

NEWS of SOCIETY

A quiet wedding took place Saturday evening at the William Miller home here when Mrs. Mary Elizabeth Hart and A. A. Miller, both of Enterprise, were married by the Rev. William Crosby Ross, of the First Presbyterian church. Mr. and Mrs. Miller, accompanied by William Miller left this morning for coast points to be gone about ten days. After their return they will be at home to their many friends at Enterprise.

The World Wide Guild of the Baptist church held an interesting meeting Saturday afternoon when the members met at the home of Mrs. W. L. Devine, with Mrs. Devine and Mrs. L. J. Dierks as hostesses. The president being Mrs. W. P. McAdory presided over the business meeting. The Gladstone bridge party, which will start Wednesday, was discussed. Six members of the local guild will attend. They are: Mabel Schaefer, Cornelia Hansen, Eldora Hansen, Marjorie Maguire, Bonnie Oliver and Luene Oliver.

After the business meeting Miss Mildred Fox had charge of the devotional. Mrs. A. E. Sayre, whose daughter is a missionary in China, spoke to the girls about the work the missionaries are doing in the Orient and the trouble they are having at present.

In addition to her talk she showed and explained a number of pictures and articles made by the Chinese, and sent to her by her daughter. A contest was held on the W. W. G. point standard system and towards were given to Marjorie Maguire and Cornelia Hansen. Refreshments were served before adjournment.

Two marriages took place at the First Methodist Episcopal church last week. On Wednesday Miss Hazel Albin Long, of Council Bluffs, Iowa, and George Purdie, of Yakima, Wash., were united in marriage and on Friday Miss Viola Meers and Emil W. Eggerth, of Bendleton, were married. The Rev. Elmer Grant Keith officiated.

COVE. (Special)—On Thursday afternoon the girls gave a party in the Avenston Grove in honor of Mrs. J. H. Price, who will leave soon. Mrs. Price has been a member of the society for many years. Five hundred was

played during the afternoon, after which refreshments were served. Those present were Mrs. C. Berisch, Mrs. A. G. Conklin, Mrs. C. E. Lawson, Mrs. T. R. Conklin, Mrs. A. H. Orton, Mrs. William Hallmark, Miss Bess Kelly, Mrs. J. Miller, Mrs. L. M. Laird, Mrs. J. Fletcher, Mrs. L. E. Anderson, Mrs. Edna Conklin, Mrs. Charles DeHans, Mrs. L. H. Lay, Mrs. T. C. Hetty, Mrs. G. E. Barker, Mrs. K. L. Barker, Miss Lois Lawson, Mrs. R. J. Price, of Portland, Mrs. R. Comstock, Mrs. C. Herford, Mrs. Harris, of Pocatello, Mrs. William Murray Bradner and the honor guest.

COVE. (Special)—On Tuesday evening the community chorus entertained at the home of Mr. and Mrs. A. A. White honoring Mr. and Mrs. J. H. Price. The evening was spent in music and conversation. Refreshments were served.

Announcements
Social announcements may be printed in this column free of charge. Any announcements pertaining to business such as cooked food sales, etc., will be refused. Announcements to be printed the same day, must be in society editor's hands by 9:00 o'clock. — News editor's note.

The Parkdale Club will meet Wednesday afternoon, July 28, at the home of Mrs. Homer Wilson in Fruitdale.

BULGARIA MOVES TO PREVENT PROFITEERING IN FOODSTUFFS
SOFIA. (AP)—Minister of the Interior Russell has directed the chief Commission of Provision to begin proceedings against fruit and vegetable merchants in half a dozen cities to compel them to sell their produce at reasonable prices. Complaints had been made that prices three times as large as they should be were being charged. Some milkmen, who were said to be charging excessive prices, also were included.

The provision authorities were instructed by the minister not only to fine those found guilty of profiteering but to impose prison sentences of one year or less.

NOT A REAL PENCIL, OF COURSE. Just an illustration by Sam Cowan and Howard Higgin, popular scenarioists, to show how difficult it is for several persons to collaborate on the writing of a scenario. Do you see the "joint"?

INVENTOR HOPES NEW MUSICAL INSTRUMENT WILL REPLACE PIANOS
MOSCOW. (AP)—A Russian musician, S. Giliev, has invented a new musical instrument which, he hopes, will replace upright and grand pianos. The instrument, which has an ordinary keyboard, is in the form of a box one yard wide and weighing only eight pounds. The usual strings are replaced by a steel comb, and the little hammers by tiny pliers which touch upon the teeth of the comb.

