Local News In Brief

COMING EVENTS

Special municipal bond election —June 3.

Union Live Stock Show at Union, June 10-11-12.

Regular school election from 2 to 7 p. m.—June 15.

Out Again—

A. T. Hill is able to be out again after several days at his home because of illness.

At Wallowa Lake—

Miss Imogen Russell and Miss Tickleback are spending a few days at Wallowa Lake.

Returned to Enterprise—

Mrs. Norval Emmett returned to Enterprise this morning on the branch line train, where she now has a beauty shop.

Returned from Portland—

C. R. Eberhard returned to La Grande this morning after attending a meeting of the Elks lodge in Portland over the week end.

Left for Montana—

Little Miss Marie Baxter left Saturday evening for Ana Condon, Montana, to make her home there with her grandmother.

Visiting Here—

Ruth Cochran, of Portland, is visiting in La Grande at the home of Mr. and Mrs. George T. Cochran. Miss Cochran is Mr. Cochran's niece.

Here For Week End—

Mrs. W. M. Hall returned to her home at Baker this morning after spending the week end here at the home of her sister, Mrs. J. R. Oliver.

Arrived this morning—

Mrs. G. P. Terpany and little daughter, Joan, arrived in La Grande this morning on train No. 24 on her way to Elgin to visit Fred Terpany for some time.

Operated On—

Both Mr. and Mrs. Vanderpool, of Dufur, Oregon, were operated on at Hot Lake a few days ago. They are getting along nicely at the present time.

At Wallowa Lake—

Miss Francis McCann, Miss Lavina Galloway, Miss Rose Klein and Frances Robinson spent the week end at Wallowa Lake. They returned to La Grande yesterday.

Visiting here—

Mrs. J. C. Batcheldor is visiting in La Grande at the home of Mr. and Mrs. A. W. Nelson from Walla Walla, Washington. She arrived here Saturday.

Left today—

Mr. and Mrs. Walter Reuter and son, Bobby, left La Grande today for Portland by auto. They will spend a few days there on business and pleasure.

Here for Week End—

Lester Horstman, of Pendelton, spent the week end in La Grande, returning to Pendleton Sunday evening. He will stay there a few days before leaving for Portland where he has accepted a position.

Here from Portland—

Mr. and Mrs. O. L. Price motored to La Grande from Portland and spent the week-end here guests at the home of Mr. and Mrs. A. T. Hill. Mr. Price is Mrs. Hill's brother. They left here for Portland this morning.

Underwent an Operation—

John Winn has returned to La Grande after spending the past two weeks in Portland. Mr. Winn underwent an operation on his throat while there. He is getting along fine now.

Traffic Violators—

Frank Jester was fined $2.50 in municipal court for cutting corners contrary to the traffic law. Earl Simmons forfeited $25 bond by non-appearance for trial. He was charged with switching a license plate.

Constructing Sign—

A sign is being constructed across the street in front of the Chamber of Commerce offices. The sign is 2 feet high, 24 feet long and carries the caption "Chamber of Commerce, Foreign Car Registration."

Elect Officers Tomorrow—

The last business meeting of the La Grande Neighborhood club until fall will be held tomorrow afternoon at the club rooms. Officers will be elected at this time and reports from the various committees will be given.

Attended Convention—

Mrs. J. J. Chapman, of Lostine, Miss Leota Holmes, of Wallowa, and Mrs. J. Templeton, of Wallowa were in La Grande this morning en route to their homes, after attending a convention of the Rebecca lodge at Ashland, Oregon.

Here Visiting—

William Gabler, window decorator for Bond Brothers at Pendleton, was in La Grande yesterday to spend the day with Mrs. Gebler and friends. Mr. Gabler has been quite ill for some time but has recovered.

Improved—

Walter Ford, who was shot in the neck some time ago while playing, is very much improved. Although his right side is still paralyzed and he is unable to talk he is gaining rapidly and physicians think he will gradually overcome this. He is able to be up.

Going to Idaho—

Members of the Star Novelty Orchestra, Larry Langvin, Joe Volton, Harold Halas, Milis Fisher, Mr. Harrington Morris and William Andrist, will leave Wednesday, by auto, for Weiser, Idaho, and after playing there they will go to Fruitland and Nampa. They will return to Wallowa Lake Saturday evening for the dance there.

