Business Experience Essential in Tutors, Educators Are Told

Caroline P. Kimball, teacher of lip reading in the Lynn, Mass., public schools, told the conference on lip reading for hard of hearing school children that the hard of hearing child "is very different" from the child born deaf, and that the latter must be taught speech while the former can progress more rapidly.

Ann Lehman, of the New York League for Hard of Hearing, told the same conference that care should be taken to prevent the classification of the deafened with the deaf.

STOCKHOLM (AP)—The daily wants of two-thirds of Sweden's population are now supplied through cooperative organizations, according to a recently completed investigation by the government board of social inquiry. To the Consumers Cooperative society no longer than 243,451 persons belong, or 17 per cent of the entire population, but as each member represents a family, the total number is easily four times that figure. Two-thirds of the membership is made up of wage earners and the rest of small farmers, artisans and minor officials. The net profits for last year were \$376,225 of which 15 per cent was added to the capital reserve. In 1924 the membership was 65,500 and the number of branches has grown in 15 years from 1 to 839.

In addition to retail stores the cooperative organizations run bakeries, breweries, meat and sausage plants, shoe repair shops, dairies, coffee roasting mills and one branch has a farm of its own. They also conduct savings banks and an insurance business.

The largest wholesale business in food stuffs in Sweden is now conducted by the Cooperative Wholesale society, which also runs a flour mill, a margarine factory and a chemical plant. It also has a savings bank department with over 25,000 depositors. national labor office of the league of nations.
