

NEWS of SOCIETY

Because many people are away for their summer vacation and because of the nearness of the Fourth of July society is undergoing a temporary lull. According to custom most of the card clubs and other social affairs and organizations of the city have adjourned during the summer months.

Instead of the parties and dances of the winter months people of La Grande now find recreation in camping, fishing, swimming and outings of various kinds.

The annual picnic of Chapter 1, P. O. W., was held last evening at Riverside Park. Forty people, members of P. O. W. and their families gathered at the park at 6:20 o'clock and a delightful evening was spent. Long tables were arranged with bouquets of various flowers of the season, and a delicious picnic dinner was served.

After dinner the time was spent socially until about nine o'clock when they returned to their homes.

COVE—(Special)—The Ladies' Guild of the Episcopal Church gave a delightful reception for the Reverend and Mrs. William Murray Bradner at Morris Hall Tuesday evening. Rt. Reverend W. P. Remington was also an honor guest. The hall was beautifully decorated with summer flowers, yellow predominating in the color scheme. About fifty guests were present and the evening was spent in music and conversation. High-noon refreshments were served.

Scientists in House Car to Study Birds

McPHERSON, Kan. (AP)—A study of bird life from South Dakota to Mexico "by" and back along the western coast of Mexico and the United States to Canada, will be made this summer by Prof. H. H. Nislinger, head of the biology department of McPherson college here.

Prof. Nislinger will make the trip under the auspices of the National Ornithology Society and it is expected to result in the most important discoveries in the interests of ornithology.

The party will start from western South Dakota and travel in a house-car built especially for the purpose. Care will be taken to keep well ahead of cold weather, so that the birds can be studied in

EASY LESSONS IN AUCTION BRIDGE

Copyright 1924 by Wynne, Jr.

In the play of the hands at auction there are numerous opportunities to make good plays but the most important one of all is the winning of the trick that scores game or saves it. For example, suppose the declarer is playing spades and it is easily possible to make three odd but not so apparent how to score game. This is the time for the declarer to do some deep thinking and endeavor to figure out some way to make game. Sometimes this can be done by mentally placing certain high cards in the opponents' hands in such a way that game is possible. At other times it can only be done by letting the opponents have the lead in the hope that they will make a mistake and thus give the declarer his only chance for game. This is what is meant by getting the trick that scores game.

On the other hand, suppose your opponents are playing the hand at

No score, rubber game. Z dealt second heart trick and led two and bid one spade. A and Y passed and B bid two hearts. Z two spades. A three hearts. Y three spades. B four hearts. Z four spades and A doubled. All passed and A opened the king of hearts and following with the ace of hearts. Here is where Z made his fatal mistake. If he had let A hold this trick and discarded a club or a diamond, he could have made five odd in spades if A had then led either one of the other three suits, for in that case he could have taken A's trumps and his suit cards were all good. If A had led another heart at trick three Z should have trumped in the dummy with the king and then led four rounds of trumps. He should then have led either clubs or diamonds until A made his last trump. In this way Z could have made four spades. He never stopped to consider these points, however, but trumped the

Japanese Have Air Bomb Test

TOKYO (AP)—A three-day air bombing exercise recently was held over Tsujido, a suburb of Kanagawa. Two planes were employed, each carrying 25 bombs weighing 300 to 400 pounds.

The object of the exercise was to study various relations between the reaching point of bombs thrown from airplanes, and the speed as well as direction of the winds, also to improve bomb throwing devices aboard flying machines.