At the Summer—

Among the out of town guests who were registered at the Summer hotel over Saturday and Sunday were: H. S. Chapman of Enterprise, John MacDonald and J. M. Casteel of Wallowa, Mr. and Mrs. C. H. Range of Boise, Idaho, and Mr. and Mrs. Walter Thomas of Caldwell, Idaho.

Will Give Dance—

The Women's Community Club of Meacham are sponsoring a dance to be given at Meacham, June 6, to raise funds for a monument to be erected in memory of the Unknown Dead of the Old Oregon Trail. The monument is to be erected at Meacham. The dance will feature a number of entertainment specialties as well as good music for the dancing, according to word received here.

Small Fires—

Two fire alarms were turned in over the week end. The first fire call occurred about half past five Saturday afternoon. An incubator at the Millinger home on the corner of Second and B streets caught fire from the kerosene lamp used for heating. Small damage was done and the fire was soon extinguished. The fire Sunday morning at the Boswell residence, 1208 Sixth Street did some $500 damage part of which was covered by insurance. The origin of the blaze was not discovered.

Personal Mention

W. W. Stevens, county commissioner, of Union, was in La Grande Saturday on business.

W. Freeman, safety first man for the O. W. R. and N. Company is in La Grande today on business

R. F. Wilson, attorney of Union, is in La Grande today on legal business.

G. R. Duffey, Cashier of the bank at Cove, was a visitor to La Grande today.

W. C. Crist, of Boise, Underwood typewriter man, is in La Grande for a few days on business.

Miss Carrie Skiff, of Union, is visiting relatives in La Grande today.

Among the Union visitors in this city today is Steve Hutchison.

Mr. and Mrs. Charles Hibbert motored to Wallowa Lake Saturday evening and spent Sunday there.

YEAR-ROUND FRESHENING BEST IN MOST DAIRIES

Most dairymen believe that fall or winter freshening is preferable to spring or summer freshening because of the distribution of labor throughout the year, and the greater production per cow. This general opinion was obtained by taking the average of 84 cow testing associations for a ten-year period, 1910-1920, and is reported in U. S. D. A. Farmer's Bulletin No. 1071.

Fall freshened cows cost more to keep but produced enough more butter fat above that of cows in other seasons to compensate for the higher feed cost. Production of winter freshening cows was very close to that of fall freshening. Spring and summer freshening produces in the order given. Labor costs were not included in the survey but if they had been the figures would be more in favor of the fall and winter freshening, due to the scarcity of labor in the summer.

Many dairymen with a steady market find it advantageous to equalize production by having cows freshen throughout the year.

out at third.

With two down, and one on, Gossett drove out a safety that brought Barth home. Williams filed out ending the inning.

Errors Help Second Score

In the seventh the Pirates were helpless but in the eighth, with the aid of a single by Helm and errors by Dean and Ward, another run was added which completed the scoring.

With the score 2 to 0 against them the Bears went into the ninth without much hope. Ward, first up, whiffed but Hall was given a free pass to first, Hein's first of the game.

Then, to add color to the contest, the game was brought to a happy ending when O'Rourke hit into a double play, Gossett to Helm to Holtz.

Hein was extremely sparing with hits, allowing but three which is the same number that Walla Walla gathered off Brandt. Baker pitcher, the preceding Sunday. One of the three, which was too hot for the pitcher to handle, was deflected from his glove and only by a herculean effort could Williams, shortstop, knock it down—but not in time to throw out the runner. In other words, of the three, one was certainly a lucky one of the "scratch" variety.

Parris, pitching for the visiting team, chucked good ball but was unable to keep the Pirates down. He allowed two hits in the second but no runs materialized. Had Parris' support been perfect, the final run would never have crossed home plate.

Hall, Walla Walla left gardener, rather distinguished himself in handling two flies in the first inning.

Walla Walla:	AB	R	H	PO	A	E
Dean, 2	4	0	1	2	0	2
Ward, 3	4	0	1	1	1	1

Summary

Double plays: Gossett to Helm to Holtz. Sacrifice hits: Helms, Stolen bases: Alexander. Left on bases: La Grande 7, Walla Walla 4. Earned runs: La Grande 1. Struck out: by Hein 7, by Parris 5. Hit by pitcher: Hartman, Cunnyham. Bases on balls: off Hein 1, off Parris 1. Credit victory to Hein, charge defeat to Parris. Officials: Umpire, Crews, La Grande; base umpire, Blank, Walla Walla. Time of game: 1 hour 40 minutes.

