

PRIZE ESSAY CONTEST ON

UNIVERSITY OF OREGON, Eugene, (Special)—The prize-essay contest conducted by the All-Oregon 1925 Exposition Committee will close October 10 instead of September 15 as previously announced. The prizes for the contest, which is open to high school and grade school students of Oregon, aggregate \$200, divided equally between the two divisions. Three prizes, \$50, \$50, and \$20 each, are offered for first, second and third place, respectively, in the high school and grade school contests.

The contestants will write on one of the two general subjects: (1) Oregon-made products, or (2) the educational and cultural values of art. The new closing date for the contest is also the closing date of the All-Oregon 1925 Exposition, to be held in the Civic Auditorium in Portland, October 5 to 10, which will feature Oregon-made goods and promote the cause of the art in Oregon.

The subjects in the contest are designed to emphasize the role played by the manufacturing life of the state by Oregon manufacturers, and of the importance of art in the life of the community. A number of titles are suggested by the committee as appropriate for the essays, although the contestants are not necessarily restricted specifically to them. An original or striking title, in fact, which falls within one of the two general heads mentioned above, may be an important factor in judging the merits of an essay.

The suggested titles are:

1. The Economic Importance of Oregon-made Goods.
2. Oregon's Loan Industries and their relation to the Welfare of the state.
3. The value of a Home-Wife Oregon Products Exposition.
4. Art as an exponent of the Characteristic Culture of a State.
5. Art as an element in the Education of a people.
6. The value of an Oriental Art Exhibit to the Pacific Coast.

Essays must be written legibly in ink on 11x17 (vertical) paper, double-spaced, and have wide margins. The size of the paper should be six inches. One side of the paper only should be used. Essays must not exceed 500 words, and no essay exceeding 500 words will be considered by the judges. All direct quotation must be in the quotation marks.

The essays must be the hands of the contestants, and must be submitted to the All-Oregon 1925 Exposition Committee, 501 Court House, Portland, Ore., before the closing date, October 10. The judge of the contest will be Judge Charles H. Tracy, former president of the Oregon Writers' League, Anthony Baker, poet and illustrator, and Donnie W. Allen, of the University of Oregon School of Journalism.

TOKYO (AP)—The shipping business, which was to have been scrapped, will be converted into a naval base, and the regulations for its operation are being revised. The subject of the contest will be made strictly business as a war ship. The ship, however, will be reconstructed into a floating base camp for the exhibition of various relics, papers and other articles having to do with the Russo-Japanese war. The naval authorities are honoring the ship, for her distinguished service in the Russo-Japanese war.

Government Charts Many Earth Faults In the Rocky Mountains

DENVER, Colo., (AP)—Numerous dead faults, created ages ago by earth movements, probably when the Rocky mountains were being upraised, and which might cause earthquakes at some future time, have been located and charted by government geologists and others between Denver and Laramie and Boulder, Colo., and in the vicinity of Golden, Colo.

United States Geologist Bruce publications showing the geology of the Denver basin delineate the dead faults. Many geologists believe such faults in California to have been the cause of the recent Santa Barbara quake.

C. T. Lupton, a consulting geologist at Denver, says there is a well-defined zone of dead faults at least one-quarter of a mile wide and ten to fifteen miles long, between Denver and Laramie.

The zone containing a series of faults crosses North Boulder Creek about one mile east of the old postoffice of White Stock, in Boulder county, or four miles east of the town of Erie. It runs southwesterly to a point about midway between Louisville and Marshall, and formations revealed by some of the Northern Colorado coal mines have enabled geologists and students of the subject to locate and chart these faults, declares Mr. Lupton. There has been discovered no evidence of movement in these faults for centuries, it is stated.

Two or three dead faults have been located of North Platte mountains, near Golden, Colo., but evidently these have been inactive for ages, too. Formations on one side of the fault north of Denver have been found to be from 500 to 1,000 feet deeper than on the other side, due to the sharp slip or fault in the earth's surface.

Certain evidences of foldings in the earth's surface have been discovered in southeastern Colorado, and near Haverly, just west of Rada in Kiowa county, there have been reports of very slight earth tremors within recent years according to Mr. Lupton.

It is possible, geologists believe, that the folding in southeastern Colorado in the vicinity of the Sierra Grande arch, which runs from its highest point about 40 miles east of Raton, N. Mex., northerly into Colorado, may be gradually through the centuries pushing up a new range of mountains.

If the readjustment of the earth's crust were perfect when the faults became inactive and "dead," they are, and all these have been the substantial readjustments of weight on the earth's surface since then, the likelihood is, geologists say, that these faults will never cause earthquake shocks again for centuries or ages.

Saturday morning, August 1st, Claude C. Pratt surely must be crazy. We have some of the remarkable bargains in flooring that ever struck La Grande. The 10,000 feet of Emma Wood flooring has arrived. This flooring is called Oregon Hardwood. It is absolutely it and better straight grained flooring. Any builder knows that this flooring sells for \$20 to \$120 per M. Just to see the stuff fly like a kite we will sell it out for \$80 per M. Speak now or hold your peace forever.

Shop-Windows On Parade

In the quiet and comfort of your home, newspaper in hand, the shop-windows of the town's best stores pass in review. Look at that charming little hat—just the style you have been looking for, and so reasonable!

And say, isn't that coat a darling? . . . Not only do you see illustrations of the merchandise, but you are told in detail of its merits and prices. A passing panorama that may be halted and started at will. A shopping trip at home!

How long do you suppose it would take you to reverse the process—to go up one street and down another, until you had visited personally every worth-while store in town? And how exhausted you would be, physically and nervously.

There is no doubt about it. The modern way to shop is to read the advertisements, then make notes of the stores and the particular offerings that appeal to you. What a lot of time and bother such a method saves. You know beforehand what you want to look at, who has it, and what you will have to pay.

Read the advertisements. Make it a daily habit. The regular reader of advertisements is better informed, makes the family budget stretch farther, has more time for recreation, gets more value for her money, and profits in many other ways. Advertisements are frequently the most interesting news in the paper.

Every day these shop-windows are lined up for your inspection in this newspaper.
