Union Fair to Begin Next Wednesday

(Continued from Page One.)
 These filled with brush and crayon, as well as for photographs. There will be classifications for water colors and oil paintings, crayon drawings, photography and china painting. In this division the work is limited to products of Union county folks.

The Boys' and Girls' clubs, under the able direction of County Agent Avery, will be represented by the live stock which they have to exhibit. There are classifications for baby beef, pure bred dairy calves, 100-day senior calves and several classifications of swine. Sleeping quarters will be provided for club boys who wish to stay at the fair grounds during the exhibition, but each member is required to bring his own bedding.

The educational progress will be shown in the school department, which offers premiums and ribbons for best manual training and domestic science exhibits, as well as for general school exhibits. Even the rabbits have not been forgotten. There will be first and second prizes for rabbits owned by boys and girls under 15 years of age. All exhibitors are urged to list their exhibits on the first day, Wednesday, September 23, or earlier, if possible. This simplifies the work of those in charge of the exhibits and insures better arrangement and display of the exhibits.

British Town's Business Section Raised 5 Feet

NORTHWICH, Eng. (AP).—Shifting houses bodily several miles and towns some yards along. The level, has often been done.

10 Years Ago Today...

J. J. Carr returned from a business trip to Portland.

but raising a whole town five feet is something new. This is claimed to have been accomplished by the surveyor of this town in just under three years. The entire business portion of Northwich, including ten streets, three banks, the county court and 200 stores and houses, have been raised to counteract the effect of subsidence caused by the brine pumping which proceeds continually in the salt mines under the town. There has been no stoppage of business and only slight buildings, including an ancient inn have had to be demolished because they could not be safely lifted.

In raising operations, parts of the lower brickwork were removed and small hydraulic jacks inserted. Chemists' stores were lifted so carefully that not one bottle was disturbed. The town bridge was raised five feet at each end to bring it up to the new level of the town.

Soviet Russia Charges Fee for "Listening In"

MOSCOW (AP).—Broadcasting in Soviet Russia is still in its infancy. It began only a year ago after the council of commissars decreed permitting private individuals to own small amateur receiving sets.

There are four broadcasting stations in Moscow and one each in Leningrad, Khar'kov and Kiev. The largest Moscow broadcasting station, "Komintern," works upon a wave length of 150 meters. It broadcasts daily concerts and newspaper information in the form of a radio-gazette, which is believed to be the only radio-newspaper in the world.

The other Moscow stations are of a smaller capacity. Political education seems to be the chief object of their broadcasting programs. Anti-religious propaganda is also finding its way through the broadcasting stations, which have special programs adapted for children and adults.

Three radio weeklies are published in Moscow, with a total circulation of more than 150,000. Preliminary registration for the possession of receiving sets has now been abolished and the sale of free receiving sets has been made free. A fee of \$1.50 must, however, be paid to the authorities for listening in. The manufacture of radio sets has been monopolized by the state, and the import of appliances from abroad is forbidden.

Aircraft Models Will Compete for Honors

WASHINGTON (AP).—Young America, with a bent for aviation, is now engaged in building and operating toy models to be flown in competition with the more spectacular national air races to be held at Mitchell Field, N. Y., October 5, 9 and 10. Officials of the National Aeronautic association here, which is sponsoring

the contest, believe that this interest evinced by juveniles in flying suits well for the future aviation in the United States.

The Muttwill model trophy will be awarded the winner of this contest, with eight prizes, ranging from \$200 to \$10, open to competition. Hand-launched, model airplanes, driven by rubber strand motors will figure in the duration race. The maximum number of contestants is 50.

No restrictions are placed on the design of the model except that it shall have a wing span of 40 inches maximum. The only motive power allowable is that derived from the use of rubber bands.

The aeronautical terms used by the juvenile fliers, officials of the National Aeronautic association said, would do credit to automotive engineers. The young contestants often use Japanese paper, with the write of an egg for glue, to make the wings as light as possible. Egg beaters are brought into play to turn the rubber bands, which furnish the motive power, to a nicety.

The winner at Dayton, O., last year was Robert V. Jaron, of Chicago, and several other Chicago boys won places in the 1924 contest.

ROUND-UP TO END IN AFTERNOON

(Continued from Page One.)

only will be ridden in the final today.

Honors in the steer roping championship of the world went to King Merrith when he caught, hunted and hog tied his steer in 25 seconds flat. Second honors on the day's sport went to Jack McDaniel, whose time was 25-4-3 seconds.