PENDLETON WHITEWASHED

BAKER, Ore. (Special)—Baker added a second victory to her last Sunday's performance when the Queen City club spilled Pendleton's Buckaroos 6 to 0 at Baker yesterday.

Two portside twirlers engaged in one of the hottest pitching duels ever seen here. Errors, however, marred the contest.

A record crowd saw Ed. Brandt, Colt Trivler, and Buntap, of the Buckaroos, engage each other in battle and the crowd was on its toes until the last ball was thrown.

CAR TURNED OVER NEAR FIVE POINTS

(Continued from Page One.)

Grande motorists whom he passed just at the approach to the bridge. The steering gear of the machine was still in working order when the car was righted and the road was not wet.

Tracks of the machine show that it skidded very little up until the time it hit the soft dirt at the side of the road. Mr. McDowell himself does not know exactly what happened. When asked about the occurrence yesterday morning he was unable to give any reason why the car should have acted the way it did.

The only logical explanation of the affair seems to be that the machine was rounding the curve at close to the legal speed of 30 miles an hour when the left rear tire went flat, thus throwing the car temporarily out of control of the driver who was unable to keep it from running into the ditch. This left tire was flat when the car was righted.

Were on Vacation.

The McDowell's were on their way to Coeur D'Alene, Idaho, on what was to have been a vacation trip. Mr. McDowell had been subpoened as a witness in a lawsuit in Coeur D'Alene and was taking his family with him on the trip.

They spent the night at Baker and started early Sunday morning on the last portion of their journey.

The body was shipped to Boise for interment on No. 6 this morning by the W. H. Behmenkamp company. Mr. McDowell and the children left for Boise, driving the car in which the accident occurred, today.

Prohibitionists Roiled At Andrews' Decision

(Continued from Page One.)

drys argue, though in favor, while it remains of enforcing it. Judging from Anti-Saloon League comment, his popularity has suffered considerably.

* * *

Long ago a woman was rescued from Big Eddy, in the Potomac, near Washington, by her dog, Caesar. In the fullness of time Caesar died.

Last Mother's Day Potomac river fisherman saw an elderly man row into the stream, drop a wreath on the Eddy's surface, pull ashore and drive off in his automobile.

It was the woman's son, paying his annual tribute to Caesar's memory. Her name nobody seems to know. The story is familiar to everybody acquainted with the Potomac.

Cold Wave Hits Iowa.

DES MOINES, Ia. — Forty-eight hours after the mercury had climbed to 100 degrees, smashing all records for May, Iowa Sunday shivered in the face of a cold wave which brought snow in the eastern section of the state.

The U. S. Weather Bureau here received reports of snow Sunday morning at Dubuque, where the temperature slid to 34 degrees.

Unofficial reports from Cedar Rapids also told there were slight flurries of snow there.

"Howdy, king. I'm from Iowa," said John Cossins of Des Moines, Ia. (above) when he met King George and Queen Mary at a fair in England. The king was flabbergasted, but he smiled and shook hands with the Iowan. "And meet my son," said Cossins introducing John Jr., to the royal couple. "I'm happy now," said Cossins, "I have shaken hands with the king and Jack Dempsey."

OBSCENE MAIL FLOOD FOUGHT

WASHINGTON, (AP)— Recent increase in the flood of questionable matter offered for transmission through the mails, has led to further tightening of the routine safeguards employed in the postal service for keeping it out and for prosecution of those violating the federal statutes in that regard.

Thousands of complaints have come to the office of the postmaster general from parents and associations asking that the department augment its efforts to protect children from obscene literature and pictures.

The close surveillance exercised over the character of matter passing through the mails, officials believe, has affected a material decrease in the number of dealers in pornographic matter. Federal courts have discouraged the efforts of such dealers by upholding the post office department in each instance where ruling excluding obscene matter from the mails has been challenged.

Foreign dealers, especially since the war and the return of American soldiers from Europe have been active in endeavoring to dispose of their products in this country. In many instances foreign consignments are intercepted at custom houses. The trade of these offenders has been crippled by the postal authorities returning to senders letters addressed to all known dealers in obscene matter, by confiscating great quantites of unmailable advertising circulars and the materials as well and by acquainting those attempting to import such matter with their responsibility and liability to prosecution under the penal provisions of the laws.

The numerous small magazines, depending for their popularity on the pornographic material in them, are the source of continual complaint and the exclusion of many of them from the mails curtails to a considerable extent their widespread circulation. These publications have been responsible for increasing the work of the post office department's legal forces. The magazines when excluded from the mails find their way to newsstands through other channels.