Russian composers and musicians, who have played the instrument at the Moscow Conservatory of Music, testify that it is capable of replacing existing pianos and that it has a stronger tone and superior intonations than the ordinary piano. The new instrument has been christened "Plectstone." It is believed it can be produced at a low enough price to compete successfully with the present bulky old-fashioned pianos.

GERMANY BUILDING LONG DIKE
WESTERLAND. (AP)—A dike 4.5 miles in length is in process of construction between the island of Sylt and the mainland. This and a half mile has been built and the entire length is expected to be completed in 1926. The foundation of the dike is constructed of granite and is 165 feet wide. The height will be 4.5 feet above the highest water mark.

THIS IS A DISTINGUISHED SPUD. In addition to the ordinary potato "eyes" it has a nose, mouth, chin, ears, eyebrows "n" everything. The prized specimen was dug by Henry Hoadley, Guard Park, N. J.

FIRST WITNESS HEARD IN MARY PICKFORD CASE
LOS ANGELES (AP)—The prosecution's first witness, M. T. Harney, a cafe man, took the stand today in the trial of three men accused of plotting to kidnap Mary Pickford, film star, with a view to the purported origin of the plot in May, 1922. Harney, who said he had been a roommate of C. Z. Stephens, one of the accused, recounted a conversation between them which sought to "light on" means to "pick up some easy money." He said they discussed kidnapping Pola Negri, film star, but decided she did not have enough ransom money available to make it worth while. He declared they abandoned a plan to abduct Jackie Coogan, juvenile film star, because he was a court ward.

WALLOWA RAIN NOT DAMAGING
Only 108
WALLOWA, Ore. Special—Tommy, the 12-year-old son of Mr. and Mrs. E. L. Barker, of Parson Creek, passed away Thursday night following a long illness from heart trouble. Funeral services were conducted at the home at 2 o'clock Friday afternoon, with burial in Lentine cemetery.
This section of the country was visited with a heavy local shower Friday afternoon, with the rain being very heavy in portions of the country. Some hail was also reported especially in the lower portion of the valley and in the Wallowa canyon. No serious damage to crops has been reported. The rain will no doubt prove beneficial to much of the late spring grain, which has been showing signs of burning badly during the past two weeks. The greater part of the fall grain has become too nearly mature to be benefited much. Haying was stopped in the valley by the rain. Some of the hay-men have been busy the past two days turning hay, or the shocks over in order to let them become dry enough for stacking sooner, with the heavy rain of Friday several days sun will be required before the work can be resumed.
Many farmers in the hill sections are hauling at this time, as the rain did not delay this work for any length of time. As soon as the water had drained off, the standing grain, farmers again started the binders. As the ripe grain can be cut without shelling, several farmers who commenced binding last week will finish their cutting in a few days.
Mrs. Grace Ott and family of Summerville, were here Friday attending the funeral of Tommy Rucker.
Gardens in all parts of the country are "preventing up" and coming along nicely following the recent showers.
Irene Fisher and wife of Leap were visitors in the upper part of the valley the latter part of the week.

Mrs. Elizabeth Ackerman, an inmate of a home for the aged at Rochester, N. Y., 84 years old but still takes an active interest in life. Her favorite topic of conversation is recipes for soup and gingerbread—they "taste them better," 75 years ago, than they do now, she says.

Engineers Conquer Turbulent Stream
PUEBLO, Colo. (AP)—Man's battle has been won against the turbulent Arkansas river which in June, 1921, overflowed its banks in an angry flood, wrecking \$20,000,000 damage on the surrounding countryside and taking a hundred lives.
The river has been directed recently from the old natural channel into a man-made passageway lined with concrete levees, and now, according to engineers, there will be no recurrence of the devastating flood disaster. The flood protection project was not scheduled for completion until 1924 but through favorable weather conditions during the winter the major portions of the project were finished recently.
A difficult engineering problem was encountered in the construction of the new channel and building of the levees. The new channel passed through the yards of the Denver, Rio Grande Western railroad and in order to carry out the project it was necessary to move the railroad yards during the process of construction of the channel. This was done without interruption to the railroad service.
Of the \$1,000,000 expended on the flood protection project, \$1,000,000 was utilized in the construction of the channel through the railroad yards.
The flood protection work, engineers said, required the moving of 1,000,000 cubic yards of dirt and construction of 27 miles of railroad track and seven bridges and viaducts.
A concrete retention dam was built across the river seven miles north of Pueblo. The dam will store 2,000 acre feet of water which can be utilized in local irrigation projects.
The last ending month spray, midsummer No. 7, is due the last of July and early August. If apple anthracnose or European canker is present on the tree hordes mature, 4-1-50 strength, is added to the leaf arsenate. This cuts down the amount of fruit rot, also, in addition to controlling canker.
A wife man is merely one who keeps his friends from discovering how foolish he is.

