Apple and peach trees as well as peach fruit and branches in western Oregon need a protective spray of Bordeaux mixture, 4-4-20, covering the back and buds of the entire plant as a protection against apple cankers, peach blight, and small fruit diseases, which attack during the fall rainy period and all winter.

Apply this spray on early September is all right. Experiment station bulletin 291 tells how to make Bordeaux mixture. This bulletin will be sent free on request to G. A. C.

Recently while in Washington I asked Godlin how he and his tailor friends were making it.

That's the old confidence for you. Ordering four suits on the cuff, "I'll be able to pay 'em with home run drives."

The team feels it can deliver in the pinch and usually does. If a double play is nigh desired the infield sets itself about to make a two-ply killing. And how that Washington infield makes 'em.

When winning a game is decided, it's essential the players to a man have faith in Walter Johnson, Stanley Coveleski, Tom Zachary and "Dutch" Reuther.