Workings of Clarifier Explained by Engineers

(Continued from Page One.)

mind at all times by the present city officials."

"Generally speaking, sewage is understood to be 'the spent water supply of a community fouled with soap, vegetable and animal matters, human and industrial wastes and street washings.' These substances are found in the sewage either as suspended or dissolved matter and the problem of sewage treatment resolves itself into two stages, viz., the removal of a portion of the former by sedimentation and stabilizing the remainder together with the dissolved matter through the action of bacteria so that no further nuisance will be created.

Dorr Clarifier.

"Sedimentation may be accomplished by means of different devices only one of which, the Dorr Clarifier, will here be considered.

Before proceeding to a consideration of the action of the clarifier it may be well to get clearly in mind the distinction between suspended and dissolved matters. To illustrate, a grain of sand, a piece of paper, or a piece of a vegetable and all bacteria are in suspension while dissolved sugar, salt, etc., fall under the head of dissolved matter.

"The purpose of the Clarifier, then, is the removal of the suspended matter up to such an amount that the part remaining in the effluent will not interfere with the operation of whatever treatment follows. Due to the high velocity of flow in the sewers the heavy particles and the suspended matters are carried along until a place is reached where the velocity is extremely low. This place of low velocity is the clarifier.

"The average or waste water enters the clarifier tank at one side, moves horizontally across the entire area and leaves the tank by flowing over a weir into an outlet sewer or well from where it passes on for further treatment or dilution in running water. In passing through the tank, which under normal operating conditions requires about two hours, the effluent is in a very quiescent (still) state and the heavier particles together with about two-thirds of the suspended matter descend through the effluent and come to rest upon the floor of the clarifier. As the particles descend a portion of the bacteria, estimated at about 25 per cent, cling to and are removed with the suspended matter.

"All the matter which has thus settled to the floor of the clarifier is very slowly swept down the sloping floor until to comes to rest in a sump or pit at the center. The motion of the brooms or scrubbers is so slow that there is no agitation of the effluent and no interference with the downward motion of the descending particles. The sweeping motion is continuous while the removal of the sludge from the sump or pit is intermittent (sludge is the term applied to the heavy particles and suspended matters removed by sedimentation from the sewage).

Sludge Removal.

"The sludge which amounts to from two and one-half to five cubic yards per million gallons of sanitary sewage is removed from the sump once a day in warm weather and once in two or three days in cool weather. From the sump it is pumped into a concrete tank where bacterial action immediately sets in and the unstable matters are liquidified and gassified until the sludge is so stabilized that it quickly dries into a humus which is harmless and can be disposed of as a fertilizer.

"As a digestion chamber for the sludge it is proposed to use a portion of the present septic tank as this can be remodeled at less expense than the cost of a new tank. In remodelling the old septic tank the plan is to increase the height of the walls so that the sludge will flow by gravity onto the sludge drying bed and thus there will be no necessity of by-passing the sewage for the purpose of cleaning the tank.

"The supernatant (floating on top) liquid from the digestion chamber will be returned to the clarifier effluent with which it will pass through the filters.

"When the liquid effluent leaves the clarifier the floating grease, matches, etc., together with two-thirds of the suspended matters as outlined in the description of the operation of the clarifier have been removed and the effluent carries with it the remaining one-third of the suspended matters and a large percentage of dissolved organic matters. Numerous bacteria are also present.

"Unless some further treatment is given this effluent the unstable matters will putrefy and cause as nuisance as has been the case in the past with the present septic tank. If a large volume of flowing water were available for the dilution of this effluent added treatment would not be necessary. Such is not the case, however.

"Therefore, it is proposed to pass the effluent through a sprinkling milter in which all the unstable matters will be oxygenated and reduced to a granular sludge which will be non-putrescible.

"The filter effluent with its load of granular sludge will then be passed into the remaining portion of the old septic tank which will be properly remodeled and in which the velocity of flow will be so reduced that the effluent will drop its load of sludge and pass on out of the present outflow ditch freed from all matters which might cause a nuisance.

"In case of an epidemic in which the disease might be spread by water borne bacteria the effluent can be chlorinated in the final settling basin which will be large enough to give a detention period approximating one hour.

"All parts of the plant are arranged to avoid interruption of service and it will be possible to remove the sludge without bypassing raw sewage into the irrigating ditch," the report concludes.