Sister Mary Says:
Breakfast—Apple sauce, crisp broiled bacon, poached eggs on granular toast, milk, coffee.
Lunch—New onions on toast, brown bread, raspberry gelatin with whipped cream, drop cookies, milk, tea.
Dinner—Pot roast of beef with potatoes, new turnips in cream, carrot salad, peach custard, sponge cake, whole wheat bread, milk, coffee.
Keep in mind that peaches are a very hard fruit to digest and children under six years of age should not be allowed to eat them. But 3-1-50 peaches are delicious and may be eaten by juniors or adults.
New Onions on Toast
Fifteen or 20 new onions, 4 oblong of toast, 2 tablespoons grated cheese, 1/2 cup cream, butter, salt, paprika.
Allow four or five onions for each person to be served. Use the white part up to the green tops. Peel and boil in slightly salted water until tender. Butter toast, sprinkle lightly with grated cheese and arrange onions on toast. Sprinkle with paprika and another grating of cheese. Put into a hot oven long enough to melt cheese. Pour over heated cream and serve.

Prolong the Daintiness of that New Frock
Your pride in your personal appearance reflects itself in the apparel which you wear.

Every Industry Has Hazards, Survey of Eye Wounds Show
NEW YORK (AP)—There is no such thing as a non-hazardous industry in the opinion of the National Committee for the Prevention of Blindness expressed in the report of an extensive study of eye hazards in industrial occupations, made public today by Lewis H. Curtis, managing director of the committee.
"Of the 100,000 blind persons in the United States approximately 15,000 are the industrial blind—persons who have lost their sight in the pursuit of industrial occupations," says the report, "and there is in addition to the totally blind a much larger number of men, women and children whose vision has been so impaired by the eye hazards of industry that they are handicapped throughout life. Both of these classes, the industrial blind, and the workers whose vision has been seriously impaired by the hazards of other industrial environments, grow larger each year."
There is hardly an industrial occupation in America, according to the National Committee, which does not add each year to the steadily increasing number of the blind and near blind. Reference to the experience of just one insurance company which in three and a half years settled claims involving 1,048 cases of permanent disability resulting from eye injuries, the report says: "The loss of 82 eyes in the presumably safe occupations of merchandising, farming and textile manufacture is further proof of the statement that serious eye accidents are likely to occur wherever men, women and children are employed. There is no such thing as a really non-hazardous occupation."
The committee found that although from a national point of view the metal manufacturing industries are the source of the greatest number of serious eye injuries in Pennsylvania, the coal mining industry ranks first as a cause of industrial blindness. In Wisconsin it was found that hand tools constitute by far the greatest single cause of eye injuries, being responsible for 44 percent. As an example of the important part

that eye injuries play in the whole problem of industrial accidents the report cites the experience of a large shipbuilding company in whose dispirited 25 percent of all injuries treated were eye injuries. More than 4,500 eye cases were treated in the dispensary of this one company in one year.
The size of the litter is its biggest factor in the cost of a pig at weaning time. The cost of food to bring a litter up to weaning time is about the same, investigation by the O. A. C. experimental station show, with large and small litters. So are labor cost, investment cost and most other factors. Pigs from the big litters are evidently not particularly inferior to pigs from small litters. At a total cost of \$31.25 bringing a litter to weaning time, taken by the animal laboratory department in May, 1924, the cost per pig varies with size of litter as follows in litter of 2 pigs weaned, \$16.43 each; of 4, \$17.82; of 5, \$22.26; of 6, \$25.23; of 7, \$24.41; of 8, \$23.91; of 9, \$23.47; and of 10, \$23.12. The cost of the weaned pig is about one-third the total cost of the pig at 200 pounds live market weight.
Sooty berries and low yields in Oregon are often related to wrong choice of soils, such as produce stunted cane growth. Successful culture in this state is limited to rather definite soil types, but surveys conducted by the experiment station indicate that cane fruits are grown or tried on a wide range of soils. They should never be planted in tight, poorly drained clay loams. Then generally do best on deep, rich, cool, friable, well-drained soils retentive of moisture. Slightly rolling river bottom lands seem ideal. Evergreen blackberries are a limited on heavy, unworkable lands.
One thing you can see by the moon is there are no germs in Kansas.
