Plains of Canada Attract Young Women of England

WINNIPEG, Man. (AP)—Emily Pinder, a graduate of the experimental farm of Leeds University, is in Winnipeg to begin a year's study of Canadian agricultural methods with a view to creating, on her return to the British Isles, a movement to western Canada of English farm girls.

Girls on the farms in all parts of England are intensely interested in Canada. They are seeking an outlet for their energies and would migrate to the dominion in large numbers if only encouraged, Miss Pinder asserted.

Many of these young women, she declared had sufficient funds to start farms of their own and would prove a valuable asset to the development of the western country.