Rum Running Blockade To Be Used on Pacific

EL PASO (By the Associated Press)—Sea operations against rum running will be extended to the Pacific and carried on with an intensity equal to that on the Atlantic, Lincoln C. Andrews, prohibition enforcement chief, announced today.

Farmers To Be Guests.

EUGENE, Or. — Wednesday, June 17, has been designated as Lane county day at the experiment station of Oregon Agricultural college at Corvallis, according to O. S. Fletcher, county agent, who returned last night from the college, where he had been in conference with officials of the experiment station and others for two days.

The Lane county farmers will gather on the Corvallis campus at 9:30 o'clock, according to arrangements made by Mr. Fletcher, and will be taken over all the experimental plots. There will be a considerable amount of horticultural work to show and grain and forage crops will be well developed, said Mr. Fletcher.

Fire Department Quits.

WARRENTON — Warrenton is without fire protection and minus a city commissioner as the result of the action early this week by Commissioner Warren, Fire Chief Lacey and 21 members of the volunteer department, in submitting their resignations to the city commission.

Interference by City Manager Francis in the operation of the fire and water departments was given as the cause.

Speller

Marie Mason, 13, of Omaha, Neb., won first prize in a spelling bee from 150 picked spellers of South Dakota, Iowa, Kansas, Minnesota and Nebraska. The contest was both oral and written.

LEGION TO OPEN DRIVE TOMORROW

(Continued from Page One.)

right, but will become a permanent endowment, the income from which will be used to provide homes, education facilities, health and opportunity for the orphan children of the World War veterans who made the supreme sacrifice. The five million dollars being raised all over the country for this fund will provide ample revenue to take care of the thousands of such children in every state. In addition to being a part of the national endowment, the Oregon campaign includes the raising of $60,000 to be used in the operation of the state's hospital for crippled children located at Portland. This will give added appeal to the campaign here tomorrow, officials believe, and little difficulty is anticipated in getting the quota subscribed.

The business district has been divided among various teams of the Legion committee and the residential area will be covered by a special team of the Legion assisted by women of the Auxiliary. Other communities in the county are also to be covered as it is the desire to make the Union county quota representative of its entire citizenship.

Attracting attention to the start of the drive tonight, the Legion drum and bugle corps will appear in uniform and will lead the local Guard company, captained by G. L. Dutton, in a parade through the business streets. The corps will furnish plenty of martial music and the infantrymen will stage an exhibition drill during the evening.

CHICK MITES TROUBLESOME

When mites appear after chicks are in the brooder house, H. E. Cosby, poultry specialist for the O. A. C. extension service, suggests that the ceiling and walls be swept and sand and litter be removed. A mixture of crank case oil and a little kerosene applied with a brush to walls, ceiling and floor is recommended making sure to get the oil into all the cracks. Going over the surface again with a dry rag mop is advisable in order to remove surplus oil and dampness. New sand, new cut litter and plenty of ventilation completes the cleansing operation and the chicks may then be allowed to return to the brooder. The problem is sometimes serious if the chicks cannot be put outside for a while.

Homing Pigeons Aid Salesmen

OAKLAND, Cal. (AP)—A well-known California corporation has installed pigeon lofts at Stockton, Santa Cruz, San Jose, Santa Rosa, Fresno and Marysville, and homing birds are to be used as message bearers. Salesmen with headquarters in the cities named will carry pigeons and release them to send in orders.

Shoemakers of Germany Seek Near Perfection in Apprentices

BERLIN (AP)—Young men of Wilmersdorf who desire to take up the shoemaker's trade must be graduates of the public schools and possess a report showing they have at least average ability. This is one of the conditions for apprentices prescribed by the master shoemakers' association.

The apprentices also must demonstarte a deep interest in the trade and a willingness to work. They must be healthy, of good bodily build, and live wives. The conditions emphasize that lack of concentration, inclination toward melancholy and inattentiveness will disqualify candidates.

Fist Fight at Klamath Falls Has Fatal Ending

KLAMATH FALLS, Ore. (By the Associated Press)—Timothy Murphy, 40, sheep grower, is dead, and Frank Way, another sheep raiser, is held here as the result of a fist fight to the finish in desolate Devil's Garden country yesterday, according to officers. The fight followed an argument over the ownership of one sheep, according to information reaching the officers.

ASIATIC RULING MADE.

WASHINGTON, (By the Associated Press)—Japanese and other Asiatics who served in the United States army, navy or coast guards during the world war are not entitled to naturalization, the supreme court decided today.
