## Miss Blackinton, Mr. Walker Wed

The marriage of Miss Ruth Blackinton, of Baker, to Gene Walker, of this city, became known here today. They were married in La Grande at Mr. Walker's home on North Oak street October 25 by the Rev. O. W. Jones. The happy couple left shortly after the wedding for California, where they are at present on their honeymoon. The bride is a graduate of the La Grande high school and lived in La Grande for a number of years. She is the daughter of Mr. and Mrs. J. C. Blackinton, who now make their home in California.

## Sister Mary Says:

(By Sister Mary)

Breakfast—Orange juice, cereal, this cream, crisp whole wheat toast, rich waffles, milk, coffee.

Luncheon—Luncheon rice, brown bread, prune whip with custard sauce, milk, tea.

Dinner—Cream of celery soup, breaded veal cutlets, potatoes, green peas, cranberry sauce, cauliflower, apple pie, pudding, bran rolls, milk, coffee.

Children under school age may be given the soup, rolls and milk from the dinner menu. A soft cooked egg or lamb patty with dessert left from luncheon might complete the meal.

Parsnip Fritters. Four or five parsnips, 1-4 teaspoon salt, 1-8 teaspoon pepper, 1 teaspoon sugar, 2 tablespoons butter, cracker crumbs, 1 egg.

Wash and pare parsnips. Cook in boiling water until tender. Drain and mash. Season with salt, pepper, sugar and butter and beat well. Make into small flat cakes. Roll in cracker crumbs, dip in egg slightly beaten with 1 tablespoon cold water. Roll again in crumbs and fry in a frying pan until a golden brown. Brown one side, turn and brown the other. Baren fat and butter are used for the frying fat.

## The Garden

Fall Planting for Lilies. No garden is complete without lilies. This is the time to pre-

pare for them, the handsome gold lanted lily of Japan, Lillium auratum, the snowy regal lily, the spotted speciosum lilies and the common tiger, clustered and prairie lilies. Most of the foreign lilies arrive from Japan too late to be planted in the regular bulb season, usually coming in late in November or early December. It is a simple matter to place a heavy mulch over the place where we want to plant the lily bulbs and leave it there until the belated bulbs arrive. The mulch will prevent the ground from freezing so that the bulbs can be planted and the bulbs again placed over them to give them a period of root-making before freezing goes deep enough to check it. Deep planting is one of the secrets of success with lilies and from six to eight inches of soil should lie above the top of the bulb, depending upon whether the soil is light or heavy. The condition lily, the white Madonna lily, is an exception which requires only two inches over its head. Most of these lilies, in addition to making roots from the base of the bulb, send out clusters of roots from the stem which are as necessary to its growth as the basal roots. For this reason there

must be left plenty of room for stem growth underground. The umbellatum lilies in tones of orange scarlet and as showy as oriental poppies, following them in the garden, usually are on hand earlier than some of the other types. They are specially handsome to plant among the later blooming trees such as the Siberian. They multiply rapidly and are one of the hardiest of all the garden lilies.
