Women's Shoes of Lizard Skin Become Popular in London

LONDON (AP)—Lizard farming in England has been greatly stimulated within the last few months since the skins for women's shoes have become fashionable. Lizard shoes for street wear have become very popular in London this summer and lizard slippers for evening wear have been quite the fad for some weeks.

Dealers say lizard skin shoes are here to stay as the material is serviceable and comfortable and just nearly as expensive as is usual when a new fad is introduced. Lizard skin shoes retail here at from \$15 up.

Never Talks

Fuller Shellenbeger, life prisoner at the Nebraska state penitentiary, hasn't spoken one word for 10 years. This is because he "talked himself into prison," confessing a murder when he thought he was trying, only to recover and be convicted and sent to prison. He answers all questions by shaking or nodding his head.

Railway May Be Used By Motor Vehicles

WINNIPEG, Man., (AP)—After resting in idleness eight years, the tracks of the Hudson Bay Railway, stretching through 225 miles of rich hunting and fishing country from The Pas, Manitoba north-east to Kettle Rapids, will at last be utilized if a unique proposal of H. M. Hamilton a railway construction engineer of Winnipeg, is accepted by railway authorities.

Construction work on the Hudson Bay Railway was discontinued in 1917, after it had been completed to within 100 miles of Hudson Bay. The object of the project was to give the Manitoba wheat fields short access to salt water. Work ceased when authorities questioned advisability of completing the railway, because of the short navigable season on Hudson Bay—some years being only ten weeks duration.

Hamilton proposes that stumps be provided by the railway authorities, which could be fitted to automobile wheels, thus opening the otherwise inaccessible region to hunters, fishermen, and tourists. The railway could be placed for movement of cars in one direction on odd days of the month and the opposite on even days. A light derauling shoe would be carried to provide for emergencies.

THE URGE OF THE WANDERLUST

FINANCE PLAN PROVES VALUE

Cars and trucks aggregating \$6,000,000 have been sold under the Chevrolet Six Per Cent Purchase Certificate Plan since this copyrighted method was inaugurated among Chevrolet dealers seven months ago.

The plan, regarded as a fundamental improvement in automotive merchandising, has met with such uniform approval that now more than 2,000 of the certificates are sold each month.

Under its provisions a prospective car owner may start with an initial payment as low as \$5. If desired, a larger first payment may be made. This is followed by weekly or monthly installments adding the convenience of the purchaser. These payments are then credited upon the back of the purchase certificate. When the sum of the payments plus the six per cent interest earned reaches one-third of the retail price the car is delivered. The balance may be met

either outright or on a deferred payment plan.

Another attractive feature is a provision that a certificate holder who already owns a car gains a further credit toward his new automobile of six per cent of such amount as he may spend with the dealer for service, repairs or accessories on his old machine.

The certificate savings are amply safeguarded. They are banked in a separate trustee's account, in a local bank. Over 2000 of these accounts are established in different banks in the United States. In addition all money paid in on a Chevrolet purchase certificate is insured against all loss by a strong and well known insurance company.
