LORD SEES ALL.—For the eyes of the Lord run to and fro throughout the whole earth, to show himself strong in behalf of those whose hearts are perfect toward him.—2 Chron.

Some auto speeders are making Sunday a day of putting to rest.

Ethics forbid a lot of things, but taking a profit doesn't seem to be one of them.

Five thousand watches are pawned every day in New York City. They belong to five thousand people who would probably be better off back home.

It's probably very satisfying to have money roll into town for such an event as the Round-Up, but think of the let-down they must experience after it's all over.

The average length of life in the United States has increased to 56 years, a gain of seventeen since 1870. We seem to be getting ahead in spite of automobiles, airplanes and bootleggers.

Clothiers, in convention in Chicago recently, decided that it is all right to wear suspenders now. What really is required is permission for all true pessimists to wear them and belts simultaneously.

A Kansas woman, aged 93, is seeking a divorce so that she may live in "peace and quiet" for the remainder of her life. She has doubtless come to the conclusion that the first hundred years are the hardest.

TALKING TOO MUCH.

Some people who have become more or less disgusted with Colonel Mitchell's continued attack on the powers that now control our army and navy air activities, may possibly lose sight of the real reason for the controversy. It is true that Mitchell seems afflicted with too many spams of talking and is anything but tactful in his methods. Yet he is actually contending for a change in our air administration that is readily understood by most thinking citizens. Mitchell doesn't say that warships and armies are obsolete and absolutely unnecessary today in the event of national conflict, but he does contend that the development of air forces in the future—five, ten, twenty years—may be such as to make armies and navies of less, or possibly not more than equal, importance in national defense. In view of the fact that other nations are giving such attention to their air services and have separate departments for the development, unrestricted by prejudice of this arm, he believes that like measures should be adopted in this country. He says that winged defense will become our most important defense problem and that a department of air service would permit proper preparation for that condition. All Mitchell wants is that the air service be given a fair show by men who have had the greatest experience and training along that line. The trouble is that he has adopted such spectacular means of accomplishing his end.

Local sheik: "Sure, I know what satiate means. I took my red-head flapper to a picnic, and I'll satiate."

After all the immodesty of the one-piece bathing suit depends largely on the size of the piece.

A writer in the University of Kansas claims the discovery of the super-ignorant co-ed. She thinks alma mater means "sweet mamma."

ODE TO FASHION

The way these women dress, by Heck! Is certainly quite shocking. They poke their compacts down their neck—And find them in their stocking.

Many a woman has promised to be a sister to a boy when she might have offered to be his grandmother.

"You say," repeated the druggist, "that you want a quarter's worth of candy and a nickel's worth of stomach-ache medicine?" "Yes, sir," replied the small boy, "an' mix 'em, please."

A body was arrested for stealing milk. The judge released him on the grounds that he had been allowed to take milk when he was a baby and did not know it was wrong.

If a husband is given a kiss when he arrives home, instead of a lecture, the chances are that he'll arrive home oftener.

The office grouch declares that if the houses were painted just half as well as the faces, we'd be known all over the nation as America's "City Beautiful."

The height of fashion this fall is about 15 inches from the ground.

Two people fall in love with each other. They have joint affection. Why, then, isn't...

Nurse (frightened)—Oh, gracious! I left it in the thermometer.

Even in the smallest towns there is always something going on. For instance, the interest on mortgages.

Probably there are not more affluities nowadays than there were when Victoria was living, but folks are becoming more careless with them.

FRESHMEN TO SIGN MONDAY

UNIVERSITY OF OREGON, Eugene (Special)—Freshmen who attend the University of Oregon this fall will report Monday on the campus at Eugene for a busy week of pre-registration formalities.

Next Monday will be devoted to physical examinations. Tuesday and Wednesday the new students will take the freshmen English examination and the placement or intelligence test. Entrance to the university is not conditioned upon the showing made in the intelligence test, which will be given for the first time this year. Rather, it is for the purpose of supplying the scholarship committee and the faculty with information upon which it will be possible for departments voluntarily to section classes later upon intelligence and performance.

Registration material will be distributed Wednesday. The freshmen will consult faculty advisers and have their courses arranged
