They decided to meet once a year and the next meeting will be held at Cove.

## Where the Earth Opened

A number of mysterious caverns of land in Birmingham, Ala., have got the citizens all on edge. Here is a picture of one, where the ground opened and let a double garage, a coal shed and a large tree sink down into a hole. Scientists believe there are subterranean caverns under the city, and say the drainage of water from these caverns causes the settling.

### Fascinating

This hat has all the smartness of the severe turban with an added femininity and charm occasioned by the scarf ends that fall from the side. It is of black satin, and is quite untrimmed.

Hayes won high honors, and Mrs. Graham was presented with the first prize.

The second series of junior country club dinners will be given Monday evening, August 17, at the club house. These dinners are given for the boys and girls of La Grande only. Season cards must be presented at the door.

The Parkdale club will meet Wednesday, August 19, at the home of Mrs. Homer Wilson in Fruitdale.

Breakfast bacon is good. But it always looks as if it needed ironing.

### Sister Mary Says:

Breakfast:—Several prunes, cooled wheat cereal, top milk, broiled banana, butte, breakfast rolled oats, bread, coffee, cocoa.

Luncheon:—Steamed spinach, graham bread sandwiches with fruit and nut filling, iced tea, orange juice.

Dinner:—Fricassee of chicken, mashed potatoes, boiled onions, apple and nut salad, junket ice cream, coffee, milk.

If there is a real baby in the family who does not come to the table, he may have a tablespoon to the spinach but through a puree strainer, for his two o'clock "feeding." The juice of the prunes will please him at eight o'clock.

### Graham Sandwiches

Four tablespoons chopped dates, 2 tablespoons chopped nuts, orange juice to make moist, thin slices graham bread, butter.

Put nuts through food chopper and add to dates. Mix with orange juice to make moist and spread on thin slices of buttered graham bread.

Sandwiches, even plain bread and butter, are nicer for children than unsandwiched bread and butter. There is less danger of sticky and lustrous little fingers.

**Intellectuals' Work To Be Championed by International Bodies**  
BOSTON, (AP)—The American Committee of Intellectual Cooperation, formation of which recently was announced to collaborate with a similar international committee of the League of Nations, will act as sort of champion for intellectual workers in the United States. One of the purposes of the American committee will be to learn the extent of any evils from which intellectual workers in different professions might be suffering and to suggest methods of relief. As an example, the international group has approved a measure to protect scientific property, basing their action upon the idea that scientific discovery should rank with artistic creation and technical invention, which are protected by copyright and patent. Thus, if some law of science were made-

## FEW AGED MEN IN SPITZBERGEN

LONGYEAR, CITY, Spitzbergen, (AP)—There are no old, and very few elderly people in Spitzbergen. The great majority are husky, longlimbed lads from Northern Norway of any age up to 40, with a sprinkling of Swedes, Finns, Scots, Russians and Germans. They all stand squarely on their feet and have fists like hams.

There is practically no mortality here, the doctor in charge of the excellently equipped little hospital told an Associated Press correspondent.

The visitor was shown through the small one-story wooden building where ten spotless white beds had been awaiting occupants for months.

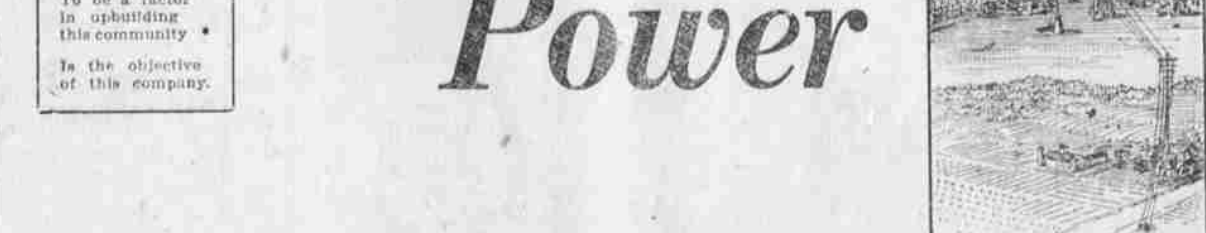

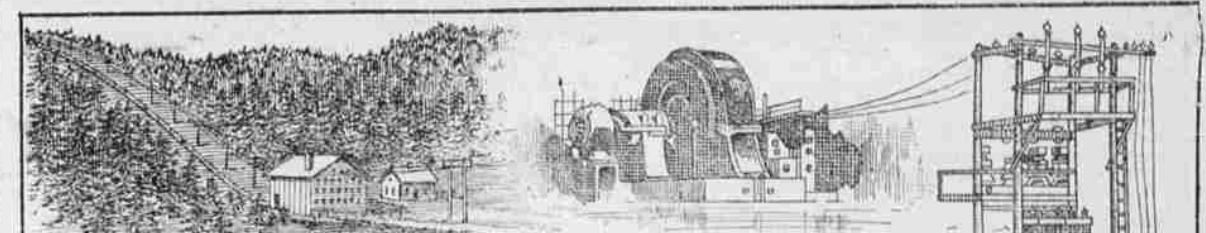

The doctor proudly displayed his operating room, replete with all modern appliances, his X-ray apparatus and his well-filled dispensary.

According to this medical authority, living in Spitzbergen is extraordinarily healthy and a doctor is rarely needed except in cases of accident such as happen in any mining or engineering industry.

While the doctor was holding forth to the correspondent about the salubrity of the Spitzbergen air, six or eight horny-handed fellows shuffled in, one after the other, and sat down patiently waiting.

"But here are patients, doctor," the correspondent said.

"Huh, I'll soon fix them," the doctor replied. "They've only been overeating."

covered which later was made applicable to an invention not only would the inventor benefit, but also the scientist who discovered the law.

The committee also will study inter-university relations and furnish data on various studies in various universities and the extent to which they are or should be given international recognition.

Methods to organize international relations between scientists and steps to facilitate their researches have been worked by the international body and the American group will do its share in this respect.

Cooperation between libraries of different countries with a view to systematic classification of their contents and a completion of foreign editions by means of "exchange" is another object.

The committee will be held in close touch with groups organized along similar lines in Austria, Belgium, Brazil, British Empire, Bulgaria, Czechoslovakia, China, Denmark, Estonia, Finland, France, Greece, Hungary, Italy, Latvia, Lithuania, Netherlands, Norway, Panama, Poland, Rumania, Salvador, Kingdom of the Seres, Croatia and Slovenia, South Africa, Spain and Switzerland. Other committees are in process of formation and each of these will report to the international committee which will act in one sense as a clearing house for ideas.
