AP)—Promoters of tourist trade in Europe are going out of their way to make easier the movements of parties traveling in automobiles. Free-spending Americans are particularly invited to take notice and to come and bring their cars and their money.

An international road traffic conference will be held in Paris next fall. It will then be proposed to issue double certificates, one for the driver and one for the car, so the driver can change to another motor without trouble. There are to be international driving certificates for 12 months, facilitating entering and leaving a country as often as desired. Standard road signs will be adopted, and explained to drivers, and interstate touring will otherwise be made safer.

The Home Guards of the Methodist Episcopal church will meet tomorrow afternoon at four o'clock at the church. All members are requested to bring Mite boxes at this time.

House of Steel and Cork An Experiment DEAL, Eng. (AP)—Not far from the famous Deal Castle built by Henry VIII several workmen's houses of cork and steel framework, are being built as an experiment designed to assist in relieving the housing shortage in England.

The entire skeleton of the newly conceived houses is of steel and the insulation core of the walls is formed of slabs of compressed cork. On the exterior the cork is enclosed in solid concrete to the top of an inch and a half by a "cement gun" which applies the concrete under pressure. The cork itself having been pressed into a mold, will not swell and burn very slowly. Calculations of the builders show that its insulation value saved 25 per cent in heating costs.

Another advantage for the cork house claimed by the inventors is that it is sound proof in comparison with the ordinary structure of brick, stone or masonry. Owing to the fact that it may be built by unskilled labor under direction of experienced hands the cost is low and the authorities hope buildings of this kind may prove popular among the coal miners and other workmen in the industrial districts.

Two men in a canoe near Boston tried to change seats in a canoe without first learning to swim.

SPRING WORK NEARLY DONE

THE PARK (Special)—The heavy work of the spring is nearly done, George McDowd will probably be the first to finish up next week.

Frank Cox of Pine Valley stopped over night with Clarence Vanorder Wednesday. It was on horseback and came from Perry returning home. Mr. Cox entertained his host by a rendition of expert whistling. Besides whistling Mr. Cox has many social attributes which make for congeniality.

Mrs. Rose Lay with her two sons Othello and Laurel, and her little baby girl Beverly Rose motored to Baker Thursday. Besides the visit in the Queen City to several friends there, Laurel will have his eyes examined.

Mrs. Roy Jones who has been at the Hot Lake sanatorium is reported very seriously ill. It is the hope of her friends that she will recover. Her ailment is reported to be Bright's disease.

It has been learned that Elmer Swiger had given up the dairy business he was running for Frank Hall of Union. A man named Taylor has taken his place. The herd will be moved to the Hill ranch from the Sunnyside farm on Little creek.

Five hundred years ago people's brains worked so much slower than they do at the present time that it was natural there should be interesting matter for the players to read while awaiting their turn to play in the opinion of modern card experts.

Justice prevails in Chicago where the originator of the one-arm lunch room fed and broke his arm.

"Beloved Thief"

Elna R. Wilcox, known to police as the "beloved thief," because she has stolen bread out of a dozen or so grocery stores, is now awaiting trial at New York charged with taking jewelry, furs and gowns valued at \$4000. Police say she took valuables from the home of Mrs. Bead Myer, Riverside Drive, where she had been a guest.

The curls of 1700 are adorned with sketches showing incidents in various earlier times.

Five hundred years ago people's brains worked so much slower than they do at the present time that it was natural there should be interesting matter for the players to read while awaiting their turn to play in the opinion of modern card experts.

FEW METEORS MISS KANSAS

METHEORON, Kan. (AP)—Kansas has attained a reputation beyond this planet as a landing field for stray meteorites, but that reputation would not stand the test of science, declared Prof. H. H. Nininger, of the Kansas Academy of Science, in an address on the subject of meteorites.

The belief that Kansas center of the United States, exerts some unexplained influence on the heavenly wanderers, is without foundation, in fact, the professor asserted. A chart of recorded meteorite falls discloses that one-fifth of the significant finds in the world have been in Kansas, and this has led, according to Professor Nininger, to the popular and fallacious impression that this state is peculiarly attractive to meteorites.

Two explanations he offered for the apparent monopoly Kansas has maintained: the character of the soil, and the interest argued in the science.

"The finding of stony meteorites," Professor Nininger pointed out, "which have not been seen to fall, may be considered among the rarest events in the annals of meteorites. In only two localities on this continent have such finds occurred in numbers—western Kansas and the coastal plains of Texas. In both of these regions the soil is comparatively free from terrestrial rocks." This, he said, facilitated distinguishing meteorite stones from the earth.

A series of witnessed falls of now famous iron and stone meteorites also had kept scientific circles, the public and the press interested in Kansas for long periods, he said, with the result that farmers began to believe that the heavy stones with which they were weighting down fences and roofs were in fact meteorites. Thus were the discoveries multiplied.

Scientists have never satisfactorily accounted for the concentration of iron meteorites in large showers, Professor Nininger told his audience. One theory is that such showers are remnants of disinte-

grating comets which have "side-swiped" the earth. This, he said, may explain the huge crater in northern Arizona, devoid of volcanic rock and surrounded by traces of iron meteorite falls, which geologists believe marks the entrance into the earth of a monster meteorite.

Australia Pays High To Secure Immigrants SYDNEY (AP)—In connection with a recent agreement in London between England and Australia to assist 450,000 emigrants from the United Kingdom to get settled on land here, it has been estimated that the cost of this undertaking will be from \$5,000 to \$10,000 for each individual making the 18,000,000,000.

Prime Minister Bruce, in announcing the estimate of cost, said that many reproductive and development works were awaiting the

emigrants. The two governments will bear the cost of the transfers. It is planned that the 450,000 men, women and children who are to be sent to Australia within the next ten years under this scheme, designed to relieve the unemployment problem of England, will comprise a great many persons whose aim is to settle on crown land and become cattle raisers and farmers.

Strawberries are Ripening. COTTAGE GROVE, Ore.—Strawberries are beginning to ripen in this section. Mrs. Alfred T. Beldler picked a few on April 29 and on May 5 had enough to serve. Mrs. James Plaster served strawberries recently. Both live in the Thorston Corners neighborhood, from which section the first berries usually are reported. These berries will continue to bear until October or November.

Vicksburg Will Honor Its Pioneer Settlers

VICKSBURG, Miss. (AP)—The story of Vicksburg's hundred years and of the first American to settle here, the Rev. Newell Viek, a Methodist minister from Virginia, will be told in a series of historical pageants as part of the celebration May 14 and 15 of the city's centennial. Vicksburg was incorporated January 29, 1825, but it was dedicated to wait until spring to celebrate the centennial.

One of the pageants will portray the early struggles of Spanish and French conquerors, another the fighting between Union and Confederate armies, while others will show the country along the Mississippi river under four flags, French, Spanish, Confederate and United States.

There was once an old Spanish fortress here called Fort Noxales, but it was almost forgotten when, about the year 1812, Mr. Vick and his family took possession of several hundred acres along the river and the minister plotted it off, saying he was "laying the foundations of a great city." He and his wife died in 1819 of yellow fever, but a son-in-law, the Rev. John Lane, took up the work and lived to see a town of some 2500 to 3000 here by 1825.

The pioneer settlers of Vicksburg, which now has approximately 26,000 population, came chiefly from Virginia, the Carolinas and Kentucky.