McCarroll Leads.
 It was in the bulldozing that the real breaks made their appearance in favor of the cowboys. Frank McCarroll's steer lost his balance and his feet when he crashed into the low arena fence, and the veteran cowboy had him thrown before the steer knew what it was all about in 20-4-5, she has filed claims with the commission. Paddy Ryan, dispositive pans.

The Infant

Girls Dissolve Secret Society

SALEM, Ore.—Acting under an order issued recently by the Salem board of education doing away with secret organizations in the public schools here the so-called T. A. society, composed exclusively of girls, was dissolved. Under the order of the board students who belong to secret organizations within the schools are subject to suspension or expulsion.

Still Carried on Running Board

THE DALLES, Ore. — Because they carried a copper still and coils on the running board of their motor car in full sight, Glenn Davidson and Roy Murray, itinerants, will reside a while in Wasco county. Davidson was fined \$100 and ordered to 30 days in jail and Murray to 60 days in jail when the men were taken before Justice McCreath by local traffic officers.

Investigates

Fresh fuel was added to the controversy over America's air forces stirred up by Col. William Mitchell when Col. George Nugent, above, of the army's inspector-general department, was sent to San Antonio, Tex., as to question Col. Mitchell about his attack on air service chiefs. Army aviation officers say that the cross-country trip was needless as the inspector general's office at Fort Sam Houston could have carried through the investigation.

WALLOWA CROP OUTLOOK GOOD

WALLOWA, Ore. (Special).—Weather conditions over this section of the country have been very unsettled during the past several days. The severe rain and hail storm which swept across a strip of country south and east of here Tuesday afternoon was very heavy in places, and shocks of grain in the fields were wet up considerably a few days sun drying weather will be required before threshing can be resumed again. A number of machines are working in the valley between here and Lostine at this time, and are fast cleaning up the crops. Some of the farmers have not finished cutting their second crops of alfalfa, while some of the hay is in the shock at this time. Lash Wolfe, who recently threshed a field of spring barley at his ranch in Middle valley are turning out good some fields of hard wheat making as high as forty-five bushels per acre.

The hail storm on Tuesday afternoon is reported to have done minor degrees of damage to gardens and fruit crops at various points over the country, at some points windows were broken by the hail stones.

The recent steady decline in the wheat prices has caused a number of farmers in this part of the country to sell their holdings. While much wheat has been hauled in the warehouses, much remain yet to be hauled. A large volume of grain is being taken into the Kerr-Giffin ware-house at Evans at this time, a number of auto trucks which are engaged in hauling wheat in the Leap section are delivering to this point.

To Start Fall Seeding

A number of farmers in the Leap section are treating their seed wheat at this time preparatory to commencing fall seeding. Some are vitroling while others are using the dry treatment, some farmers who dry treated last fall state they are unable to determine whether it is better than the old method or not, as many of the fields on which the seed was treated last fall contained a considerable amount of smut that year. Some farmers state that believe that a more uniform germination can be seen when the dry treatment is used. The greater part of the fall seeding in this section will be somewhat later than fall due to farmers behind with their work, but very few have seeded at this time.

T. A. Basked has been busy the past several days stacking his bundles.

Bruce Fisher of Leap reports a considerable loss of a field of standing oats and spring wheat, from the hail storm of Tuesday evening. Mr. Fisher's field was in the direct path of the storm which swept in a northeasterly direction across the valley and hill section. Mr. Fisher estimates his loss at about one hundred sacks of wheat, and damage to the oat crop at about one third. A potato patch on the same ranch was considerably damaged by the

A Service That Is Outstanding

When, in June, 1909, Mr. Penney, after seven years and two months of arduous and painstaking work, gave over the management of our "Mother Store" in Wyoming to an assistant whom he had trained to merchandise and sell the Golden Rule way, he completed the cutting of a pattern for efficient store-keeping.

During all the years that have followed, this now world-famed pattern has stood out as the supreme achievement in broad store service to the public.

People have benefited to the extent of millions of dollars saved in the cost of the necessities of life.

John Couch was a Wallowa visitor Thursday. The grasshoppers are not bad in this section of the country as usual this fall, and it is not expected that much damage to fall wheat will result from them. C. F. Harmon and wife were Enterprise visitors the past week.

and when one is fortunate enough to see it performed by so talented a company of players as Mr. Moore and those with him, it is a worthwhile experience.—Bellingham, Wash., Music News. Shown at Arcade theater, Sept. 30, 9-13-11
